UNION

SAFETY LAMP.

IS conceded by all who have seen it to be

possessed of great merit, and to be alto-

gether the best thing of the kind ever put in

the market.

It is a lamp constructed with two tubes,

the outside one intended only for the attach-

ment of the burner, and the inside one to contain

oil and receive the light. As there is no con-

nection between these tubes it will be evident

that there is no possibility of the gas from the

burner reaching the oil, and as long as the oil in a

lamp can be kept perfectly cool there is, of

course, no chance for an explosion.

The Lamp is strongly

and well made, attractive in ap-

pearance, and something ex-

travagantly new and novel. It
