THE EVENING NEWS.

Saturday, - - - - February, 4, 1871.

PRICE OF GOLD,

Quoted Daily by HOOPER, ELDREDGE & Co., Bankers.

SALT LAKE CITY, Feb. 4, 1871.

Buying at $1.08½ Selling at $1.11½.

LOCAL AND OTHER MATTERS.

MOVEMENTS OF PRESIDENT YOUNG.—By Deseret Telegraph line we learn that President Young left Cedar City at 7.15 to-day, and stayed at Parowan for dinner. He goes to Beaver to-night.

CALL AND GET THEM.—There are messages at the Deseret Telegraph Office for Geo. E. Semple and Geo. McGowan.

TENTH WARD.—The second of this winter's series of lectures given at the Tenth Ward School-house, will be delivered on Monday evening by Elder Thomas Taylor. His subject will be "Forming the Mind." The time of commencement is 7 o'clock.

"THE ICE WITCH."—This legendary piece, with its magnificent scenery, transformations, fairies, choruses, and acting, is advertised for production on Monday evening. The scenic artist has been engaged for between two and three months on the scenery for it, and no pains will be spared to make it the best piece of the kind ever produced here.

LECTURE LAST NIGHT.—The lecture on astronomy last night was not so largely attended as on some previous occasions, but still the audience was numerous and appreciative, and the general feeling at its close was that the lecture was highly interesting, and that the more advanced principles of the grand science of astronomy has been most beautifully and lucidly explained by Professor Pratt. It may be expected, now, that what some may consider the dry technicalities of the science have been discussed and explained, that each succeeding lecture will become more and more interesting; and we have the fullest confidence that all who attend through the entire course will feel amply repaid. The next lecture is on Tuesday evening.

ATTEND MEETING TO-MORROW MORNING.—The Rev. J. C. Kimball, of Beverley, Mass., arrived in town yesterday evening. He is a minister of the Unitarian Church, and is on a visit to the West, intending to go to Oregon as far as Puget Sound and spend eight months in the trip. He will preach in the Tabernacle to-morrow morning at 11 o'clock, and will be, we believe, the first Unitarian minister who ever preached in this city.

THEATRE.—The truly sensational drama, "The Lost Ship," to be presented for "positively the last time," this evening, is pronounced by everybody to be an improvement upon the common run of plays of that class, and "what everybody says must be so." Mr. McKenzie's enacting of the part of "Ben Trennant" is spirited and very sailor-like; Mr. Thorne's conception and playing of the villainous, hard-hearted, cruel "Ned Martin" is very good, and Miss Colebrook's "Rose Linden" is a faithful picture of a tar's sweetheart. Mr. Margetts and Mrs. Clawson have comic scenes through the piece and make considerable fun, as does Mr. Harris as the Dutchman. The chorus and dance by the characters and supernumeraries are other features of the piece worth seeing.

The ever popular, side-splitting farce of "The Spectre Bridegroom," in which Mr. "Phil" Margetts can be excelled by very few as "Dickory," with a good cast will close the evening's performance.

LECTURE ON THE REVIVAL OF LITERATURE AND ART.—Yesterday afternoon Professor Bellerive delivered a highly interesting and instructive lecture to the students and visitors at the Deseret University, on the revival of literature, art and science in the 16th century.

The lecturer spoke of the condition of Europe previous to the 16th century, and showed that the revival of literature, art and science at that time, owed its origin to the restoration of antique literature and its popularization by printing. Among the distinguished men in literature he presented Ariosto and Tasso. He observed that modern literature had its origin in Italy, spreading through France, Germany, Spain, England and the Netherlands; and in architecture the illustrious Bramante created the Renaissance style, which is a fusion of the Gothic and the ancient Greek architecture, and reached its highest degree of perfection with Michael Angelo, whose masterpiece is the famed St. Peter's of Rome. Then followed a brief notice of sculpture and chasing.

Speaking of painting he called attention to the six immortal names—Leonardo da Vinci, Michael Angelo, Correggio, Georgione, Titian and the divine Raphael, endeavored to show that these men were the greatest painters of Italy and of any country or period; and that their influence might extend to France, Francis I, to whom he thanks, extended an invitation to the celebrated painters of Italy; and a school of painting was formed in Germany with Albert Durer and Holbein. In science Copernicus, with his discoveries of the planetary system, was made conspicuous.

The lecturer's masterly presentation of pure and florid Gothic, etc., by diagrams, coupled with his volubility and zeal made the lecture at once entertaining, instructive and impressive, as the marked attention of his appreciative hearers plainly proved.

The regular lectures on chemistry was announced for Friday next, by Dr. F. D. Benedict. Subject: "Water."

A SOCIAL AND SUNDAY SCHOOL CONCERT, will take place in the Thirteenth Ward Assembly Rooms, next Tuesday evening, under the direction of Mr. William Spiring; piano accompanyist Mr. Joseph J. Daynes. The programme is very lengthy and choice, including songs, glees, choruses, duets, dialogues, recitations, &c., &c. Some of the songs and choruses will be sung by the children of the Sunday Schools; others by some of the best talent of the city. The price of admission is fifty cents. Remember Tuesday night, 7 o'clock; secure your tickets early and go and have a good time.

INSURANCE. READ THIS!—There is a good deal being said just now about life insurance, and the agents of most of the companies endeavor to make a great point of the positive impossibility of failure on the part of the companies, and the consequent non-liability to loss of those who take out policies. Their representations, verbal and printed, sound very specious and plausible to the ears of the uninitiated; but the following extract from the Chicago *Tribune*, which may be depended upon as strictly reliable, tells a different story, and we recommend its statements to the attention of our citizens:

"The failure of the Monitor Mutual (Life) Insurance Company, of Boston, adds a fifth case to those of the Great Western, Farmers and Mechanics', and others, which, within two months past, have transpired. Those cases need alarm no one who, if he has insured at all, has taken the pains to find out the difference between the solvent and the insolvent companies. About thirty of the hundred companies now doing a "life insurance" business in the United States are as plainly insolvent as any of those which have failed, in all respects, except that the cash has not yet given out, and are still able, therefore, to pay salaries. But they have not the available assets with which to reinsure their existing policy holders in a sound company, and no responsible company would take their whole assets as a commission for insuring even half of their risks. Fully one-third in number of the companies now existing are insolvent in fact, and the sooner they fail the less their policy-holders will lose. But such failures will leave wholly unaffected the bulk of the life insurance outstanding, of which fully seventy per cent. is carried by eleven companies, which are thoroughly responsible and safely conducted."

FEMALE PRESIDENT FOR 1872.—Victoria C. Woodhull is the nominee of the "Cosmo-Political Party" for President of the United States in the election of 1872. We think she has a very slim chance for election; but Victoria is a good name. Queen Victoria has done very well, or has done very little, for England, and President Victoria might do as little for the United States—anyway she could hardly fail to do as much good as some Presidents have done.

PEOPLE'S VERDICT!
Over Half a Million sold and in use!
4,000 made and sold per week!
SINGER'S
New Improved Silent
FAMILY SEWING MACHINES
ARE
The Best in the World,
Because all of them are in constant use, while a very large proportion of other makes are not used, owing to their being partially or utterly impracticable.
THE SINGER
NEW FAMILY MACHINE
Has been brought to perfection, regardless of time, labor or expense, and is now incomparably the best Sewing Machine in existence.
It is *simple, compact, durable, beautiful, quiet, light-running*, and capable of performing a range and variety of work never before attempted upon a single machine; using either Silk, Twist, Linen or Cotton Thread, and sewing with equal facility the very finest and coarsest materials, or anything between the two extremes, in the most beautiful and substantial manner.
The New Improved Attachments for Hemming, (any width) Braiding, Embroidering, Magic Ruffling, Gathering and sewing on (at the same time) Self-Sewing, Cording, Tucking, Quilting, Felling, Trimming, Binding, etc., are novel and practicable, and have been invented and adjusted especially for this Machine.
Folding Tops and Cabinet Cases.
New designs of the unique, useful and popular Folding Tops and Cabinet Cases, peculiar to the Singer Machine, are in every variety of Woods, such as Black Walnut, Mahogany, Rosewood, Satinwood, and from the plainest to the most elaborate pattern and finish. The Machines themselves are plain or highly ornamented with pearl and gold to correspond with their tables or cabinets.
In the Singer the work is fed or passed through the Machine in the natural direction, namely, *from the operator*, permitting her to sit in a natural and healthy position. In many other Machines the work passes from right to left, or the reverse, *compelling the operator to sit in a bent and unhealthy position, and thus causing weakness of the back, etc.*
The Singer uses a SHORT STRAIGHT NEEDLE, which is not liable to break or miss the stitch. Many other Machines use a long crooked needle, which *is* liable to break and to miss the stitch.
In the Singer Machine the Shuttle is carried, thus avoiding nearly all wear. It requires no oil, and does not soil the thread or goods. Other Machines *drive* their Shuttles, i.e., race, thus causing great wear, and *requiring oil*, soiling the thread and goods.
On the Singer, the Tension on both the upper and lower threads is absolutely under the ready control of the operator, thus rendering the Machine always available for good sewing, which is not the case with any other. Many so-called cheap Machines are really worthless, and so are many of their new peculiarities and supposed advantages.
The SINGER is the
Oldest Practical Sewing Machine,
Being about twenty years in the market. Having been constantly improved by the employment of the most skilled ingenuity of the age and unlimited capital, it is now divested of all unnecessary parts and possesses All the Very Latest Inventions and Improvements. It is the only Machine sold on Honest Claims, as all its rivals are Frauds and will do all that is claimed for them. Some other Machines are Greatly Complicated, to do Useless and Silly things, and thus are rendered Liable to Constant Derangement. The Singer Seldom or Never gives trouble, but is readily and easily managed by those *who utterly fail on other Machines.*
SINGER'S
New Manufacturing Machines
Claim the same advantages over others of their class as the new Family Machines. These old and well-tried Sewing Machines are *applicable to all kinds of heavy and light manufacturing in Clothe, Leather, etc.*, and run in the most perfect and reliable manner without trouble to the operator.
HAVE ARRIVED!
A Full Assortment of those
Beautiful and Unrivaled MACHINES.
(The numbers on which show a manufacture of between Five and Six Hundred Thousand.) Consisting of the Different Varieties made by the Singer Manufacturing Company, and we shall sell at Eastern Prices, with addition of Freight only. To accommodate parties who cannot pay all down, we will sell on
EASY MONTHLY INSTALMENTS
So that all may possess one of these *Blessings.*
For the convenience of our Patrons we have engaged the services of a gentleman who has had twenty years experience and is one of the most skillful experts in the world in repairing and adjusting Sewing Machines. He will put each Machine in complete and practical running order before it leaves the Institution and will also impart to purchasers all needful instruction, so that they can at once commence work.
We resort to no trickery whatever to sell Sewing Machines, but allow their Great Merits to recommend them. We can do this, as the demand for them is so great that although the Singer Company make more than all other first-class companies combined, they cannot, hardly fill their orders, and are compelled to still extend their Gigantic Works.
We having been so fortunate as to secure the
General Central Agency,
For this Territory, we extend a cordial invitation to all to come and see the Machines, whether they wish to buy or not. See all others, but do not buy without you examine the Singer.
We Guarantee every Machine we sell & give entire satisfaction.
THE SINGER
BUTTON-HOLE MACHINE
Is the only Practical one in the World.
