

All Sixteen Stamps Are Dropping Continuously on Fine Ore.

MANAGER MADSEN RETURNS

September Will be Record Breaker For Production-Company Indebtedness Will be Paid in 90 Days.

Manager P. W. Madsen of the Century of Park Valley returned from the property last evening and brought with him a gold brick worth over \$3,000 and news of most gratifying conditions at the property.

The 16-stamp mill of which only 13 stamps have been operated for several weeks is again running full blast and on a quality of ore that insures the company of gold bullion worth between \$10,000 and \$12,000, as a result of this month's run. "Everything at the property is encouraging," said Mr. Madsen today, "and we will be out of debt within 60 or 90 days at the most. The mill is running at full capacity with an abundance of water obtainable. There is plenty of ore to run the mill for two years, while we are spending between \$1,000 and \$1,500, a month in prospecting and opening up the property. at present over \$2,000 in concentrates at the mill and our receipts this month should easily reach \$10,000. The company is steadily wiping out its in-

Judge Powers Says Property is Proving Up Big.

When seen this morning Judge Pow-When seen this morning Judge Pow-ers stated that the Orient mine in West Tintic is showing up big. "We have drifted," he stated, "along the strike of the vein on the 140 level a distance of 150 feet and have blocked out a great quantity of cyaniding gold ores. Drift-ing to the vein on the 200 level will be commenced in a few days. The ore, of which nearly 12,000 tons is exposed, will run between \$7 and \$11 in values."

"It is our policy to develop the prop erty until we have 40,000 or 50,000 ton of ore blocked out. If we get that, early in the spring we will put up a cyaniding plant for its treatment. The ore is an admirable cyaniding product and similar to the Mercur ores.

THE SUNSHINE MILL.

Manager Moore Has Gone East to Meet Associates.

Manager George Moore of the Sun-shine has gone east to confer with as-sociates in the enterprise. The delib-erations are expected to result in an enlargement of the mill to a 300-ton daily expected plane. Tests on Mr daily capacity plant. Tests on Mr. Moore's filter press are reported to have been so successful that an equipment of them will probably be put in the en-larged plant.
