

MINING, BUSINESS AND STOCKS

INGOT ACTIVE
ON THE EXCHANGE

Mercur Stock Furnished a Feature for the Forenoon Session Of Mining Exchange.

DALY WEST GIVES A SURPRISE.

On Open Board Buyers Paid \$18.50 For It—Eastern Interests Are Active.

Ingots furnished a star feature for the forenoon's call of the mining exchange. The stock was started off with the sale of 8,000 shares at 3 cents; the next lot offered, was taken at a quarter of a cent advance; then came a slight decline, after which the price stiffened and, on the open board, sales were noted at 3½ cents. Mammoth strengthened slightly. New York Bonanza opened weak, but advanced. Com. Mercur remained steady. A surprise was furnished on the open board by Daly West, which sold off at \$18.50 a share. The rise in the slate caused considerable speculation and the talent seems to have been kept guessing. About the only solution offered was that Cincinnati and other interests are bidding up in hopes of getting control. Daly-Juda was offered at \$18.50, with no bids received.

The closing sales and quotations were as follows:

NEW YORK BONANZA.

Indications Favorable for the opening of a good mine.

A Park City Record representative visited the New York Bonanza property this week and was courteously shown through the property by Fremont-Terry Morgan. As a result of the tour we can conscientiously say that according to our best judgment, the most glowing reports from the mine have been in every exaggerated and that the property gives every indication of becoming a big producer. The ore body on the 640-foot level has been driven into for about 22 feet and has widened out from a small streak to a three-foot body, and according to reports received later in the week, is holding out as strong as ever. On the 600 foot the drift east, from the wing shaft, is still considerably strong. The presence of almost pure galena being noted, and this body also grows larger as work progresses. Eighteen men are employed at the mine and the work, though in the nature of prospecting, is being done carefully and well. Several tons of rich ore are to be seen on the surface, piled up in the shafthouse, and a shipment of 100 tons will be made in the near future. The company this week received a check for about \$2,000, for the shipment made last week of a little over 25 tons, the ore being sold on consignment showing 14½ ounces silver, 9.3 per cent lead and \$1.60 in gold per ton. This, with the returns from the shipment to be made soon will be a handsome sum of money for the management in beginning the new year. It has been decided to sink the 700-foot level, 60 feet, as rapidly as possible, so the work will be done sooner or later at any rate. From indications above there is little doubt but that the ore bodies will open up stronger and better when a new level is cut at the 700-foot point. The outlook for the Bonanza is certainly most gratifying and though it is not yet a big producer, it has all the ear marks of becoming one ere long.—Park Record.

GOLDREED DISTRICT.

Prospectors Warned Against Rushing There Till Water Is Developed.

The excitement caused by the sensational reports from the scene of the recent great discoveries in the Keweenaw range is unabated, says the Tonopah Miner. Notwithstanding the warning to the public in regard to the scarcity of water and the difficulty of finding it, miners have continued to stampede into the new district continually and from present indications there will be a population of two or three thousand at Goldfield by spring.

Ralph Wardle, superintendent of the Goldfield Mining company, came in from the new district last Saturday and returned Tuesday. Mr. Wardle furnished the reports of the wonderful richness of the mineral found on the copper claim, and expresses the belief that the Goldfield district will rival Goldfield, but he emphatically repeats the warning to the public against rushing into the country before wells are developed.

The company had to leave the country before the public could learn of the discovery, and the miners who had come to the new district were compelled to go back to their old homes. The miners who had come to the new district were compelled to go back to their old homes.

Manager A. L. Jacobs of the Butler-Liberal Mining company yesterday afternoon drew down the proceeds from a shipment of 90 tons of ore, from which was realized the sum of \$1,865.35, or a little more than \$18 per ton, above mining, transportation and smelting charges. The ore showed the presence of 6 per cent copper, 12 ounces in silver, with a grade of 20 per cent iron exceeding 10%.

Bonds were steady at noon.

Realizing in the Pacifics and the steady draw of Copper offset the effect of a rise in Lead to \$3.50. Not much effect was made on the zinc stocks, which fell away on slight offerings.

The increase in the price of Zinc, Lead and Silver is due to the fact that the market moved up again later. Union Pacific reached the top. Smelting was heavily bought at a gain of 2½. New York and London declined, pointing to a slight transitory fall in Union Pacific and a rise of a point in Southern Pacific stiffened prices. The yielding of Copper to 7½ had a sympathetic effect on the whole.
