2:00 p. m. Consideration of resolutions.

Consideration of resolutions.

The residents of the State of Utah, I Indian Territory, Mr. E. L. Halsell, where walk in life does not throw them in contact to any great extent with the cattle and sheep industries of this inter-mountain region, are beginning to wake up to the fact that the fourth annual convention of the National Live Stock Association of the United States, to be held in Salt Lake City in the Assembly Hall, January 14 to 18 inclusive, will be essentially one of the red letter days in the annals of the State.

By the end of next week thousands of wealthy cattle men will be heading from all points of the compass with Sait Lake as their objective point. They will come from the north and the south, the east and the west as fast as steam and wheels can bring them. They are oming with their dollars to spend, and ask the citizens of this gem city of the mountains for nothing beyond the privilege of hiring a room wherein to sleep, and the extension of the glad hand of welcome. While the cattle and sheep men tarry in Sait Lake they will transact millions of dollars worth of business, for the National Live stock convention has grown to be a week wherein the stockgrowers from all over the country congregate to transact huge sales in hoofs and horns, that look forward twelve months ahead in

Meri are coming from the Pacific slope and the Atlantic coast; Mexico and Canada, when they get through with their business, and the oratory attendant upon the representative assembly in the building in the Tabernacle square they will have time to look around, invest in souvenirs to remind them of the good time they spent mind them of the good time they spent mind them of the good time they spent in our midst, and spend their money generally with a lavish hand. They are the men who will do it too. One has only to cite the recent figures as pub-lished in the Chicago News on the oc-casion of the cattle show held there last month to demonstrate this. On this occasion, according to the News, the last month to demonstrate this. On this occasion, according to the News, the visiting steckmen spent no less than \$2,000,000 in the various department stores in Chicago and the attractions of the Windy City generally. This statement was given as a conservative estimate of the maner in which an average stockman behaves himself when he comes to town.

Secretary Martin, Chairman J. Leary and those associated with him have been working for a month past like the proverbial beavers in order to make the occasion one long to be re membered. There is every reason to believe that they will be successful in their endeavors, for they are made of th kind of material which goes into the makeup of typical hustlers. Every over the country and the burden of dozen strong When the visitors do arrive they

will be accorded a hearty wel-come and be given the best of what there is in town. They will then invade the city to take back with remembrances of the hospitality of the people of the Great West, in whose midst they are coming in an official ca-pacity for the first time. The decorations in the Assembly Hall

bid fair to eclipse anything heretofore attempted in the West, when it comes to interior decorations. Secretary Martin says so, and he has done some traveling and attended a few conventions and public gatherings himself during his career. Hundreds of dollars are behis career. Hundreds of dollars are be-ling expended on this one feature, which, when finished, will be a thing of beauty and of unique design. Pictures and half tones of the Assembly Hall will adorn the pages of numerous leading periodicals and stock papers of the East and West. This in itself will be a big advertisement, while during conven-tion week dispatches bearing the date line of Sait Lake City will appear in every daily paper in America.

The delegates, their friends and the

visitors generally will not devote them-silves entirely, however, to pleasure. They will have business to transact, which will occupy the major portion of which will occupy the major portion of their time, as the official program, drawn up by the committee composed of A. E. De Ricqles, chairman, Colorado: Mortimer Devering, Indiana; Dr. Charles Gresswell, Colorado; A. C. Halilwell, Illinois: Mattre K. Parsons, Utah; Bruce McCullough, Nebraska, and Frank R. Goeding, Idaho, will demonstrate. In addition to the convention proper the sale and exhibition of tion proper the sale and exhibition of fancy stock will be a feature through-

out the entire week.

A copy of the official program of the proceedings of the fourth annual convention of the National Live Stock as sociation of the United States of America for the week of January 14, 15, 16, 17, 18, has been secured by the "News" and accordingly published twelve hours ahead of any other paper in the United States

Whereas, Oleomargarine alone takes the above grade of oils mentioned and the manufacture of it enhances the price of these specially made products of the farm, and, therefore, enchances the market value of the beeves, hogs 4:10 p. m. and seed from which the raw sub-stances are taken, and Whereas, Anything which will cripple | Levi B. Doud, Illinois, Brains

Repaired Polished and Sharpened by an Expert.

What are brains made of?

Albuman and delicate particles of Phosphate of Potash. Chemical examination of the perspiration and urine will determine the amount of recent brain work, by the amount of Phosphate of Potash found, for these delicate particles are thrown out from the brain and nerve centers during nervous activity, and find their way back to earth, through pores, kidneys, bowels, etc.

There is but one true way to repair the daily losses, and that is to furnish the body with food containing a sufficient amount of these two elements, When the brain is not properly fed, the evidence is shown by a gradual decrease in the mental and physical powers of the body.

A food expert has prepared a crisp, dainty and delicious food for the express purpose of quickly and surely rebuilding the brain and nerve centers, and has given it the name of GRAPE-NUTS.

This food is made by selecting the proper parts of grains and treating them by heat, moisture and time, in practically the same manner Nature does in the human body during the first part of digestion. The result is that the finished food not only contains the needed elements for brain building, but they are ready to be presented to Mother Nature in such shape that she quickly absorbs and uses them. The good, solid, substantial results obtained every day by people who use Grape-Nuts prove the facts.

The new food is found in all first-class grocery stores, and is one of the most toothsome and palatable novelties yet produced, requiring no cooking or preparation of any sort; on the contrary, it is ready for immediate use and suited to the athlete, brain worker, epicue, or invalid.

Made at the pure food factories of the Postum Cereal Co., Ltd., Pattle

THAT EMPTY RESERVOIR. Superintendent Hines Makes an Explanation Regarding It.

Superintendent of waterworks Hines was interview yesterday as to allowing the Thirteenth East street reservoir to remain empty. He said the reservoir had been full continuously, except when cleaned, ever since November 15, until the recent cold snap, when the usual flow of water coming from Parley's canyon ceased on account of the cold weather, and the water accumulated in the reservoir ran out into the mains supplying users under the high line. Mr. Hines says he thought he was doing what was for the best in terests of the people in drawing upo the reservoir when the water famin prevailed in the business district. Mr Hines further states that there has no been enough water coming from Par-ley's to fill the Thirteenth East reser volr and he has had to turn the water from City Creek, through the high line, into it every night from 12 o'clock

He says he can't keep the reservoir full if the city hasn't sufficient water. The superintendent claims that the Capi-tol hill reservoir has always been kept full for emergency in case of Jre, and that it is adequate for such purposes. Water is now running in the Thirteenth East reservoir, and it will be filled as soon as possible. Mr. Hines said there

standing between him and the Mayor. Mayor Thompson upon this subject said, the understanding was that the Thirteenth East street reservoir Was to always be kept full in case of fire and he held that Superintendent Hines should not have allowed it to become empty, notwithstanding the recent shortage, but otherwise, if the city did shortage, but otherwise, if the city did not have enough water to keep this reservoir full, Mr. Hines could not be blamed. The Mayor claims that if the city engineer in noticing the reservoir was not full, as stated in a morning paper, had reported the fact to him, he would have seen that Superintendent Hines kept it full, if possible. An understanding has now been arrived at between the Mayor and the superintendent, and the reservoir will doubtless be kept as full as the water supply kept as full as the water supply will permit.

MAN SLAYER INSANE,

Case of James Burke Who Committed Murder-Simon Bennett.

James Burke, who killed Telephone Lineman Harrison at Brigham a few months ago, and who was convicted of murder and is serving a sentence for life in the State prison, was brought in and examined as to his sanity yesterday. C. Wright and F. M. Schultz, guards at the penitentiary, brought the man in, He is laboring under the hallucination that people continually come to see him: sees things in advance and is troubled about what is going to happen; is under the impression that some of the prisoners at the prison are going to kill him, and is full of remorse. He has shown symptoms of insanity ever since he committed the crime mentioned. doctors concluded he was suffering from melancholia. He was committed to the asylum, where he will be treated for his

SIMON BENNETT.

Simon Bennett, aged 57, a resident of East Waterloo, was also examined by Drs. Wright and Young before Deputy County Clerk Blair to determine as to whether or not he was insane. Two witnesses, Elijah Brown and L. I. Howard, testified that he threat I. J. Howard, testified that he threatened to kill people in the vicinity of his residence, particularly his little girl, aged about 10 years. He also set fire to the house the family lives in.

The unfortunate man with his family consisting of wife and one child, came, here about three months ago from Michigan, and has manifested signs of insanity ever since his arrival. doctors pronounced him suffering from insanity of the paresis variety. He was likewise sent to the asylum.

Didn't Marry for Money.

DIES FROM AN OPERATION. J. W. Wright of This City Passes Away at Battle Creek, Michigan.

The sad word has come from Battle Creek, Michigan, announcing the death at that place of J. W. Wright of this city, Mr. Wright's death was the immediate result of an operation, which had become necessary through complications that had been brought on by overexertion in protecting his office during the fire in the Progress block last

Mr. Wright's condition became serious about a week ago, when his family hastened to his bedside, and his wife attended him devotedly until the end came. Mr. Wright came to Utah in 1894, from Clark, S. D., where he had practiced law. He engaged in fraternal life insurance here for some time, and then established the Physician's and Dentist's Protective and Business bureau, which business was growing all the He was a native of Dlinois, and was 50 years of age. He leaves a wife, three sons and one daughter. The re-mains will probably be interred at the

old home in Illinois JOS. H. CODDINGTON DEAD. Veteran Traveling Man Falls a Vic-

tim to Kidney Trouble. Joseph H. Coddington, who was known very well in Salt Lake, died at his home yesterday, 2 Amos terrace, of kidney trouble. Mr. Coddington has made Utah his home for the past ten years, having come here from New York, his native State. He was in the

employ of the American Tobacco com-Mr. Coddington is survived by a wife and one grown son, Joseph Coddington, who is doing business in New York The funeral will likely occur on Mon-

Deceased was 54 years of age. QUAIL ARE EXPENSIVE.

A. W. Beck and William Welling are

Charged \$5 Each for Them.

The price of quall has gone skyward. At least that is the opinion of A W. Beck and William Welling, a couple of railroad men, who bumped up against a hard proposition yesterday afternoon. It was a mere technicality. Had the quall been alive then all would have been well—perhaps. But the birds were mean enough to die and therefore Welling and Beck were accused of "unlawfully having four dead quall" in their possession. They were caught by Deputy Game Wurden Frederick Allington. The men were; not the quall. No guns were in evidence but quall. No guns were in evidence, but the birds showed clearly that there had been, and that quite recently, too. The man with more titles to his cognomen than a Hindeo prince, placed the rail-roaders under arrest, and they were immediately taken before Justice of the Peace Krocger. The defendants entered plea of guilty and were assessed \$10 sach, which is equivalent to \$5 per quil.

ANEMIA

The face alone is no sure index of health; but headache and dizziness, no ambition, no force, no endurance, short breath, palpitation of the heart on little exertion-these with a pale face, are a clear indication of what is wrong. There is too little red in the blood.

There is too little vie force. It is life that is wanting.

Scott's emulsion of cod-liver oil supplies it.

We'll send you a little to try, if you like.
SCOTT & BOWNE, 409 Pearl street, New York.

MEN OVER 35 YEARS OLD DON'T NEED EXERCISE.

Chicago Hygienic Expert Pro- of his business. A long walk only further calls upon his reserve. Violent golf or pounds a New and Startling Theory,

(Special to the New York World) Chicago, Dec. 2.—Dr. Albert H. Hoy, after years of patient research, says exercise is positively unhealthful for men past thirty-five years of age. Dr. Hoy has published a book on "Eating and Drinking" which is preised by the profession. He is a specialist in hy-

I say that exercise for the business

man or men past middle age is detri-mental. I exclude the young and the laborer. Every action, whether of the brain or of the muscles, destroys cells, uses up tissue and creates wante ter to be taken up by the blood and to be eliminated from the system.
"Now, unless such waste is eliminated it becomes so much polson in the aystem. The great eliminating machine of the human body is the kidneys. Unless the kidneys do their work the system is saturated with poison.

Senator Davis a Case in Point.

"For instance, there is the sad case of Senator Davis. His toe was poisoned by his stocking and refused to heat. Kidney complaint developed, or rather the kidneys for a long time had not done their full work, and the system was so polsoned that the toe became gan-

The kidneys work ensity during

youth-up, say, to thirty-five years of age. But after fifty they become slightly atrophied, they shrink a little. not disease, but a simple effect of age. Consequently, as a man advances in the kidneys in good working order by years he should ask his kidneys to perform a little less work, instead of a lit-But, suppose a man of business not

only uses his brain during business hours, but also puts a strain on his muscles afterward. There is waste then to be carried off, mental waste and physical waste, the broken-down brain cells and those of the muscles likewise. Thus the kidneys are forced to do dou-Thus the kidneys are forced to do dou-ble duty, to eliminate poisons resulting from two sorts of action.
