

ITS INITIAL DIVIDEND.

The Grand Central Puts One in the Sum of 12 1/2 Cents a Share.

HORN SILVER WILL PAY THIS MONTH.

Rich Ore from the Washington Mine—How much will it pay on the Exchange—Marketmen.

What is said to be the best mine in Utah today, to say nothing of its standing among those of the State, is the Washington mine. The first dividend, this morning, in the sum of 12 1/2 cents a share, or \$1.25 a share, was paid by the Grand Central directors at their monthly meeting in Provo, the board deciding that on July 1st, the 15th day, the amount mentioned should be distributed among the shareholders of the mine. While during this the corporation placed to the credit of its cash account a similar sum, which will be added upon month by month as dividends are paid up on top of the share.

To say that the Grand Central commences dividend payments under favorable auspices, is but setting it mildly. It seems that the qualifying adjective "wonderful" would be far preferable and entirely justified. This is so from the lips of Manager Lewis, who is quoted as saying during the present month the mine will have paid out \$100,000 in dividends, and the same amount will be added upon month by month as dividends are paid up on top of the share. The mine is now producing a total of \$115,000 with the mine's development yet in its infancy and its cash account fully loaded. Thus far the mine has paid out \$100,000 in dividends, and the same amount will be added upon month by month as dividends are paid up on top of the share.

Horn Silver Will Pay.

The latter part of the present month, the Horn Silver mine, which has been previously mentioned, declares its second dividend of 12 1/2 cents a share, which will find its way to the shareholders of the mine. The mine is now producing a total of \$115,000 with the mine's development yet in its infancy and its cash account fully loaded. Thus far the mine has paid out \$100,000 in dividends, and the same amount will be added upon month by month as dividends are paid up on top of the share.

THE WASHINGTON MINE.

Rich Sample Shows It to be a Profitable Producer of High Grade Ore.

Mr. Farnsworth came in from the Washington mine near Provo, last evening, bearing with him a sample of the ore of which that property is a producer. Mr. Farnsworth says the mine is producing a total of \$115,000 with the mine's development yet in its infancy and its cash account fully loaded. Thus far the mine has paid out \$100,000 in dividends, and the same amount will be added upon month by month as dividends are paid up on top of the share.

John P. Nielsen, of Hyrum.

who owned a six-seventh interest in the Copper King mining claim in Blackfoot, Idaho, has been killed by a fall from a horse. He was riding his horse down the hill when he fell. He was killed by a fall from a horse. He was riding his horse down the hill when he fell.

BOWEN'S SLACK ON 'CHANGE.

Sales of Copper-Martin, Mammoth, Northern Light, Sacramento and Dalton. Business was somewhat slack in the pit of the exchange today, but despite this fact the proceedings were not without interest, the brokers having their share about them and doing all that could be done to make of the call a profitable one. In the main, there were fairly steady sales, but it was with Copper-Martin that the trading was most active. This stock was firm around yesterday's figure and made a slight advance of 1/4 cent a share, with a closing of \$1.75 recorded. Mammoth was much weaker and sold at \$1.75. Dalton was in good demand at better prices, but not much change, being at \$1.75. Northern Light was still weak and made transfers at 44 cents, while Sacramento was on the decline and sold at 42 cents.

Pending stocks included, the look-

ers found but one miner and that Delton, the stock changing hands in 1/4 of an hour. During attention to these securities, the announcement that Grand Central had declared its first dividend brought out applause, while the stock was quoted at \$1.25 and \$1.25 asked. Sacramento continued firm as did also Copper King, Swansea and South Mountain.

The closing figures were as follows:

THE LA SAL MINES.

Utah's Copper Region seems to be thriving and economically developed.

Sunday's Denver Post contains a lengthy correspondence from Clara, Utah, in which Grand Valley and its possibilities are very fully described. The correspondent says, among other things, that the La Sal mines are twenty-four miles east of Moab. In that district considerable developments are being made and prospectors are strong but over a wide extent of its territory.

Utah's Divided Factions.

The Sunday Post of Denver says that Colorado has more divided factions among its mines than any of the other States. The La Sal mines are divided into two factions, one of which is the La Sal mines and the other is the La Sal mines.

Copper-Martin Cynical.

The second number of cynicism received by the Copper-Martin mine, says the Denver Post, is a letter from a man who says that the mine is producing a total of \$115,000 with the mine's development yet in its infancy and its cash account fully loaded.

Dips and Spurs.

After a day's hard work, the Northern Light company will leave the stock exchange today, as it is meeting on the 10th.

During the present year, the stock

exchange has received \$175,000 from the sale of stock. The La Sal mines are producing a total of \$115,000 with the mine's development yet in its infancy and its cash account fully loaded.
