

FINISH COURSE IN ENGINEERING.

Four Students of University of Utah Get Their Degrees.

FIELD WORK IS COMPLETED.

Yat in Sixteen Hour Shifts in Bingham Canyon Before Reaching Graduation Point.

Four students of the University of Utah were today granted their degrees for completing the course in engineering. They were all but through when the commencement exercises were held in June, but they were not allowed to participate in the mediaeval pageant then performed, for the reason that a summer's surveying in the field still remained to be done. Today they returned from a long siege of work in the field and in the mines of Bingham underground, and bronzed and hardened claimed their degrees from their alma mater. The sheep skins are not theirs yet, however, as they were made out without the date being inserted. This will be placed in at once, the date of completing the work being used instead of the date of the commencement of the class to which they belonged. Their diplomas will be mailed to them this week, and that will be all the commencement they will see.

The graduates are A. W. Farnsworth, A. Z. Richards, S. B. Smith, and W. R. Travers. They left in an engineering party to experiment with transit and chain June 3, right after the close of school work. In the party were 14 other engineers of the junior and sophomore class, under the personal charge of Assistant Prof. Wm. E. Wilson, in charge of surveying at the University. Their destination was Bingham canyon, and once there they settled down to mining life in a log cabin, and took their meals at a regular miners' boarding house. At 7 o'clock in the morning their daily routine was to assemble for breakfast, and at 7:30 they took their departure for the field. The boarding-house lady required their presence at dinner at 6:30 o'clock, and this hour marked the closing of their field work. Then, after dinner they worked at office matters, completing the reports of their field work until 10 o'clock, when they retired. The day's work was 16 hours long, all of which they "put in" for nothing and paid their board, while a little later they will do the same work on eight hour shifts, and refuse to work a minute over-time without a wage of extra pay.

The party worked in groups of three, alternating as transit and head and rear chainmen. They did the underground work in the U. S. Galena mine and in the upper U. S. mine. The members of the party were H. J. Barnes, R. J. Bonnerot, W. R. Brighton, A. C. Boye, Thos. Bluffs, W. W. Cannon, W. Farnsworth, D. Gardner, J. Garber, R. W. Gray, M. R. Lewis, A. Z. Richards, W. Sharp, A. P. Sherman, S. B. Smith, M. J. Snow, W. R. Travers and J. A. Ute.

ON THE OTHER SIDE.

White Star Steamship Republic Arrives at Queenstown.

A telegram received at the office of the First Presidency yesterday afternoon, announces the arrival at Queenstown at 7:15 p. m. of the White Star steamship Republic, en route to Liverpool. Aboard this vessel were the following: Edwin B. Harper, Albert Wagstaff, C. C. Dahlquist, Provost, Andrew Stephenson, Holden, N. C. Jensen, Spring City, Charles W. Whitaker, Kanosh, Alexander Nibley, Salt Lake; Henry Bolan, Ogden, J. P. Nibley and wife, Logan, and other Utah and Idaho passengers. Mr. and Mrs. Nibley are on their wedding tour, and will spend the summer in Great Britain and Continental Europe.

WORKS COLORADO GRAFT.

Here is a Man Who Should be Handed Over to the Police.

If a man calls at your house with a hard luck story about a sick miner friend who needs some clothes, it is time to ring for the patrol wagon. Instead of dealing out the absent husband's extra trousers or perhaps that suit he never did look just right in, the destination of the clothes is the second hand store, and the fellow who has the sick miner friend is being told the story for many months from door to door, and making good wages from the old clothes dealer.

Yesterday he happened to call at a house he had made a haul at a few weeks previous, and met the same lady at the door. She listened to the same old story with a different result, however, for she turned him away, and noticed as he went down the street that he picked up a large bag of clothes, and a later investigation proved their destination to be the second hand store.

ANOTHER GRAFTER.

This One Sells Lots on the Reservation For Ten Dollars.

A smooth grafter is at work among Italians, offering for sale lots in the Uinta reservation, according to the claims of Joseph Ruffati, a member of the local Italian colony. He states that he was approached by a fellow Italian laborer who wanted to know what a bargain figure was on Uinta lands. On being questioned, the Italian exclaimed that he had a man who had approached him, offering to sell at \$10 and up choice lots in the reservation. He gave deeds and receipts for the cash to the purchaser, and was an American, probably 30 years of age. The man has not returned to check his sale, although Ruffati had an appointment with him. Ruffati explained to the other Italian that he was the victim of a grafter, and that no lands could be sold at this time.

"RED" WAS DOUSED.

Got Good Ducking for Stepping on Big Gong at "No. Two."

"Red" Morrison, electrician of the fire department, was given pretty warm reception at No. 2 station yesterday. It was warm at first, but it got cooler as the various events came off. "Red" always did think it a good joke to "hit the gong" every time he

visited "two," and when he was at the station yesterday, he did as usual. He knew that some of "the boys" would take after him, and he ran into Capt. Wilson's room and locked the door. Some one threw a rope to him and he climbed out of the window and slipped around the back way. There is where "Red" was captured.

AMUSEMENTS.

"The Great Diamond Robbery" succeeded "Northern Lights" as the play of the Bitter company at the Grand last night. The play took well with a fair sized audience and was frequently applauded. It was an attempt at a national drama that falls slightly below "Northern Lights" in effectiveness, but it still retains a power to catch the audience. This is the twelfth play the Bitter company has put on, and the semi-weekly change of bill is beginning to tell on the finish of each performance. It may be a query as to whether better drama would not result from a well chosen repertoire in which the company was better perfect, played in an easy going spirit. Even the popular priced audience might appreciate the finer points of the craft. "The Great Diamond Robbery" remains the bill till the end of the week, including the usual Saturday matinee.

There's a reason.

COWBOY SCOTT AND HIS WEALTH.

Believed he Rediscovered Breyfogle Mine Which Made First Owner Lush.

COLD THERE IN ABUNDANCE.

Scott's Train Deal and What He Paid For it—Spends Money With a Free Hand.

Los Angeles.—That Walter Scott, the cowboy who has been throwing gold about at a rapid rate, really has a gold mine is beyond question, and it is believed he found the old Breyfogle mine one day when he was herding cattle. Breyfogle went crazy on finding the rich outcrop. The gold is there and in abundance.

At that time Scott did not know much about gold. He found some of the stuff and put it in his pocket. Later he showed it to some of the other cowpunchers and they told him that it was good gold. Then he went with the Wild West show and drew from Buffalo Bill a big salary. After he left the Wild West show money was not so plentiful and Scott thought of his gold and he headed for the wilds.

About eight years ago Scott packed out his first burro load of ore from it. He got back to New York and started up a banker, whom he put in charge of the show business and started in to raise money on the mine so that he could put up a stamp mill and other machinery. This banker is his present partner. President Gilard of the Chamber of Commerce bank in New York.

GOT THE MONEY.

Gilard invited the man of mystery over to his club, the Knickerbocker, and before the conference was finished Scott had \$12,000 in cash to go back to California with. Scott calls the mine the "Knickerbocker group" in honor of Gilard's club.

WAS IN A HURRY.

It was not long ago that the man of mystery was in New York and got in a hurry to come back to California. He wanted to see his wife and the regular train did not start soon enough for him so he chartered a special and came through on the Santa Fe to Daguerre. Then he took a notion to go over to his mine before coming to Los Angeles, where his wife lives. A little later he turned up at Los Angeles with \$120,000 in greenbacks. Mrs. Scott was very glad to see him, but when he threw down, about \$175,000 and told her he was going to set up for a while she was very uncomfortable with all the money.

SANTA FE DEAL.

On July 5 Scott went to the Santa Fe office and offered to pay \$20 a minute on the time of a special train to Chicago. He said he wanted to establish a world's record on transcontinental time. He was offered a special consisting of a Pullman car for \$4,000, or with a dining car, \$5,000. He took the higher offer. Then he went to Burdett, where he was waiting for the railway official to receive a telegram from Scott at Burdett saying:

"Will pay you \$500 for the special if you will engage to make the trip in 14 hours. I will pay you \$20 for every minute you clip off that time, you to forfeit \$20 a minute for every minute you exceed the 14 hours."

A reply was sent to Scott that every cent he would be pledged to make the trip in 14 hours, but no guarantee could be made. If steam and steel would hang together in that time or less, he would be covered in the risk of his life and rivets standing the terrific strain and the railway that of landing its equipment safely. The company thought the chances were about equal.

A REAL SHEEP THEIF.

Utah Man Brought From Missouri Deal Business on a Big Scale.

If the allegations against one Mat Cochran are true, he has appropriated about all the sheep in Salt Lake county.

This morning he was arraigned before Judge Diehl on the charge of embezzling 255 sheep, valued at \$768, from Elmer Samuelson. This is only one charge, but the prosecuting attorney announced that there were two other charges.

complaints to be filed, and to which the accused would have to plead. One case involves about 1,400 head of sheep. It is charged that Cochran turned the sheep over to a second party who sold some, changed the brands on others, and butchered a large number.

The accused declined to plead, adding that he be given until next Tuesday. His bail was fixed in the sum of \$2,000. Cochran is the man who fled to Missouri and was brought back a few days ago by Deputy Sheriff Andrew Smith, Jr.

THE NEW ROCKEFELLER INSTITUTE FOR MEDICAL RESEARCH

The immense building shown in the cut is the great laboratory for medical experimentation which has been founded by John D. Rockefeller in the city of New York. It occupies a very extensive site along the East river from Sixty-fourth to Sixty-seventh street and is rapidly approaching completion. It is built upon the spot where once stood the mansion of Governor De Witt Clinton. All medical men are looking forward with great interest to the completion of the work and the opening of the institute. The building will cost \$125,000, and Mr. Rockefeller has endowed the undertaking with the munificent sum of \$1,500,000.
