BOOK BINDING AND PAPER RULING

GEORGE Q. CANNON,  
EDITOR & PUBLISHER.

BREVITIES.

If you are out in a driving storm, don't attempt to hold the reins.

What relative ought to make the best pedagogue? (Stepsons.)

"Oh, Nanny, with those gang wiles?"

is the fellow when he was trying to steal a goat.

Through excessive railroad tolls and over-production the peach-growers of Delaware have this year failed to make their immense crops remunerative.

One of the toasts drunk at a recent celebration was, "Woman; she requires eulogy—the rest for herself."

The New York Standard's "fashion man" speaks of the recent funeral on Fifth Avenue as "the finest private affair ever witnessed."

The boy who wished he was a fountain so that he might be playing didn't reflect that a fountain doesn't play unless it works well.

An Oregon man eloped with a Tennessee girl, married her in Nashville, and found his parents in St. Louis, from whom he had heard nothing for fifteen years—all in one day.

An Illinois agricultural society offers a premium for the eagle who will come to the fair grounds the largest number of children, grandchildren, and great ditty.

A lady in Mobile is now confined to her bed from the effects of poison, manifesting itself in sores about the mouth, caused by biting green sewing silk while working with it.

The Chicago Times says that Mr. Theodore Tilton, of the Golden Age, may be regarded as generalissimo, while Victoria Woodhull-Bloomfield, as Adjutant-General of the strong-minded female army.

A Brooklyn physician prescribed by-draught of chloral for a young lady, and wrote the prescription "Chlor Hydri."

The drugist interpreted his dog Latin to mean Chloridium Hydroxydum—corrosive sublimate—and the young lady died—death following much quicker than had she taken the poison prescribed.

M. Chevallier prints a letter in which he asserts that the Bank of France is in danger of bankruptcy. He says that during the first week, when the bank's capital was only \$9,000,000, the advance in the government rose once on an exceptional occasion to \$17,200,000, but when the capital of the bank was increased to \$15,000,000, the advances to the government never exceeded \$18,000,000. The present government, however, has already borrowed six times, and proposes to borrow eight times the whole capital of the Bank of France.

A farmer who went to Texas to buy a farm was greatly prejudiced against the country he thought to settle in, from the fact that a doctor whom he called to attend him, when he was seized with fever, began trying on his clothes immediately after writing a prescription.

The fact that while the doctor was trying on his coat, the chambermaid was examining his hands for the fever, and the porter was struggling with his boots, lent wings to his imagination, and doubtless had an influence in regard to his speedy exit from the State.

We are touching our fellow beings on all sides. They are affected for good or for evil by what we are, by what we say and do, even by what we think and feel. My flowers in the parlor breathe their fragrance through the atmosphere. We are each other as silently saturating the atmosphere about us with the subtle aroma of our character. In the family circle, beside and beyond all the teaching, the daily life of each parent and child mysteriously modifies the life of every person in the household. The same process, on a wider scale, is going on throughout the community. No man liveth to himself. Others are built up and are strengthened by our unconscious deeds; others are wrecked out of their places and thrown down by our unconscious influence.

Most persons who have had teeth filled would probably have considered a relief to have the carious molar taken out, filled and put back again, instead of keeping the carious tooth in the mouth, while the dentist works upon it in situ. It appears from the following paragraph, which we take from the Pacific Medical and Surgical Journal, that there is some hope that the process of filling may come to be performed in this way:

"Dentists are now testing a plan proposed by Mr. Coleman, an English dentist, as follows: Extract the tooth, clear away caries and the contents of the pulp cavity, and canal; wash out with carbolic acid, fill the cavity, and scrape off all diseased pulp and carious matter, leaving the healthy portion of the tooth membrane attached to the root of the tooth; bathe the alveolus and the tooth in a solution of carbolic acid, and return the tooth to the socket. Out of fourteen cases, Mr. Coleman succeeded with nine; operating on bluish and molars."—Journal of Chemistry.

(SPECIAL TO THE DESERET NEWS.)

By Telegraph.

For WESTERN UNION Telegraph Line.

WASHINGTON.

Money transfer.

WASHINGTON, 5.—The U. S. Treasurer to-day made a telegraphic transfer of \$250,000, from San Francisco to New York, through the Bank of California.

NEW YORK.

Political troubles in Louisiana.

LONG BEACH, 5.—A committee of twenty Warmouth Louisiana delegates had an interview with the President to-day, and laid before him their grievances. After considerable conversation in relation to the facts contained in the address read, the President requested a copy which was given him. He then said he would send it to the officers complained of, and have their statement before taking any action in the matter. He added that the address presented a formidable array of charges against the federal officers named therein. He said he had not authorized the use of troops, and that Geo. Reynolds, when he filled the regulation of Marshal Packard, did not know that they were to be used at a political convention.

Program of Democracy in Great Britain.

NEW YORK, 5.—The London Times of August 23rd, in an editorial on the parliamentary labor of 1871, says that the results of the session are of a character to be long remembered in the kingdom. All the constitutional changes are in the Democratic direction. The election is becoming more and more a depositary of power, and it is now sought to ensnare him within the strong walls of the ballot box. It thinks the changes effected in the government form a new era in the history of Great Britain.

French National Guard Belligerent.

A correspondent of the London Times, writing Aug. 23d, from Paris, concerning the abolition of the national guards through France, says that the news had been received that in Lyons, Marseilles and other large towns the national guards would declare that they would keep their arms and not be dissolved as a body; and that they would even resist to the bitter end of civil war and defy the regular troops rather than give up their guns.

The Saito-Tunnel.

The commission appointed, under act of Congress, to examine the Saito tunnel have arrived here and are now engaged in making up their report. They are favorable to the project, and will make some recommendations to Congress in its favor, though in what shape has not yet been decided upon.

The Municipal Troubles.

NEW YORK, 5.—Some Tammany leaders are to-day boldly maintaining that the meeting last night will result in nothing, and the powers of Tammany will be in no wise shaken by its action. It has all along asserted that the name of August Belmont, which headed the call for the meeting, was a forgery, and that the principal movers of the affair were secreted and placed under guard. They claim, also, that the absence of men who are well known in business and in politics is a sign of the weakness of the demonstration. There is no doubt, however, that the meeting has laid the foundation of a public sentiment which will secure, sooner or later, reforms which are so much needed. One of the chief objects in view for the present city charter, which places the appointment of important city officers in the hands of the mayor, and otherwise diverts from the people the powers before exercised by them.

Rapid Traveling.

In the Liverpool Post of August 24th, a remarkable case of rapid travel is reported. On the afternoon of the 2nd of August a gentleman left the first named place by the Pacific Railroad, and arrived in New York on the 9th, just in time to go on board the steamer Wisconsin, and made the passage in her to Liverpool, which port was safely reached on Saturday evening. The entire journey by rail and water occupied only seventeen days.

MASSACHUSETTS.

Fire.

SPRINGFIELD, Mass., 5.—The church organ factory of Steer & Turner, at Westfield, was burned this morning with the contents; loss \$30,000; half insured.

MINNESOTA.

Windy.

ST. PAUL, 5.—A wind storm this evening swept this town at 4 p.m., demolishing the building on the ground. Philip Jacobs was blown from a train and received fatal injuries.

WYOMING.

The Election.

CHEYENNE, 5.—The result of the election cannot be definitely ascertained to-night. The Republican members of the legislature are elected in Albany county; in Carbon and in Uintah counties it is thought the Democratic candidate is elected over the regular Democratic ticket. Laramie and Sweetwater counties are doubtful. The Republicans are confident there will be a majority of the friends of the State and Territorial administrators in the legislature.

NEBRASKA.

A Powerful Storm.

OMAHA, 5.—A terrible storm passed over Fremont, Neb., to-day at 4 p.m., demolishing the house on the corner of 10th and Pacific R.R., carrying part of the roof over twenty rods. It destroyed a windmill, tore the telegraph wire and blew a far from a side track. The hail was severe.

That pamphlet.

The National Democratic resident Executive Committee held a meeting to-day and adopted resolutions protesting against the anonymous pamphlet entitled, "Concession or how the lost cause may be restored and the independence of the South secured," now being circulated as though from a Democratic source, as a fraud; that the sentiments of the pamphlet are antagonistic to the principles and purposes of the Democratic party; and declare their unanimous belief that the same originated with a radical source, with the intention to deceive the public and prejudice them against the Democratic party.

KENTUCKY.

Inauguration of Governor.

LOUISVILLE, 5.—The Hon. F. H. Leslie was to-day inaugurated Governor of Kentucky.

nor of Kentucky. The venerable Judge Robinson, Chief Justice of the State, over eighty years of age, was so weak and helpless that he had to be carried to the stand to administer the oath of office; and after declaring Gov. Leslie duly installed governor of Kentucky, announced his own resignation of the office he had so long held. This unexpected announcement caused considerable sensation.

PACIFIC COAST DISPATCHES.

SAN FRANCISCO, 5.—Between ten and eleven o'clock last night, Sydney Floy, alias "Smith," shot and killed a rival boatman, Richard Horley, alias "Mickey Free," near the corner of Third and Berry streets, Long Bridge. The bullet entered Horley's mouth, pressing up into the brain. Horley leaves a wife and children. The murder appears to have been cold-blooded and unprovoked. Floy surrendered himself at the calaboose about 12 a.m.

"Smith," the boatman who killed "Mickey Free" last night, and surrendered himself, claims he did it in self-defense. His story was that he was threatened to murder him, and he was compelled to shoot.

Thermometer, 78.

FOREIGN NEWS.

GREAT BRITAIN.

A leader among internationalists dead.

LONDON, 5.—Dr. Karl Marx, the leading spirit of the International Society, died to-day, aged 53.

Generalities.

A strike occurred to-day among the workmen at Bradford.

A special dispatch from Dublin says more riots are apprehended. The police are ordered to be on their revolvers, and it is expected that the rioters will be under arms in case of an emergency.

The anniversary of the occupation of the Roman States last year will be celebrated at Rome on September 20th, by the passage of the national guards through the city and theatrics.

The Sheffield strike has been arbitrated, and it is expected that New-castle will follow.

All Pacha is dying at Constantinople. It is expected Pacha will succeed as heir to the Viceroy of Egypt.

Americans dismissed from service in Egypt.

Advices from Egypt report that the Khedive has dismissed all the Americans in his service, both in the army and civil departments. This step has been taken in consequence of the ill-feeling and jealousy displayed towards Americans by numerous Turkish officials of high standing and influence.

FRANCE.

A Tammany Discussion in the Assembly—Inconclusive Sentence.

PARIS, 5.—A tumultuous discussion took place in the Assembly to-day, on the proposition made by Depuy Ravinal for the return of the Assembly and seat of government to Paris.

PARIS, 5.—The trial of the female incendiaries is concluded. Four are sentenced to death, one to imprisonment for life, and one to ten years' solitary imprisonment.

Six of the female incendiaries of Paris are now under trial, being arraigned before a separate tribunal specially constituted for the purpose. Numerous witnesses have been summoned.

UTAH

CALIFORNIA

LUMBER COMPANY.
