not be there if there was not an oil rone underneath. It would be impossible to gain any positive knowledge until some wells are put down. And just as soon as Messrs. Neary and Kelly make a trip to Nevada to attend to matters requiring their im-mediate presence, they will return and the company will send in an out-fit for drilling some wells. The forma-tion is very favorable for rapid work. The shale and sandstone are soft and The shale and sandstone are soft and it is estimated that from 50 to 60 feet a day can be made. Piping will not be necessary, only casing for the mouth of the well.

<text><text><text><text><text><text>

running. It is the plan of the com-pany, however, after maxing a work-ing test to determine finally what process is adapted to the ores, to put in a mill of 300 tons capacity. Most of the machinery of the testing mill can be used in the larger plant.

## MILLER CREEK COAL.

Salt Lakers Interested in a New Carbon County Camp.

bon County Camp. Miller Creek coal fields, which are to be opened up in the near future with a branch rallroad from Price to the immense coal deposits that have been uncovered, have been practically all surveyed during the last week, by a party of six engineers and assistants, says the Carbon County News. The activity shown by those interested in the enterprise is ample evidence that the field is to be opened and placed in the ranks of the large producing camps of Carbon county within the next 12 months. onths.

Arthur A. Sweet, who has large in-terests in the Miller Creek field, was in Price Monday with a party of capi-talists from Idaho and from the east, and a thorough inspection of the coal deposits so far as opened and blocked out was made by the men, who stand ready to provide all of the necessary finances for building the branch road from the Rio Grande Western and 'to equip the mine with machinery. Preliminery work has also been start-ed on the selection of a route for the railmond, and surveys from the main line will follow in the near future.

COPPER SITUATION.

## Hopeful View Taken by Prominent Producers of Metal.

Producers of Metal. According to producers of copper the hupplies in consumers' hands are lower how they have been in years, says a for the copper in the form of scrap has been practically consumed, and the market two weeks longer. Some, the market two weeks longer, some, the market two weeks longer, some, the market two weeks longer. Some, the market two weeks longer, some, the market longer of the market, but not enough the market is the market is the market, but not enough the market is the m

ir should be \$1 lower, and if these ab-normal prices obtain in the hight of the hay season when the article is in plenty, what will be the prices later on when cold weather comes on? The same story is told about oats. The receipts today, include bar sots of watermelone. Valencia oranges, and bananas, with express shipments of cantaloupes and grapes, the latter in some profusion and including the black prince, muscat and the seedless variety. Farmers are selling tomatoes from the wagons at 50 cents per bush-el, although they are selling higher at the stores. Eggs are up 50 cents per case, as it is claimed that the Utah hens continue to neglect their duties, and eastern fruit of the hen is being brought in in large quantities. The prices obtaining today, are as follows: normal prices obtain in the hight of
