**DESTRUCTION OF ARIZONA CITY.**  
The Colorado has risen so high as to  
back up the Gila and flood the country,  
and cause the entire destruction of Ariz-  
ona City. Only the stores of Hooper  
and Hinton, and their dwellings, are  
standing uninjured. On the Fort Yuma  
road the flood made complete wreck of  
the old Overland Mail Company's quar-  
ters. The loss by the destruction of the  
Quartermaster's stores is \$300,000.

## By Telegraph.

St. Louis, 2.  
A Fort Leavenworth telegram states  
that there had been 12 cases of cholera  
and 7 deaths, up to the 22nd ult., at  
Fort Lyon.

New York, 3.  
One hundred Garibaldians appeared  
on the papal frontiers, but were driven  
off by the Italians.

London, 3.  
An Athens dispatch says the Greek  
Government has announced its deter-  
mination to declare war against the  
Sublime Porte on the 1st of September,  
should hostilities against Christians in  
Candia not cease by that time; military  
preparations are being made for such a  
contingency.

New Orleans, 3.  
Mass meetings are being held all over  
Alabama, under the direction of the  
Republican executive committee, and  
the blacks are registered largely in ma-  
jority in the State.

Constantinople, 2.  
Dispatches from Omar Pasha, dated  
July 18, at Sphakia, state that the whole  
district of Sphakia, except 8 villages, is  
in the hands of Imperial troops; the  
only resource left to the insurgents was  
to take refuge in the rocky, narrow val-  
leys of Samaria.

New York, 5.  
A Fort Harker special says the in-  
dians killed seven men yesterday, six  
miles from here; the men killed were  
railroad laborers; after scalping two  
men, the savages proceeded to Big Creek  
stage station and ran off 20 head of hor-  
ses and mules; this was done in day-  
light, and while exposed to the fire of  
50 infantry and a dozen stage employes,  
300 yards from them; it is considered  
the boldest dash the Indians have made.  
Capt. Ames started immediately in pur-  
suit and overtook the Indians last night,  
but found them too many to attack with  
his force, and sent back for reinforce-  
ment, which were forwarded.

Key West, Florida, 3.  
Everything is ready to lay the cable  
to Cuba, and paying out began to-day.  
The line will be opened about the 15th  
of August.

New York, 5.  
A Tribune special says the old story  
of the resignation of Stanton is being  
revived, and this time there seems to be  
great foundation for it. The President's  
contemplated removal of Sheridan is  
opposed by Stanton and Grant. The  
President stated last week that he  
would remove Stanton first and then  
Sheridan. Some doubt is expressed as  
to the President's power to remove a  
Cabinet officer, under the tenure of office  
law. The President's friends say that,  
if he cannot make Stanton resign, he  
will suspend him until the meeting of  
Congress. The whole matter has been  
the subject of much talk here within  
the last 24 hours, it not having become  
known until then that there really was  
a quarrel between the President and  
Stanton. Gen. Grant had several inter-  
views during the week with the Presi-  
dent and Stanton, on the proposed re-  
moval of Sheridan. It is said that  
Grant construes the reconstruction act  
to place on him a part of the responsi-  
bility for its faithful execution by the  
officers under him and under his com-  
mand, hence his opposition to Sheri-  
dan's removal; when consulted by the  
President, he gave his opinion that in  
no one could he place more trust than  
in Sheridan.

DR. BIGELOW, in his "Modern In-  
quiries," makes the subjoined sensible  
suggestion regarding the studies of the  
young: "It has always appeared to me  
that a desirable and profitable mode  
of school education would be one in  
which every hour of study should be  
offset by another of exercise, required  
to be taken in the open air." The time  
will come when this recommendation  
will be practically adopted in all city  
schools.

**DR. HALL ON LONG LIFE.**—The best  
educated communities are the longest  
lived, and the best educated soldiers  
live amazingly longer than the more  
ignorant, and seemed to wear a charm-  
ed life, not so much against bullet and  
bayonet as against the effects of disease  
—or even severe wounds on their con-  
stitutions and lives.

**HAY IN NEW HAMPSHIRE.**—Horse  
teams from Boston have been loading  
at Stratham and North Hampton lately,  
at thirty-five and forty dollars a ton for  
loose hay taken from the barn. They  
draw loads of a couple of tons over New-  
buryport bridge, and then reload, tak-  
ing about five tons per load into Boston,  
each bringing \$300 or so.

A RESIDENT OF De Witt county, Tex-  
as, gives a gloomy account of the times  
in that section of the State. He says  
that stock cattle are selling at three  
dollars a head; cotton, ginned, baled at  
the gin, ten cents, and that land is at a  
nominal price.

**CANNING FRUIT.**—The season for  
putting up fruit has arrived, and the  
women folks will now be busy laying  
up their winter supply. This "canning"  
fruit has become as much a necessity of  
American housewifery as curing hay is  
of husbandry. But quite frequently  
the work is ill done, owing to inex-  
perience mostly, and the fruit is found  
to be spoiled when the season for  
which it was intended has arrived. A  
Lady of Oswego, New York, who has  
had much experience and uniform suc-  
cess in preserving fruit, gives her  
method as follows:

"I will suppose your fruit and glass  
cans are all ready. I prefer cans with  
glass covers. I scald the fruit in a  
large tin pan with juice or water to cover  
it. Put half a teacup of cold water  
into every can, and fill up with hot  
water; put the covers and rubbers also  
into hot water. Now empty the can  
and fill up with the hot fruit, and then  
another. Let them stand open till the  
hand can be held upon them without  
burning. As soon as filled, cut writing  
paper the size of the can, one for each,  
and when cool slip one over the fruit  
entirely, and fill up the can on top of  
the paper with boiling juice, and seal  
at once. Ladies, try this way; the fruit  
will never mould, and will keep any  
time, if you don't eat it. The paper  
keeps the fruit from rising to the top of  
the liquid. There is no use of setting  
the cans into water to heat them; or of  
putting them into quilted bags; it is too  
troublesome. I let the fruit shrink,  
and then fill up to the cover as close as  
possible. Ladies must be governed by  
their own common sense. Men attempt  
to give directions, but their wives have  
to tell them, and then they are likely  
to forget."

**RAILROAD EXTENSION.**—The Pacific  
Railroad managers design to commence  
in three weeks from the present time  
the work of laying track at Coburn's  
Station, a point 20 miles beyond Cisco.  
for this purpose they are employing all  
the teams they can procure to haul some  
3,000 tons of iron across the summit  
from Cisco. The track is nearly graded  
from Coburn's Station for a distance of  
25 miles, to a point two and a half miles  
beyond the State line. This section of  
the road will be laid and in running  
order by the time the section across the  
summit, between Cisco and Coburn's  
Station, is, so that when the last named  
section is completed the locomotive will  
go 45 miles beyond Cisco, or 138 miles  
from Sacramento. This will be ac-  
complished, it is expected, by Novem-  
ber next. One locomotive and the ma-  
terial for ten platform cars have already  
been sent to Coburn's Station, and they  
are now being put together at that  
point, to be used in the construction of  
the track. The iron work only of the  
cars was sent from this side—the lumber  
of the mountains being used in their  
construction.—[Sacramento Union.]
