

## MINING, BUSINESS AND STOCKS

GREAT COPPER  
CAMP OF AMERICA

The Permanent Future of Yerington District is Now Assured.  
Says F. J. Hagenbarth.

## ABOUT NEVADA DOUGLAS.

Every Indication Points That It Will Be a Wonderful Producer.

That the camp of Yerington is located in one of the greatest copper districts in America is generally conceded by mining men and engineers who have made recent investigation of that region and this sentiment was voiced today by Frank J. Hagenbarth, one of the members of the executive committee of the Nevada Douglas Copper company, who returned yesterday from making an inspection of the properties of that corporation which have been done in four properties along the Nevada Douglas, Bluestone, Mason Valley and Ludwig, to insure the permanent future of the Yerington district. "These developments," added Mr. Hagenbarth, "place this statement beyond a conjecture or prophesy; for the fact is, enough ore has been exposed in these mines alone to make a magnificent camp, not to mention the other property of the Western Nevada Copper company, the Sprague, McConnell and other active properties in some of which some very fine bodies of ore have been exposed."

Asked to say something about the Nevada Douglas, the response from Mr. Hagenbarth was: "Nevada Douglas has reached the stage of development where it is able to care of itself. The facts are we haven't sunk a hole, run a drift or made a cut on the property up to date without encountering ore. We have sunk altogether six shafts, run from 40 to 180 feet in depth and every one of them has been in ore practically all the way from the surface to the bottom; these shafts being scattered at widely separated points over an area of between 400 and 500 acres. Four of the shafts have been in continuous ore all the way from the surface and samplings of them has shown average values in the ore of 3 per cent copper while three of the number ran as high as 4 1/2 per cent. Richer sections have been encountered running from 8 to 15 per cent. The only place in the present workings in the main tunnel, at this time is not showing ore, but this is a certainty that we will get it there within the next 25 feet as has been demonstrated in two shafts sunk on either side of it. The total length of the main tunnel is to be 2,500 feet when completed.

"Developments in the Nevada Douglas," continued Mr. Hagenbarth, "have more than come up to the expectations of the officers of the company. The reports made by engineers sent there for the purpose of making examinations, have been very flattering and apparently these men are making their statements. The property was visited not long ago by Mr. A. E. Pearse of London and E. P. Jennings of this city. In fact, it has been very agreeably surprised at the developments south and west of the main Douglas hill. Referring particularly to those shown in the Amalgamated and Castling Copper, Mr. Pearse begins to look as if this western area would develop as encouragingly as Douglas hill. We find indications which have led us to believe that the shallow depth and this much is demonstrated in the S. S. shaft, where they were encountered at about feet."

Mr. Hagenbarth says the Nevada Douglas management has been handicapped considerably in its construction work on account of the lack of transportation facilities and the slow delivery of supplies. He mentions the completion of the electric power line being brought over from Como, Nevada, by the General Electric Power company, from which the Nevada Douglas some time ago obtained a favorable contract for power, the same to cover a period of 10 years. Owing to the failure to get poles, it has been necessary to stop work temporarily; however, the difficulty will soon be remedied by the completion of the power line. The dimensions of the main tunnel, now being driven, is six feet in width and seven feet in height and in the care of everything to do with the 500-foot level. Work has also been started on a three-compartment shaft, over which will be installed a double hoist. This shaft will be connected with the tunnel and will then be pushed on to the water level of the mine, which is probably 400 feet below the tunnel adit. From the shaft it is planned to crosscut along the water level for the purpose of opening up systematically and sulphide zone, which will give a total depth of from 900 to 1,000 feet and is in striking distance of any point within the area of 500 acres. Mr. Hagenbarth says it is a great pleasure to him to say that the Nevada Douglas is not the only big mine in the Yerington district. While there is the Mason Valley mine and was very proud to see the splendid showing being made there.

At the Mason Valley he saw the miner working in a magnificent body of sulphide copper ore, which samples from 18 to 20 per cent in copper. Mr. Logan, the superintendent, had run a cross-cut into it a distance of about 15 feet with no indication of having reached the end of it.

Mr. Hagenbarth found a decided change in the activity of the district since his last trip, about four months ago.

## ON MINING EXCHANGE.

Carla Active This Forenoon, But Closed Lower—Closing Quotations.

The value of the stocks sold on the Salt Lake Stock & Mining Exchange today ran above \$200,000. Considerable stock was offered and the stock closed lower. Lower Mammoth stock fell off at \$1.50, advanced to \$2 and then fell back to \$1.37 1/2, which was the closing sale price. Mountain Lake was in demand and considerable trading in that stock was indulged in. Beginning at 90 cents, the stock sold up to 95 cents. There was some demand for Ontario and others were found for it up to \$6 a share. The closing quotations and sales were:

## BINGHAM-NEW HAVEN.

Official Announcement Made of Important Developments.

According to Manager C. H. Doolittle of the Bingham-New Haven Mining company of Bingham, some interesting developments have taken place in the property of that company recently. At a point 50 feet from the mouth of the new tunnel, states Mr. Doolittle, the management ran into an ore body which is characterized in every respect by the ores now being extracted by the Utah Consolidated company, not over 800 feet away. The company has driven through this ore for a total distance of 130 feet, the face of the tunnel at present being fully 325 feet beneath the surface. Mr. Doolittle states that this ore will carry on an average of 3 per cent copper, \$2.50 gold and 2 1/2 ounces silver to the ton.

## NEW COMPANIES FORMED.

The Evans, Thompson company of Salt Lake filed articles of incorporation yesterday to conduct a stock brokerage business here. The capitalization is for \$10,000, with the stock held at \$10 per share. The officers are: President and treasurer, R. J. Evans; vice president and secretary, P. C. Thompson. These officers own all but three shares of the stock.

The Opex Mines company, organized under the laws of the state of Maine, with headquarters at Augusta, filed certified copies of its articles of incorporation with the secretary of state yesterday. The company is capitalized for \$4,000,000, with stock held at \$10 per share. But 15 shares of the stock have been subscribed for, according to the articles, an dthe company holds no property that is scheduled in the document.

## TWO CARLOAD LOT COMING.

Vernon and Rosebud to be Connected By Wagon Road and Telephone.

## Special Correspondence.

Vernon, Humboldt Co., Nev., Jan. 6.—At the greatest depth yet reached in this camp P. A. Bird, lessee on the principal Cleghorn property, has just broken into a large body of quartz which shows free gold to the naked eye and pans heavily in this metal. The discovery was made at a depth of 80 feet in a drift, the ore body covering the entire face of the drift and consequently being of unknown dimensions. The work of penetration continues, the rock looking better at every blast.

The strike has special interest here because it reveals conditions 20 feet farther in the ground than any other working in the new camp and it shows a decided improvement over surface conditions. It indicates also the permanent character of the Cleghorn proposition to a general voice of all miners, and also members of the Industrial Workers of the World.

This not only includes miners, skilled mechanics and laborers, but also waiters, bar tenders, barbers, store clerks, teamsters and all workers. The voting is in progress today. The polls opened at 8 o'clock this morning and will close at 8 o'clock this evening.

## THE SULLIVAN CREDITORS.

San Francisco, Jan. 9.—The San Francisco mining stock brokers who are creditors of L. M. Sullivan Trust company of Goldfield, at a meeting yesterday afternoon, ratified the agreement arrived at to accept dollar for dollar in stock to be placed in escrow in a bank as security for payment of their claims. The State Bank & Trust company of Goldfield, it is said, however, is more exacting and insists upon the stock four times the amount of indebtedness.

The State Bank & Trust company of Goldfield, it is said, however, is more exacting and insists upon the stock four times the amount of indebtedness.

## ON WALKER LAKE RESERVE.

New Mining Camp is Taking on a Lively Appearance.

Dutch Creek, Walker Lake Reserve, Nev., Jan. 9.—This new mining camp, which is being developed in Esmeralda county, is just recovering from the effects of a hurricane which prostrated most of the tents and buildings by great gusts of wind. The structures now being built are all comfortable and some are quite substantial, including a large lodging house. Several business establishments are being well patronized, and a number of stock brokers have already entered the field.

## DUTCH CREEK.

Dutch Creek is connected with the Tonopah and Goldfield railroad at the Walker Lake reserve, and the Tonopah and Goldfield railroad at the Walker Lake reserve, and the Tonopah and Goldfield railroad at the Walker Lake reserve.

## TINTIC'S NEW SMELTER.

President Nibley Visits Los Angeles and Sees Railroad Officials.

There is apparently nothing new regarding the smelter which is to be erected at Tintic, says the Enquirer Reporter, but as near as we have been able to learn the officers of the company which was organized to put up this plant are hard at work on the many details which have to be worked out before the plans are made public. Mr. Nibley, the president of the company, is now in California and we understand that his trip there was for the purpose of conferring with the officials of the San Pedro railway, regarding matters in connection with the new smelter. It is highly probable that the smelter will not only build a smelter but a railroad, most likely an electric road, for handling the ore from the mines of Tintic. There is a spur of the San Pedro extending from Silver City to what is known as Ruby Hollow and as it is not being used at the present time Mr. Nibley will try to purchase this spur and extend the line to the Beck Tunnel and other mines in the same neighborhood and possibly to the iron deposits in East Tintic. It is not known whether electricity or steam will be the motive power for the new road but there is every reason to believe that it will be built and controlled by the company that has been organized to erect the smelter.

## CHURN DRILLS AT ELY.

Prospecting With Them at Boston Ely Property Begun.

Two No. 5 Keystone Churn drills have arrived at the freight yards in Ely City for the Boston Ely Copper company, says the White Pine News. They will be installed next week and active operations then are looked for on the company's ground. Later on, when the development of those mines has progressed to a satisfactory point, it is probable that one or both of the drills will be used on the Ely-Rochelle claims. S. Herbert Williams, of Boston, who is interested in the development of the Boston-Ely and Ely-Rochelle com-

## CONFIDENCE IN SULLIVAN.

Goldfield People Inclined to Believe Company Will Clear Itself.

(Special to the "News.")

Goldfield, Nevada, Jan. 9.—Despite the fact that an attachment for \$44,000 has been levied on the Sullivan Trust company at the instance of James Deagan, a San Francisco broker, and the office and books are now in charge of deputy sheriffs, business men here believe the company will pay out its debts. Mr. L. M. Sullivan states that the concern is able to pay all debts and still have a large surplus. J. H. Sullivan of the J. H. Sullivan Brokerage company of Goldfield, has taken no action. The announcement that the San Francisco creditors have given Sullivan 60 days to straighten out his affairs, has had the effect of allaying doubts about the distressed concern's ability to get clear of its present entanglements.

## CONCENTRATES.

John T. Hodson and Alex Colthart departed last night for Ely, Nev., on mining business.

The directors of the Utah-Karns Tunneling Machine company held an important meeting yesterday afternoon.

James Brown, one of the publishers of the Greenview, Cal., Times, is in the city from the south. He is on his way to Butte, his former home.

The ore and bullion settlements reported yesterday by McCormick & Company were: Crude ore and concentrates, \$14,000; base bullion, \$80,000.

Walter C. Orem departed last night for Chicago, to be absent several days on mining business. His father, A. J. Orem, will come out to meet him in the Windy City.

Conditions at the Morrison property in Humboldt county, Nev., are reported to be in a most satisfactory shape. The management reports that a car of

The sure Way to Get  
Pure Foods is to order

HUSLER'S  
FLOUR!

and make them your  
self.

ore will reach the local market in a few days.

James A. Pollock, president of the Salt Lake Stock & Mining Exchange, returned from the east this morning. He went as far as St. Louis, where he spent the holidays with his two sons.

Supt. Sutton of the Utah mine of Fish Springs, accompanied by some insurance adjusters, departed for camp again today, the latter going to investigate the cause of the late conflagration and to arrive at an estimate of the company's loss.

According to the director of the mint, Nevada produced \$11,000,000 worth of gold in 1906, and stands to produce \$20,000,000 this year. Such an addition to the money supply, with the other gold streams from Alaska, California, South Dakota, Colorado and Montana, means more stimulation of business and higher prices. Six years ago Nevada produced only one-tenth as much gold as it will produce this year.

## INFLUENZA IN NEW YORK.

Spreading Rapidly, Almost Reaching The Epidemic Stage.

New York, Jan. 9.—Influenza is almost epidemic in this city. Within the last 10 days it has spread rapidly. Physicians generally believe that the unreasonable weather which has prevailed of late has helped to spread the disease.

Reports tabulated yesterday in the health department's bureau of vital statistics show that last week the deaths in this city from influenza rose from 8 to 32 in the week ending Dec. 29. That influenza invariably increases the mortality from bronchial troubles is again demonstrated by the fact that the deaths attributed to bronchitis last week numbered 35 against 28 for the preceding week and five deaths from pneumonia and bronchial pneumonia increased from 22 in the week ending Dec. 22 to 33 last week. The disease is particularly prevalent in Brooklyn.

Physicians of large practice said yesterday that the death reports show only a small part of suffering from the disease because only a small percentage of those afflicted with it die.

## EMBEZZLER ANDERSON.

Term of Imprisonment Reduced to Two Years and Four Months.

Kansas City, Jan. 9.—The sentence of William C. Anderson, the embezzling assistant paying teller of the First National bank, was today reduced by Judge Wofford in the criminal court from four years to two years and nine months. Anderson will be taken to the penitentiary today to begin serving his sentence.

Anderson confessed to embezzling \$9,000. He disappeared on Dec. 1 and three weeks later was arrested in Texas. Most of the stolen money was recovered, and Anderson desisted over his home to cover the balance. Anderson pleaded guilty 10 days ago. Later in an effort to get a reduction of his sentence, his attorneys alleged that his mind had become affected and that he was ill when he stole the money.

## TODAY'S MONEY MARKET.

New York, Jan. 9.—Money on call, firm, 2 @ 9 per cent; ruling rate, 7; closing bid, 1; offered at 2 per cent; 60 days, 60 at 90 days, 6 per cent bid; six months, 6 per cent.
