rewarded by the opening of another streak of high grade ore and a sample. assayed showed values of about \$3,000 to the ton. The first shipment of gold cyanides from the Sevier Con., mill were shipped to this city today.

WEEK ON EXCHANGE.

Business Brisk Among the Brokers-Closing Quotations and Sales,

This has been a busy week on the boor of the Salt Lake Stock & Mining exchange, and when today's call closed the record of Secy. Shorten, showed that a total of 518,520 shares had been transferred for \$149,515.02, against 130,524 shares for \$29,098.75 during the same period a year ago. There has been a good demand for speculative stocks and considerable trading in those of a higher class. Little Chief made the sensational advance of the week, the stock selling up to 20 cents a share. Daiy Judge stiffened slightly at the bening of today's call on the strength of the company's dividend announce ment, but this was only momentary, as the last sale was quoted at \$11.12%. Nevada Hills is down again, while May The closed in somewhat better tone.

BALAKLALLA SMELTER. Capt. MacVichie Says Steel for Plant

Is Arriving.

Capt. Duncan MacVichie, managing director of the Bingham Consolidated properties, returned last evening from a trip to the Bajaklalla mine in Shasta. ounty, California, over which he exercises the same function At the present time the management.

is particularly interested in seeing the new smelter completed as soon as pos-sible. The work of construction, the captain said today, is pregressing very satisfactory; the spur from the tracks of the Southern Pacific company has been completed and Manager Robert and, by doing so, discovered the fact that a huge granite belt, probably two miles in width, separated the miner-alized zone. The ore occurs in a lime-stone formation on both sides of the White is about ready to begin the construction of the new tramway. The steel for the smelter building, also some equipment, has begun to arrive.

LOUISA FISSURE.

Utah Apex Develops a Good Body of \$30 Ore.

Recent advices from the Utah Apex mine indicate that what promises to be a very large body of high grade ore han been located in the vicinity uisa Fissure, says the Bulletin of Bingham

The drift disclosed, was for a considerable distance in ore which averaged \$20 to \$30 per ton. It has now entered the fissure, which is not mineraliz The Utah-Apex has resumed which is not mineralized. the shipment of ore to the custom smelt-ers. About 1,000 tons had accumulated the dump and it was found advisable to send this forward by team to make room

Work on the company's new serial trainway is going ahead rapidly, and should be completed at an early date, thus enabling the com-pany to ship 100 to 200 tons of ore daily. On such a production there will be a substantial net profit to the com-Diality

Three cars of ore from the Montezuma property at Bingham were at the smelters Monday and another car is being londed for the market. Manager Peter Porter says that not less than 200 tons of ore will be sold this month. Nearly that much was marketed in August, though the first car was not ready until the 5th of the month and there were several days that it was impossible to get teams to do hauling from the mine to the radread.

'60s, when shipments of bluestone were made to the mills around Virginia City, the owners neglected to fortify L. R. Moser, manager of the Mystic Shrine, returned from Denver early in the week and left immediately selves against newcomers, and left the way open to Mr. Miller to locate the Douglas ground. Naturally, the manfor Oregen where he has gone to inagement of the Ludwig is not inclined to be neighborly, although they have had no one to blame but themselves spect some mining property. The local manager will be absent about two months and upon his return a cam-paign of development will be inaugu-rated at the Mystic Shrine. It is the inin sleeping on their opportunities.

tention of the management to sink on the vein which was opened up rome Demand for Good Stocks Continues-Coppers in Special Favor.

LITTLE CHIEF ASSESSMENT.

time ago.

William H. Tibbals takes a very hopeful view of the market for mining stocks, and looks for a brisk fall busi-The directors of the Litle Chief Mining company at a meeting yesterday afternoon decided to call on shareholdness, due to the general prosperity pré-vailing all over the country. afternion decided to can on introduc-ers again for more money, and ac-cordingly an assessment of a cent a share was levied on the outstanding shock. The mine is in need of new "While some investors seem inclined to take profits," said Mr. Tibbals today, "which is usually a safe course, there is a demand for good stocks that is hoisting equipment and this means was stimulating the whole market. The record of the iransactions on the local taken to get speedy action. It is the intention of the directors to install a new plant capable of operating the mine to the depth of 1,000 feet. exchange this week shows an increas.

SUES FOR BIG SUM.

N. J. Catrow has been made defendand in an action filed in the district rourt by J. J. Snider to recover \$29,750, BUIGHT alleged to be due as commission for the sale of certain mining claims in Bing- will have more when the returns are

to find a copper mine. Having heard something about Yerington, Mr. Miller headed that way and landed there apparently at the right time, for up to that time there had been nothing doing in the way of developing the mines except in a desultory sort of way. Sev-eral weeks were used up in energetically investigating the country and the longer he remained the more convinced was he that Yerington would some time achieve considerable fame as a copper mining camp. Consequently it was in order to acquire a foothold and when Mr. Miller wound up, his stakes were conspicuously pres-ent on both slopes of the West Walker

very good inducements for the invest-ment of capital, the investor turned

a deaf ear to it. Halley had no mines. The east wanted copper and Mr. Miller concluded that the west would have

to supply the demands of the east. The

"copper boom" was getting under a

od head of steam, so he struck out

range of mountains. Among his first acquisitions was the Bluestone mine, which he later sold to Capt. Delamar, who is now operating it and who recently placed in successful commission an electolytic concentrator for the treatment of the low grade ore of that property. Soon after his acquisition of the Bluestone, Mr. Miller relates, he went over to the west side of the range

range, but the west section is charac-terized by a yein system not so pro-

nounced on the other side, where, he explains, is situated a lens-shaped ore

body about two miles in length and

one and a half miles in width, the area

covering about all the copper deposits of consequence in the eastern sec-tion which contains the Bluestone, Ma-

dicate which formed the foregoing named company, which he did after

visiting the abandoned stopes of the Ludwig mine, probably the oldest pro-

the surface to survey the situation and apparently walked over acres of copper outcrop. He staked off 20-odd lode

claims and, with the exception of one

side, completely surrounded the Lud-

wig company's ground. Although the
