

Mining, Business and Stocks.

TINTIC STOCKS ATTRACT NOW

Trading This Forenoon Was Confined Mostly to Them.

LA SAL MINING REGION IS GREAT

Were Heavy During Both Calls of the Exchange—Prices About the Same as Yesterday.

For 29,362 shares of stock sold upon the stock exchange this forenoon the sum of \$25,322 was paid. The market was rather unsteady today, yet the most of the traders held up to yesterday's prices very well. The Tintic stocks were again the center of interest and with very few exceptions the trading was done in them. Park City and Mercury stock were inactive and sold in very limited quantities. Lower Mammoth held the greatest attention during both the regular and open board calls. When it was called into the pit there were little signs of a break in price and in fact it was inclined and did advance in the sales, but closed just where it began. Some brokers are of the opinion that the limit has about been reached while others say they would not be surprised to see it supported up to \$2 per share. The more conservative do not take this view of the situation, however. Star Consolidated was not quite as strong today, while Uncle Sam along very close to yesterday's quotations. Yankee Consolidated was in somewhat better shape.

The closing quotations and sales were posted as follows:
