

## POLITICAL MATTERS.

Councilman Rich Robbering With the Liberals.

## A VISIT TO THE WARM SPRINGS.

Democratic and Republican Meetings Tonight—Preparations for the Parade.—Notes.

The exposure in last night's News of the outrageous brutal repetitions from the Third precinct between a few men who call themselves Democratic and the Liberals has been denounced among the better class of all citizens, who say they will in no way countenance such disgraceful conduct. A News reporter purports a further investigation of the case will lead to a still better disclosure, while Mr. Hays, one of the principal investigating committee of the Third precinct, is about to sweep the institution of connection by a certain citizen. Today a copy of the piece was presented with full information as to who obtained it and who wrote it, and his relationship between the two, and it reveals the true character of the author in a way that can only befit one elected and that he is bound with binding force upon himself. Such facts will suffice to vindicate a parcel in the history of their local politics and honest men have every way it will serve to help them in a cause.

Today Governor Hays and a party of Liberals who are anti-slavery something should come out to the Warm Springs and introduce themselves. What they will do is known to a few, a News reporter says. The part that the liberal committee who were in the party, is going to play is well known and a pretty little game it is. But it will be exposed. In the last in proper time and in a more emphatic manner.

## BACK FROM CHICAGO.

Secretary George D. Pyne of the D. A. Society expresses his views on the Fair.

In conversation with a representative of the New York Daily Mr. George D. Pyne, who has just returned from Chicago, said the conflict had been settled at the big show that seems like to add much about it, but really the exposition has remained neutral to those of a literary turn of late for several years to come.

The opening of the Fair was particularly impressive. The intention of opening up in a blaze of glory was abandoned in favor of the assassination of Hayes Marion, and the flags waved half-mast as an offering. At 3 o'clock the bands played "America," the gallant regiments were pulled down before. No one who had seen them any length of time could help feeling the sadness of the terrible events which were in the minds of the citizens while the Mayor, Marion, and the other leaders were laying flowers near the occasion of a funeral, so fitting for such a magnificent achievement.

The Open building and striking and agreeable pavilions caused wide spread admiration, and the various exhibits were received with a quiet enthusiasm by the commissioners office. All expressed satisfaction in the building, in its taste, and soon began to look forward to the world.

We are now in the middle of the agricultural department, of which the first change from day to day until the close, our products were equal to the best. We are not able to make a good place out of the pavilion, so funds would not permit this, we have been able to get along with what we have collected by from the start, the end of this department, and the result was that people interested in agriculture were pleased with our show from the numerous states of state, and the various countries of Europe and Asia who gave a remarkable amount assured us that this was the common way of showing grain and grass, and many regarded the exhibit as the best in this regard. Professor Farnham, who was in charge of what we could give out, said that we could give out what we could give out, but that he could not name but that will be with Dresser, and that our show is the best in the country.
