

DESERET EVENING NEWS.

TRUTH AND LIBERTY

Vol. II.

SALT LAKE CITY, TUESDAY EVENING, DECEMBER 22, 1898

No. 27

BREVITIES.

Chignons can be hired by the month in Paris.

About one million postage stamps of various denominations, are daily used in the United States.

A velocipede salesroom and evening riding school has been opened at 933 Broadway, New York.

The Pope has a navy of thirteen vessels. Its principal cruising ground is in the Holy See.

Rev. Newman Hall says that thirty thousand members are excommunicated yearly from the English Church for insincerity.

The *Independence* of Brussels, circulates more largely in Paris than any French paper, except the *Patrie*, is very rich, and pays its editors \$50,000 a year.

A Yankee clergyman, in urging his congregation to contribute in aid of the poor whites of the South, said the Scriptures commanded us to do good to those who hate us.

From 1492 to 1848 the world's yield was \$2,261,000,000 of gold, and \$5,678,000,000 of silver; from 1853 to 1888, \$3,379,000,000 gold and \$2,194,000,000 silver.

A Texas paper, says the eggs of the cotton worm are deposited in the cotton stalks, and that if the latter are gathered and burnt during the fall and winter the eggs will be destroyed and immunity from the worm secured.

A New York paper states that in consequence of his well-known amiability and adaptability Mr. Horace Greeley is to be raised to the as-they-appear under the title of Lord Disagreeable.

There are at present no less than 1,000 ladies in St. Petersburg engaged in the highly remunerative art of fortune telling. The highest circles of society furnish the votaries to these priestesses.

A spendthrift—one who has laid treasure aside for the purchase of regret and repentance.

When may a man be said to make a record in the book of fate? When he turns over a new leaf in his own life.

Allice Carey's "Lines to an Early Swallow" have been so much admired that she intends writing a companion poem to be entitled "Owed for a late supper."

A patent has been taken out for improvements in ladies' muffs. Ladies' muffs are fast young men, assuredly, and the patent is therefore much needed.

Mrs. Polly Kent, aged 81 years, recently walked from her residence, in Sturbridge, Massachusetts, to North Spencer, a distance of 15 miles, in five hours and a half.

The number of children registered as attendants at the public schools in the city of New York is 230,000, the daily average attendance at the evening schools is 20,000.

On Thanksgiving day in Dover, N. H., the Methodists, Free Will Baptist, Baptists and Congregationalists worshipped together. Four congregations were able to get into one church—owing to the weather.

"Do you mean to say there is cholera of any kind in this city, sir?" asked an indignant New Orleanser of a stranger. "Yes, I do."

"Then sir, I must say that your belief is but a phantom of your imagination!"

"Very well, then, that's the cholera in phantom, isn't it?"

A cigar machine is the latest patented novelty. It is capable, with ordinary labor, of doing the work of six or eight hands, turning out about 2,000 cigars a day. It performs all the operations of cutting the leaf, bunching, binding, wrapping, heading, and completing, by a continuous process.

A Vermont one expressed his opinion of a person in the following style of classic:

"I could take the little end of nothing, whittle it to a point, punch out the pith of a horse-hair, and put in forty thousand such souls as his, shake them up, and they would rattle."

The word genius is not found in the Bible. In Shakespeare it appears seven times, and then in the sense of a guardian spirit—somewhat like the fairies and genies of the "Arabian Nights." Shakespeare employs the word talent fourteen times, and always in reference to a standard of money value. In "Timon of Athens" it is found ten times.

Dr. Barton, being in company with Dr. Nash, who had just been printing two heavy folios on the antiquities of Worcestershire, remarked that the publication was deficient in several respects, adding, "Pray, doctor are you not a justifier of the peace?" "I am," replied Nash. "Then," said Barton, "I advise you to send your work to the house of correction."

The Ogdensburg *Journal* is responsible for the following: Some of the youngsters in this city have made the discovery that every good, large, plump field cricket is the abiding place of a small, living snake, about as large in circumference as an ordinary knitting needle, and from five to seven inches long. By pulling off the head of the cricket it may be taken out alive. Some are light colored and some are dark brown, and if placed in a bottle of water will live twenty-four hours. Here is an item for naturalists. Every youngster is after the crickets for the purpose of dissecting them to see the snake. The discovery was first made by observing in a clothes press a couple of these snakes and some crickets. One of these crickets was killed, when the third snake squirmed out of his body.
