Natural Gas in Colorado Springs—The  
Floods in Arizona—Rising  
Intelligence.

A state attorney's association has  
been formed at Thomas, Washington.

Cross about Hispanic in Northern  
New Mexico are said to be very pro-  
motional.

But very little mining will be done  
in the Custer of Arizona, according to  
Minerals, El Paso, Texas, which  
is in full protection to life and property.

A new fire has been discovered  
near Carbon and Hanna, Wyoming.  
Since time ago there was no  
connection from Hanna to the post  
office department to have the mail  
carried from Carbon to Hanna instead  
of from Danes it had formerly been.

The South Africa mail at Idaho City  
has started up or not taken from the  
west drift at the depth of 100 feet. It  
is expected to yield about \$100 per  
ton. The last mail was sent to the  
post office department to have the  
mail carried from Carbon to Hanna instead  
of from Danes it had formerly been.

Green River (Wyo.) Star: The water  
flow in Green River recently left  
mounds of fish high and dry on the  
banks of the stream. The wrecks of  
these decaying fish lie in places  
over. They are scattered along the  
river for many miles, and include all  
the varieties known to be in the  
stream.

The first public exhibition of the natu-  
ral gas of Colorado City was made there on  
Friday night. A pipe line 2,000 feet  
long connected the gas from the well to  
the place of exhibition. The test  
was fully successful and convinced  
the most skeptical. The gas gives a  
powerful flame in the well of 100 pounds  
steam gauge.

Says the Cheyenne Leader: The  
Union Pacific has discontinued advertising  
its services to the west end of the road because of their affiliation  
with the American, Atlantic, Union  
and the others. D. C. Cooley, agent  
of Astoria, D. O. Carnegie and W. H.  
Hill, operators of the Union Pacific, and  
J. W. Johnson, agent of the Atlantic  
canyon, all in Wyoming, are among  
others left out.

The big hills along the San Pedro  
in Arizona brought forth another of the  
prehistoric suns found to some extent  
about Tucson, containing human bones  
and fossils. The sun was buried  
and partly revealed by the washing  
away of the soil. It is said to be  
at least 100 feet more at the  
bottom. The vessel is irregular in  
shape. It was full of ashes and bones.

The Great Falls (Montana) Leader  
says: The remains of L. M. Kline,  
the young man who died at the Park  
hotel, have been shipped to Helena.  
He was a son of John Kline, one of the  
finest hard wood merchants in Helena  
and the first man of that name.  
Never before he was struck in  
the lungs by a skyrockets during a  
Fourth of July celebration, and never  
recovered from the effects of it.

The Elko (Nevada) Independent says:  
There has been a serious cutting affray  
at the hay camp on Murphy & Hopkins  
range, North Park, in which Ronald  
Dominguez, a Mexican, was killed  
and another wounded with a knife. The  
Spaniards, who are employed in hay-  
ing, were engaged in a drunken row  
when Dominguez whipped out a knife  
and cut Martinez, laying open his  
abdomen to the heart, and killing him  
instantly. As soon as the cutting was  
done, D. ran away, with a revolver  
strapped to him and a belt of  
cartridges, mounted his horse and rode  
away.

Three cases of smallpox, as pre-  
dicted by the physician, have made their  
appearance in the heart of Mo-  
rillo, New Mexico. They are Mrs.  
Frank Foy and infant son, and a man  
who was employed by Mrs. Kendall.  
About ten days ago Mrs. and Mr. Kendall  
lost their infant child, and at that time it  
was reported that the cause of  
the death was smallpox. The infant  
was the only case of smallpox. The  
three patients of the oldest could sur-  
vive the sickness. The two houses have  
been placed under quarantine. The  
city council held a meeting, and it is  
possible that the city will be placed  
under quarantine. Quite a number of  
exposures are reported.

Phoenix (Arizona) Record: Bob Lund,  
of St. Louis, Mo., has come to Phoenix  
as an expert to advise and give  
advice in the vicinity of the Muddy  
valley, this country. The flat is located  
in the mountain range, about  
twenty miles southeast of Thomas.  
The flat is located on the surface  
of the ground, and the cause of the  
terrible losses has not yet been located. Two hundred  
pounds of dynamite, known as dynamite  
explosives, have given an average return  
of \$100 to the ton in gold. Lund is pre-  
pared to go to work on the flat, and  
will do so as soon as the weather  
is dry enough for him to do so.

The official investigation which  
the government is now conducting into  
the affairs of the post office department  
of the City of Mexico and other parts  
of the republic is reported to have re-  
vealed a startling amount of thefts,  
and there will be a wholesale search  
for the guilty parties. The post  
service in different parts of Mexico it  
has been shown that the post office  
has been systematically riddled with  
the aggregate amount of over \$100,000.  
The success of the  
post office, Mexico City, amounts to  
over \$100,000,000, and the cost of  
the few to about \$14,000,000. The em-  
ployees of the post office have  
also been arrested, investigated showing  
that their charges amount to a  
considerable sum, and the when amount  
has been determined, the investigation  
is to be extended to all parts of the  
post office. The post office is still a fugitive from  
justice.
