

WATERTOWN, N. Y., June 4.—Mr. Wheeler, whose vitality had been decreasing slowly through the past six years, retained his vigor up to perhaps six months ago, and from that date he failed rapidly. He was tortured terribly by insomnia and neuralgia, and was also afflicted with catarrh of the bladder. On the night of the third of March last he was seized with a chill, followed by a sinking spell, and then by fever, and for hours his physicians thought him dying. He never fully rallied from that attack and his mind and body wasted away together. There has probably been softening of the brain, and for weeks he was irrational. This brain affection was the immediate cause of death. There is

UNIVERSAL SORROW

among the people. Flags are at half-mast and emblems of mourning are displayed. The funeral will be held at 1 p. m. on Tuesday, June 7th, at the Congregational church, with a sermon by the pastor, to whom Wheeler had been almost a second father. President Cleveland has been apprised of his death and the time of the funeral. Ex-President Hayes sent a telegram of condolence and signified his intention to be present at the funeral.

CHICAGO, June 5.—The following crop summary will appear in this week's issue of the *Farmer's Review*: Continued rains throughout many portions of the west since the last issue have wrought a general improvement in conditions, especially in spring crops, meadows and pastures. Harvest has already commenced in southern winter wheat sections and this crop is nearly past all danger. Our reports on its condition are as follows:

Eighteen counties in Illinois report an average condition of 87 per cent.; ten counties report injury from drouth and insects; seventeen counties in Indiana report an average condition of 85 per cent.; five counties report injury by insects; fifteen counties in Ohio report an average condition of 76 per cent. and some damage by insects; nine Michigan counties report an average condition of 80 per cent. with some injury from drouth and some from insects; seventeen Missouri counties give an average condition of 96 per cent., and ten counties in Kentucky report an average condition of 87 per cent. There is a very general complaint of insects doing injury. Four Iowa counties report an average condition of 97 per cent., and ten counties in Wisconsin give an average condition of 76 per cent.
