CHURCH LOSES
SUIT AT PLOCHE

Judge Brown Renders Important
Decision Involving Title to
Mining Ground.

CLAIMS WITHIN TOWNSITE.

Locations Made There Subsequent to
Issue of Townsite Patent
Declared Void.

Special Correspondence.

Ploche, March 29.—The case of the Church vs. Greenwood was decided late this afternoon in favor of the defendant. Considerable interest has been shown in the decision as the result will be of undoubted benefit to the town, furnishing employment to a number of new as well as developing one of the promising properties of the camp adjoining the old Raymond Ely with which its old workings were connected in the early days. Greenwood and associates took a bond on the property last May, making a payment of \$5,000. They put up a new hoisting plant, and have been engaged until recently in rebiting the old shaft, which has been finished to the 400 level.

A second payment of \$10,000 was due on Dec. 1, but on account of the financial stringency Greenwood did not secure an extension of 30 days "or until such time as the title should be perfected." According to the contract the second payment was due on Dec. 31, but Greenwood apparently, understanding the 30 days to mean one month, did not deposit the second payment until Jan. 1, which the church refused to accept, claiming the contract forfeited, and began suit for possession of the property and \$10,000 damages.

It has developed in the trial that the title was not and even now is not perfected according to a decision handed down by Judge Brown Thursday, and hence the jury was only seven minutes in rendering a decision in favor of the defendant.

According to the decision of Judge Brown all mining claims located upon the townsite, subsequent to the issuing of the townsite patent, are to be plotted and sold at public auction. Since there was but one property, the Raymond Ely, patented previous to the townsite patent in 1875 there will be no hardship caused to some of the locators inside of the townsite.

A contract has been let to Judd-Lund-Olsen company to haul 800 tons of ore from the Bristol Consolidated dump to the railroad at the Jack Rabbit mine. It is understood to be the intention of the company to put on a large force of men as soon as possible.

ON MINING EXCHANGE.

Prices Lower and Light Trading—
Closing Quotations and Sales.

There was a sagging market for mining stocks today. Nearly everything moved off. The eastern markets were soft and this condition was reflected locally. Taro seemed to be in demand and made slight gains and the same was the case with Victor Consolidated. Notwithstanding the fact that the Lower Mammoth Mining company has closed a contract to send its ores to the Nevada smelter in Tintic when it is completed, the stock did not rally above the prices quoted yesterday. Nevada Hills sold at \$2.85 and South Columbus at \$1.00. Ohio Copper sold down \$2.40, with little demand for it, only one lot of 100 shares being transferred.

The closing quotations and sales were:

HOME BUILDERS

have in mind a pleasant place; easy access, quiet, with good natural advantages; in a word—HOMELIKE. We have choice lots in just such a place—Forest Dale. Everybody knows its advantages; its own water system; two lines of street railway, the most attractive and comfortable care on that system; its beautiful chateaux and grounds; its fine schools; its excellent location and splendid soil; and lastly its sane, industrious and united community. We can sell you lots for low prices for cash or on easy terms at 6 per cent, on deferred payments.

ALL PITTSBURG MINES CLOSE.

Pittsburg, March 31.—At a meeting of the miners and operators this afternoon, it was decided that all mines in the Pittsburg district would suspend operations at midnight tonight until a wage scale agreement has been reached.

About 30,000 miners throughout Western Pennsylvania are affected.

A request from the new miners' president, Lewis, that the Pittsburg district miners support a conference to renew the interstate wage agreement, was unanimously refused. It is considered inadvisable to renew the interstate agreement this year.

WASHAKIE IS
COMING TO FRONT

Camp Fourteen Miles from Gold
Circle Is Taking on Boom
Appearance.

ORE CARRIES GOLD VALUES.

Assays Run High—Country Being
located in All Direc-
tions.

A large chunk of ore from the

property assaying \$121 to the ton has been received at the office of Councilman A. J. Davis from the property of the Washakie Nevada mines company, located in an unorganized district about 14 miles north of Gold Circle, Nev., and which is controlled by a syndicate of Salt Lake.

"The Washakie property," said Mr. Davis, "consists of 14 claims and the ore you see there came from the bottom of a shaft 25 feet deep. The vein proper is about four feet wide, and taking the whole thing as it comes, averages according to recent samplings made of it, about \$57 in gold to the ton. At the surface, the vein was small, measuring but a few inches across, but as we have gone down on it, it has gradually widened out and there is everything to indicate that we have a good thing. It certainly looks encouraging to say the least. We are pushing development and just a few of us are putting up the money. At present, the company is offering no stock for sale and none has been issued. We have recently let four leases on the ground, and work is progressing steadily on them."

The road to Gold Circle passes within a short distance of the Washakie and more than 200 people stopped there last week. The country is being located in every direction and is certainly attractive; the veins are well defined and bear every indication of permanency. It begins to look like the Gold Circle boom would spread to this district and remains for development to tell just where the biggest mines will be found."

George Morgan, the well known restaurateur of this city, is president of the Washakie company and L. L. Downing, secretary.

ECLIPSE PROPERTY.

News from Seven Troughs of Interest
To Salt Lake Shareholders.

The Eclipse property has again come to the front as the result of a splendid series of strikes, says the Seven Troughs Miner. Krantz & Irving have cut the main vein in their gold area, 70-foot level and at this point have at least six feet of good milling ore, with a streak of shipping ore varying in width from a few inches to a foot. They are drifting south on the vein with every indication that they are rapidly entering the same rich shoot that from the surface for 15 feet down, has been a parallel vein explored, shows 16 inches of \$500 rock.

With the shoot cut at the present depth the lessees will take out a shipment in a short time. They have an immense amount of milling ore developed. In addition to the vein just intersected, they have just left a parallel vein nine feet wide that is all milling ore.

The O'Donnell lease on the Eclipse reports a strike of a new vein at the surface, four to five feet wide, that shows an average value of \$36 a ton. Mr. O'Donnell has sun in this vein about eight feet and an encouraging improvement is shown. It will soon be reached from a crosscut from the bottom of the O'Donnell shaft, which is down 30 feet on a parallel vein.

In the Eclipse mine on the 150-foot level, a three to four-foot body of quartz has appeared in the center of the mammoth vein of foot good. As the upper level, the vein is not more than \$2,640 a ton. A 4-foot hole on this quartz body only served to show it up better than ever and the acting manager, Harold Watts, will begin sinking the incline on the vein immediately.

The Eclipse contact vein has shown nothing of a marvelous change for the better from the 70 to the 150-foot level. At the upper level, the vein is not more than 4 or 5 feet wide; at the lower level, it measures 21 feet wide by tape and this colossal body will average outside the hole, good streak at least \$9 a ton in value.

BURLINGTON PROPERTY.
West Tintic Proposition Responding
Favorably to Development.

Special Correspondence.
Mt. Pleasant, March 21.—Richard Whittaker and Nels Rolfsen have reached home from West Tintic, where they have spent most of the winter in working in the Burlington property. Five men have been employed most of the time and considerable of first-hand experience has been taken out for shipment.

The directors of the company will meet in Salt Lake tomorrow to discuss plans for the future. C. O. Elingsworth of New York is president of the company and R. F. Nealen of Salt Lake, secretary.

COLUMBUS CONSOLIDATED.

Suppt. Jacobson Not Ready to Confirm
Strike Rumors.

There was a rumor current on the street today to the effect that developments on the lower level of the Columbus Consolidated mine at Alta had been of a highly gratifying character during the past week and that the workings had opened into several feet of high grade shipping ore.

An effort to confirm this report was made by calling up Suppt. A. Jacobson by telephone. In the talk with him Mr. Jacobson declared there was nothing to say other than that conditions in the mine were very satisfactory.
