

Friday, March 17, 1882.

FLOATING FRAGMENTS.

False fire alarm last night.

This is St. Patrick's day in the morning.

March did not come in like a lion, but it came in like a lamb.

All persons are forbidden to take sand or gravel from the premises of A. Keyser. See advt.

C. R. R. Superintendent John Sharp, Esq., is expected from the East to-morrow night.

Mr. Elias Morris has received a large order for plaster of Paris to be used on the Logan Temple.

Twilight brother Isaac Groo will deliver a lecture in the 9th Ward school house. Subject Liberty and Individualism.

The breath of spring transformed the mud on the streets into dust, by a dash of winter it is again retained in aqueous solution.

Business in the police court is very quiet. No arrests occurred last night. The rougher element appears to be on its best behavior.

Another pile of snow commenced to fall in the lap of spring last night. The flakes have been descending during most of to-day.

Two Fort Steele soldiers had a fight the other day. One of them, named Kane, was stabbed and is now in the hospital in a critical condition.

A piece of linen cloth dipped in turpentine and wrapped around the neck which a soft corn is situated will give relief, and after a few days the corn will disappear.

The booksellers say that the demand for the revised New Testament has entirely ceased, while that for the old time edition is the same as ever. This is as was expected.

A scientific writer says the climate of this country is unobscured by changing. In view of the weather of the past two days we conclude that to a certain extent, he is correct.

S. L. Adams & Co., of the Grand Union Copper Mine, will have their furnace ready for operation in a few days. It is now located at a spring in this city. We wish them success.—St. George Union.

That burglar capture at Ogden was a good one. Judging from the implements he carried he is no apprentice. It is to be hoped that the rest of the gang will soon be put where they can do the least harm.

Work is being done on the Brigham canal, preparatory to the irrigation season. The repairs are being done on contracts, and all interested should step up and shoulder their portion of the responsibility.

There is an exhibition in New York of a boy who can shoot with electricity. He gives people a shock every time they touch his hand; but then there are plenty of boys in this city who give people a shock every time they open their mouths.

For general purposes on the farm, kerosene oil with a little kerosene added is the best lubricator and preservative. For saws, mowers, bugles, etc., it furnishes more body and less gum than most oil. The amount of kerosene must be governed by the purpose for which it is designed.

On Tuesday a well-dressed man rushed into a gun store on Blake street, Denver, threw down a handful of money, and said: "I want a gun that would shoot to kill. The clerk learned he wanted to slay himself, and wouldn't sell the stranger a weapon. The intending suicide left to hunt another gun store, where the clerk was not so ceremonious.

Mr. Miln says he will not believe anything he does not understand; but he knows this is not true. He believes, because he has seen it, that a society belle can dance all night in a pair of shoes two sizes too small for her and with her body crushed between corsets drawn to two points by a mechanical power—yet he cannot understand it.—Ex.

LOCAL AND OTHER MATTERS.

Wedded.—Yesterday, A. H. Caine, son of Hon. John T. Caine, and Miss Maggie Mitchell, daughter of F. A. Mitchell, Esq., were united in marriage. They are an intelligent and interesting couple. We congratulate, and extend our best wishes.

Again Troublesome.—We regret that Judge Poyer is again suffering considerable pain in the same part of his face upon which an operation was performed a short time ago. Since then a tumorous substance has reformed, and will probably have to be removed by the same process.

From the South.—Bishop A. A. Kimball and Brother Watts, of Kansas, Millard Co., are in town. When they left home, a week ago, the people were preparing to put in their spring grain. If the present storm stretches down that way that proceeding will be delayed.

The Alarm.—The alarm of fire yesterday evening, owing to the velocity of the wind at the time, was a cause of considerable apprehension. Happily no harm resulted as the flames were confined to dead grass in the northern suburbs of the city, near the Bath House. The cause was sparks from the railroad locomotive. The firemen started out but were met on the way and returned on learning the nature of the blaze.

Don't Feel to Want It.—Water-master Wilcken has about come to the conclusion that very few people propose to irrigate next summer, owing to the meagre number of applications that have been filed. We suppose the orchardists feel a good deal like people generally do after eating a hearty dinner—as if they never wanted anything to eat any more. There is plenty of moisture and to spare just now.

Wouldn't be Surprised.—Last night a large number of young people called at the residence of a well known citizen in the central part of the city for the purpose of giving him a surprise. He positively refused to be astonished, and kept them out in the cold for nearly half an hour, when they dispersed, disgusted if not surprised themselves. We should think they would not try to get up an amusement party in honor of that man any more.

NOTICE.

The Stake Superintendents of the Y. M. M. I. A. will please take notice that full and complete statistical reports of their associations are required for the General Conference, and should be sent in time to reach this city before April 4th. If any of them lack blanks, they may be procured at the Contributor office. The Superintendents are requested to be energetic in making up their reports, and are invited to attend the young men's meeting, to be held during conference, the date to be hereafter named.

W. WOODRUFF, General Superintendent.

Returned Missionary.—This

morning we received a call from Elder Wm. Beesley, of Provo, who returned last night from a mission to the Southern States. He left here on the 12th of last July, and proceeded to Tennessee, but had been there but a short time when he was taken ill with chills and fever, from which he suffered more or less during the whole time of his absence. He kept on laboring in the ministry, however, to the best of his ability till November. He and his fellow missionaries met with much opposition occasionally. On several occasions, houses where they lodged were surrounded by masked men, whom however, they succeeded in evading. At one time when on the way to fill an appointment for meeting, they learned that a number of men were in the schoolhouse armed with pistols in waiting for them. Not considering it necessary to expose themselves to danger they did not go to the meeting.

Later, Beesley has been visiting relations and friends in Indiana and Pennsylvania, where he had an opportunity of explaining the principles of the gospel to numbers of people. He regretted that the condition of his health necessitated his release thus early.

Home Decorative Art.—Wm. C.

Morris, painter, has nearly put the finishing touches upon a couple of ceilings in the home of Dr. Cooper, in the Fourteenth Ward. The ornamentation is done in oil, and is beautiful in color and delicate in design, doing great credit to the artist.

Oil decorations executed by hand, when done by a genuine artist, are far better than the higher classes of paper ornamentations. The first cost of the former is necessarily higher, but they last so much longer that this consideration is overbalanced by that fact. They also retain their freshness, by simple cleaning, for an almost indefinite period. Besides, home artistic talent should be encouraged.

Considering the comparatively wide range of Mr. Morris' ability as a house painter, we doubt if he is surpassed, in a general sense, by many men in his line in this country. There are doubtless numbers who excel him in some specialties they follow, but as a general workman he is hard to beat.

Grafting Fruit Trees.—The following

seasonable article appears in "Our Deseret Home," No. 3, of which we have just received:

"The best implements to be used are, a thin backed saw for cutting branches too large for the shears or knife. It should be filed sharp, and set wide for cutting green wood without binding, then a pruning knife and shears for removing small branches. A small wood-mallet for striking the back of the pruning knife in cleft-grafting, also a small wooden wedge to introduce into the opening while the graft is placed in the slit.

It is of the first importance to have the bark come in contact with each other, so that the sap may flow properly. The sections should be thoroughly secured in their places until firmly grown in their setting."

One very good grafting was as follows: Black cherry 7 lbs., Red-bud 7 lbs., Yellow cherry 3 lbs., Tennessee 4 lbs., green 3 lbs. This composition should be sufficient water to be used in grafting, but not hot enough to injure the tissue of the tree. A small brush is used to spread it with.

The proper time for grafting is before the leaves begin to unfold. Grafts can be saved from the trimmings of fine trees and preserved by burying them until wanted."

The Ogden Shooting.—This detail,

as published by the NEWS, of the capture of the supposed burglar at Ogden on Wednesday evening are stated by parties who were there when the occurrence took place to be correct, with the exception that the language called for by the Union Pacific side, Mr. St. Clair being agent for that company, and not the Central Pacific.

Speaking of the prisoner, the Ogden Herald says:

"He gave his name as F. S. Tremaine, but he had received letters in the name of Geo. Cole. He says that he has been in the city of Ogden, Oregon. He left there about a year ago, since which time he has been in Idaho, Arizona, etc. He is of dark complexion, 25 years old, and stands about five feet eight inches high and is a 'hard-looking' citizen. He is now in the city jail awaiting an examination. He told our reporter that the value did not belong to him, that he was getting it for another person. He said he had done nothing wrong and appeared quite unconcerned about his arrest and incarceration."

Was He Another?—On Wednesday

night a man who went up from this city with the California excursionists who had purchased a ticket for the Coast, called upon Mr. Snell at Ogden for another ticket; he wished to purchase for a friend of his. Mr. B. demurred unless the party for whom the ticket was intended should appear and sign his own name, according to the usual rule. He left with the intention of finding his friend. Just as the shooting commenced he rushed back to Mr. Snell and said excitedly he had just received word that required his return to Salt Lake City at once, and requested his money back, which was, of course, handed to him. Certain indications combined with the fact that he did not return to the city, have caused it to be surmised that he is a confederate of the man who was arrested at the depot. It is suspected also that the additional ticket was designed for the fellow now in jail.

Ill.—We regret to learn that

Bishop Samuel A. Woolley, of the 9th Ward, has been laid up quite sick for over ten days. The trouble is general debility, caused by too close application to work.

Progressing.—The man who was

injured by an explosion on the Spanish Fork Railroad is progressing favorably. He is now at the Sisters' Hospital in this city. He is a resident of Levan, Utah County. His name is W. Pettit.

Another Alleged Burglar.—The

following special to the NEWS, from Kayaville, was received this afternoon:

"A person giving the name of Emerson was arrested here last night, and taken before U. S. Confor, on complaint in the recent burglary here. The hearing has been set for next Monday at the Court House in Farmington."

The Great Basin Mining Case.—

This celebrated case was ended, at least for the present, in the Third District Court this afternoon, the Jury, after being in their room a short time, finding a verdict for the plaintiff, Mr. James Oggood. The case has occupied the court ever since Monday morning, and has been most ably argued by counsel on either side. The suit was brought by Mr. Oggood to recover possession of a one-fourth interest in what is known as the Great Basin Lode, in Stockton, Tooele Co., now held by Gen. P. E. Connor.

A Young Runaway.—Many of

our citizens have observed the blind organist who regales passing pedestrians with musical strains on the streets. He has been blind for twelve years and came here from Detroit, Michigan, but is a native of Germany.

He called in this morning and informed us that his boy, Charles Albert Miller, who came to Utah with him, ran away from him three months ago, and he has received no tidings of him since, further than that he was seen leaving town with a man on a wagon.

The lad is eleven years old, short and stout, has light hair and blue eyes. His mother, who is now in Detroit, is very ill and would like to hear some tidings of him. Any person sending information concerning the boy to Mr. Paul A. Schettler of this City, will confer a favor on all parties concerned.

Missionary Changes.—The following

is from the *Millennial Star* of February 27th:

Charles F. Wilcox is released from being Traveling Elder in the London Conference, and is appointed Traveling Elder in the Sheffield Conference.

William H. King is released from being Traveling Elder in the Nottingham Conference, and is appointed Traveling Elder in the London Conference. Elders Wilcox and King are expected to proceed to their new fields as soon as practicable.

John Q. Cannon is released from being Traveling Elder in the London Conference, and is appointed Traveling Elder in the Swiss and German Mission, to labor with his brother Abram H. Cannon in Northern Germany, so long as President Alder may deem that course the best. Elder Cannon will leave to join his brother at such time as he and President John Cooper may conclude to be fittest.

Ministry in England.—Elder W.

D. Williams, laboring in the Sheffield Conference, writes to the *Millennial Star*, February 11th:

Baptisms still continue at long intervals in different parts of the Conference. In my course of travel I have baptized seven. A short time ago it was expected 10 more would be added, and with this anticipation President Wm. Cooper and myself walked 10 miles to administer the ordinance of baptism, but the Lord's work is not to be hurried, and he has learned the intended move, and influenced them against their own salvation.

Elder W. N. Apperley, in the London Conference, wrote from Hemel Hempstead, February 16th:

Brother Fowler, of Parowan, has been laboring in this district about three months. His kind words of encouragement are endearing him to the hearts of the Saints. Since he has been here we have baptized two, which makes eight since I last reported.

OUR CONSTITUTION BROKEN.

How often we hear people coughing, hacking and spitting, and yet those who trouble seem to think nothing of it, until some of their friends say to them: "Why, Joshua, Polly, Maria," or whatever their name may be, "how poor you are getting; your cheeks and eyes are sunken, skin looks yellow and do not look like the same person as when I saw you last." Reader, this is all caused by neglect in not breaking up a slight cold as soon as it appears, which can be easily done by purchasing and using a bottle of HALE'S HONEY OF HOREHOUND AND TAR. Only 50 cents and 31 per bottle at all druggists.

THE NEW SPEAKER and all other Speakers and Singers, may have clear ringing voices by using *Dr. Brown's Tar Trochiscs*, a sure cure for sore throat and hoarseness. For sale by all Druggists in Salt Lake and Utah. d & w

WILLIAM JENNINGS & SONS' SPRING ADVERTISEMENT WILL APPEAR IN A FEW DAYS. NEW GOODS ARRIVING DAILY.

ORGANS MEDALS AND TESTIMONIALS VERSUS Organs Without Them.

THE MASON & HAMLIN ORGAN COMPANY HAVE entered into Competition with American and European makers of Organs at all the World's Great Exhibitions with Bitterness and Envy. They have obtained the FIRST PRIZE and HIGHEST DISTINCTION OF DEMONSTRATED SUPERIORITY over all of the Most Celebrated Makers of Organs in Europe and in America. The most eminent Musicians, Organists, Artists and Musical Critics in all countries have declared, in written communications, that these organs are unequalled by any others in the world. The principal musicians in the Territory, recognizing these facts, have purchased the Mason & Hamlin Organs for their own use in preference to all others. There are makers, and they are in the great majority, who never presumed to compete with first-class manufacturers at any of these exhibitions, some of whom now advertise that they "Never exhibited their instruments to compete for premiums" for the reason that "Awards are made the subject of the grossest Misrepresentation and are but a source of jealousy, corruption and falsehood." These charges cannot apply to the Mason & Hamlin Organ Company, because a *fac-simile* of all the medals and diplomas awarded to them, and the certificates of the jurors, are published in the official documents of the directors of each of the World's Expositions, and sent broadcast throughout Europe and America, (copies of which can be obtained at my office). It is not probable that European jurors would have permitted an American firm to carry away evidences of so many victories over their own countrymen, if they could have honestly prevented it. If "management, intrigue and bribery" could have been used to influence the jurors in their decision, who will doubt that the awards would have been retained on the other side of the Atlantic? If, as one firm has the audacity to aver in its own case, the non-competition for awards is to be regarded as good evidence of greater honesty and a higher standard of uprightness in business, and superiority of instruments, then the vast majority of manufacturers are to be congratulated. But for the energy and success of the Mason & Hamlin Organ Company, resulting in the opening of an entrance for American made Organs to the Markets of Europe, these non-competitors and self-proclaimed makers of a superior class of Organs would not to-day have an agency in England. They sailed in under the colors of the Mason & Hamlin Organ Company.
