PROF. BARNABUS AIRSHIP.

PROF. BARNARD'S ARRSHIP.

The problem of steering an airship has at leat been netwed, according to the accounts given of an ascension from the Technesses exposition grounds of Pipheson Barnard in his new belloos. The professor is the director of the Young Mea's Christian assentiation at Nashville, Team. For years, it is eatly the has been wisting on his simplify, and on the 7th of May he informed the directors of the exposition that he was prepared to make a trial trip. On a given signal he raw from the earth. There was a rong wind and the ship was headed against it. Twelve miles from the city the problems that he misoritoned breaking the mechinary, and descended by the warth again. On the evening of May 14 another sign was made without ancident, the vessel at thing a speed of twalve miles in fairly more than the control of the propole arrangement, by mount of writes the control of a good in the a kind of the propole arrangement, by mount of writes the college. The cold control is 1,100.

The great importance of the inverse, the control of the propole of the figure of the propole of the colour of the propole of the control of the control of the control of the propole of the control of the control of the propole of the control of th

case of accident, free from danger. The total cost is \$1,000.

The great importance of the invention, supposing the reperts are correct, in not that Professor flarmard has a perfectly constructed affectly, but that he has demonstrated by principle upon which faither experiments can be made. And it is principle upon which faither experiments can be made. And it is principle upon which faither experiments can be made. And it is principled to a second action practically of marine that as soon as the practicability of marine that as soon to the processor of the properties of the proper

TREES FOR PROFIT.

is any a landowner in the country diletricis in Unia would have been much bedien off than he is today if he had taken the actives given iswenty. Every season are considered with a little display of energy; and many young men who are land owners now and think the advice is not offered to be a season of the landowners of a century that they have made a mistake. All along the history of Ulais, and perfectively at the period reserved in another quarter of a century that they have made a mistake. All along the history of Ulais, and perfectively at the period reserved in the counsel was given by leading men for people to plant force and hardwood frees—those varieties where wood was valuable when the fronks had attained a good was. Of course such trees are of slaw growth, and while the solfer and more quickly growing less were plantacly, because it seems love as the result shows that another course would have been more profitable.

An illustration of this is given in the experience of Charles E. Whitting, an lown farmer who planted with now stand from fifty to skriy test high and are regarded as sunoing the most provided in the most profitable in vestiment on his farm. He planted in beins, and has about seventions acres of timber allogation, the farm is the plantad in beins, and has about seventions acres of timber allogation, the farm being large. He was a filtered \$15,000 for the trees, in addition to which he says. "The tax exemption less for the first leng years and the use I keep and of the large, the was a filtered \$15,000 for the trees, in addition to which he says." The tax exemption less for the first leng years and the use I keep and of the large. He was a filtered \$15,000 for the trees, in addition to which he says. "The tax exemption less for the first leng years and the use I keep and of the large. He was a filtered \$15,000 for the trees, in addition to which he says." The tax exemption less for the first leng years and the use of the says of the says of the says of the says of the says

prenting is that tests of timber about the rows with, with five or at heat between rows and thirty to thirty-six inches apart in rows, do the heat for finiter rawths, and at the same time give the best service as protection to the fields.

"OLICE PERSPICUITY.

The police of Calence have done some excellent work in securing a reputation for more than eritinary seasons and one case of the control of t same, when a mairton at the Critoaco bridewill wrote that there was it the prison a woman and weiging the description in the offering the prison a woman of weiging the certificion in the diversiment. It was the missing wanne. On the westing of May 0 she halt essentiation by an utilizer. She into docome bowlifered and wandered at lade, gatting way from the neighborhood of her residence. When found also was surreamble by a growly of children who were hooting at her, the could not take to them nor to the efficer, and he sent her to the staining the careful for. The thought has the could not take to them nor to the charge for. The thought had been not be deaded for. The thought had been not be deaded for. The thought had been not be drunk, put the charge against her of drunk and dherdeely. Then he sent her the self. In the marring wome court was called Miss. Nellis sittle could not take, and hence must sill be drunk. He appeared to be freedees, the silless explained, and as if a safe seam her, so they gave the justice the usual soury absent a simple drunk fund on the streets health as a simple drunk fund on the streets he produced for the first was been missed and a simple drunk fund on the streets helpings of the siller of the first was brought in, for they never connected it with the "Mary Doe," the helpines woman they had not been the self-counter of the way had been not be one consoned to helpings woman they had not have the health they had become as accommend the helpines woman they had not have the surely had not been the self-countered to with the specific or the patient of a similar character have been made. In the Nellie case, the prison efficient in which the "Mary Doe," the helpines woman they had not have the health they allowed bor to remain without an eight for her release, heagh they are the surely had not have conflicted in presente in them had not made conflicted in price and the notion of the treets being a residue of the street had not make conflicted in presente as then in the paid of the countr

The New Ostal que et Moust Haiy the notings, Mass, for 19657, just leading, contains sensition 1, pointers, the test minimum sealest pointers in the test minimum sealest methods with the test minimum seasons and the test most. There are 132 similarly excluded, if when his are senours, 5 justice, 54 septembers and 10 level from Toron and neutro, 54 the selection, There are 123 being the rises and neutro, 54 the selection and seatons. There are 123 being the rises and seasons are 124 being the rises and neutro, 54 the seasons are seasons and the minimum of the seasons are the seasons a again and it is not assisting.
