

EDITORIAL NOTES.

Dr. Holland's salary as editor of *Scribner's Monthly* is \$7,500 per year. It will be continued as long as he is willing to occupy that position.

Washington Territory can boast of only 75,000 inhabitants, yet hopes to be admitted into the Union before the close of Gen. Garfield's administration.

Nordenskjold intends starting out on a new Arctic expedition early next year in a new vessel which is now in course of construction for him at the estuary of the Lena.

The total population of the Territory of Idaho, according to the last census, is: 32,611; males, 21,818; females, 10,793; native, 22,629; foreign, 9,982; white, 29,011; colored, 3,600.

Franklin, in Cache Valley, is no longer a city. The charter has been repealed by a bill introduced into the Legislature by Mr. Webster, which the Governor signed, although it was the work of a member from Oneida County.

A new French appliance is an electric brake, which is made to operate on the wheel brake by means of electricity generated during the motion of the train, and applied at pleasure. Experiments thus far made with this apparatus have been entirely successful.

The rare phenomenon of an inverted rainbow was observed at a Prussian town on the morning of November 25th. The ends of the semicircle, the centre of which was the sun, rose and moved westward with the latter for some thirty minutes, when the appearance vanished.

The Wisconsin Legislature will shortly grapple with the subject of female suffrage. A resolution amending the constitution so as to allow women to vote was passed by the present Legislature, the people will vote on it, and it is believed by many more or less well informed persons that the measure, if submitted to a popular vote, will be carried.

The New York Board of Health has done a judicious thing in adopting an ordinance which inflicts a penalty of \$250, and a possible six months imprisonment in the penitentiary, upon all individuals issuing invitations to the funerals of persons who have died of contagious diseases. Physicians of high standing have expressed their convictions that diphtheria, scarlet fever and smallpox have lately been propagated by that means.

The schoolboys in Paris are being formed into battalions of 600, divided into four companies. They are armed with a light rifle, manufactured expressly for them, with sword bayonet, and are uniformed with trousers, blouse, and Scotch bonnet. They are drilled once a week, and execute various military manoeuvres once a month. There are now 23,000 young soldiers enrolled, aged from 11 to 13 years.

The effective of the standing army in France for the present year has been fixed at 498,000 men, of whom nearly 53,000 belong to the Algerian forces. The total is divided as follows: 4,174 men for staff service, 3,122 unattached, 2,670 unclassified in other corps, 283,563 in the infantry, 68,758 in the cavalry, 68,762 in the artillery, 11,005 sappers, 11,630 in the train, 18,025 in the commissariat service, and 26,459 gendarmes. There are 26,968 officers, 121,914 non-commissioned officers, and 349,615 rank and file.

A gentleman in Pennsylvania gives the following testimony to the efficacy of salt in cases of freezing: "I got a toe 'nipped,' as it is called, and remembering to have learned that salt is good for frost, I made a strong brine cold and soaked my foot in it for half an hour in the morning, after it had pained me all night. It has never pained or itched since, though it is still tender. The same remedy was afterwards tried with several children who were complaining of frosted feet, with entire success."

A big improvement has taken place in the English money order system, and a plan has been adopted which might be imitated in this country with great advantage. Every money order office in the kingdom is supplied with the new postal orders, which are a printed check, each having on its face a specific amount in plain letters. The checks are of various denominations and

fractions, so that almost any amount likely to be wanted can be obtained. The purchaser calls for a check of the denomination he wants, pays for it, and the transaction is done with. The price of the money orders has been reduced about one-third. This system saves to the applicant the trouble and delay of filling out a blank application and then waiting his turn, in a crowd perhaps, to reach the pigeon-hole through which the orders are supplied. This is our system, and in large cities there is no hour of the day, perhaps, when there are not more applicants for money orders than can be accommodated with dispatch.
