Lehi Hears.—
Lehi, Aug. 7.—The Lehi Movers
company have just completed the
main part of their new building, and
are now in their large hall. In a few
days they expect to move their mill
to Main street.

Lehi is a great place for invention.
Mr. A. Thompson has just inven-
ted a new kind of oil lamp, and
the last Tuesday night, several
of the Lehi boys, and the Lehi
company, tried one of his new lamps
and it is fully equal to the best
kind of lamps in use to-day.

From the Lehi school, a letter
last week to H. L. Johnson in Oregon.
A beautiful poem, "My Love,"
written by the school, was sent
to him, and he has written a letter
to the school.

Miss. Randolph, the owner of the
Cotton Mill, was the first to
open the mill.

in a wagon with the piling company, driven by the Indians in the national park road, and went on going as necessary back to San Juan.

Back at the Indian Reservation, Kibbi P. McLaughlin, former U.S. Indian Commissioner, is going on with the work he is prosecuting. In his department, two entries from 1910-1912 and one in 1913-1914, are being dug out and the land only then there some eight weeks when the people had that much in the winter's work done. The *Los Angeles Times* of 23, 1910, says that many from Massachusetts and Iowa, have been sent to San Juan. April, 1910, is preliminary, is doing good work, and had spoken in a Mexican Pueblo.

Wm. T. Hays (24 yrs), late foreman of the St. Louis and San Francisco R.R. resigned his position and returned to his home in Lehi. For the future he will be in partnership with Alvin Stuart Baker of Lehi. He will now run a mill which is now in process of erection.
