CURB CLOSE.

Promising Fair Business Ahead. The week opened this morning as if it intends to make a good run for the next few days. A handsome total was chalked up and a wide variety of stocks came in for attention. Colorado Mining is a star among the stars, now selling at prices ranging between \$3.30 and \$3.35. Uncle Sam is bracing ap; Lower Mammoth is strong and May Day sells well around 29. The tintics are favor-ites and it is believed will enjoy a live-ly week. The forenoon sales, totals and closing quotations follow:

Ground to Scott Hill Property. Scott Hill, near Park City, is to be the scene of unusual activity during the coming summer. The Iowa Copper Min-ing company has added two claims to

coming summer. The lowa Copper Min-ing company has added two claims to its holdings. The purchase price is said to have been close to \$33,000. A. M. Spooner, manager and secretary of the company, says the new ground offers all sorts of possibilities. A greatly in-creased working force will be on the ground early next month. Development is to be carried on under the direction of George Hall, one of the best known mining men in Utah. A tunnel already in 300 feet has paralleled the vein for the total distance and at several points has opened stringers of ore going as hig as \$250 per ton. These values rep-resented gold, silver and coppor returns. A cross-cut was run from the tunnel and the whole face of this is in ore, Although work has been carried ahead in seven feet of mineral, the footwall has not been reached yet. The Scott HUI mere the creduction to the several

has not been reached yet. The Scott Hill group-the one just purchased-ad-joins the lowa Copper group and is be-ing worked by an able company, the ground is expected to yield big and SMELTERS TOO SMALL.

Although \$3,000,000 was spent to make the smelters at Garfield large enough to handle such business as might come to them, it is now reported that important and extensive alterations and additions

and extensive alterations and additions are necessary already. Another million is to be spent in enlarging the convert-ing end of the plant. The present ca-pacity of the mammoth plant is 1,200 tons per day, but this will be more than doubled. The Utah Copper and Boston Con, have not started shipping, as they are going to do in a short time, so the changes must be made without a mo-men's delay. Work will be rushed to have the smelters ready by fall. The manner in which mines are opening up throughout the intermountain region indicates that smelters capable of han-ding all products will have to be built upon such idans as never dreamed of upon such plans as never dreamed of before.
