SENATE PASSES POWDER BILL

Only Enough for 24 Hours Work Can be Stored.

RECEIVES UNANIMOUS VOTE

Johnson Introduces Measure Requiring Saloons to be Closed at Midnight—Other Bills.

The work of the senate yesterday afternoon was concentrated in the passing of three bills and the introduction of three new ones. Barrett's bill No. 3, relating to the storage of gunpowder in mines, was passed unanimously, without even a comment. This measure provides for the storing of sufficient powder in the mine to meet the requirements of 24 hours work, and provides for a heavy penalty for the man who stores any more than that. The bill was defeated last Friday by Senator A. B. Lewis because it fixed the amount of powder at 48 hour supply, and nine of the senators were in favor of it. When the measure was recalled and again taken under consideration by the joint committee, Senator Lewis and others succeeded in converting every member to the 24 hour proposition. It was predicted last Friday that Lewis had indulged himself in some idle badgering and his work would be undone when all the senators got together, on the bill. But he carried his point apparently with little trouble.

IN INTEREST OF HARMONY.

The senate first took action on Lawrence's bill No. 57, which allows the council to waive action on an ordinance or resolution that the mayor has vetoed, for one week. This is to give the council and mayor opportunity to confer and make any necessary amendments. It also allows the mayor to single out any one item in an ordinance or a resolution to veto.

Senator Love said the bill "promises to get the mayor and council of Salt Lake into harmony, let us have the bill by all means."

Senate bill No. 58 was passed unanimously. It enforces a 30-day limit against sidewalk personal injury claims and a year's limit against other personal injury claims brought against a city.

Senate bill No. 16, relating to the payment of bounties on wild game, was passed. The measure amends the law so as to avoid the duplication of rewards on mountain lion, bear and other big game.

The committee on mines and minerals reported adversely on Senator Barnes' bill relating to noxious fumes rising from smelters. The report was adopted.

The committee on public health returned a favorable report on Bamberger's bill regulating the practice of osteopathy.

The pure food bill by Senator Love was reported by the committee without any alterations except that the labeling requirement was eliminated. The bill provides that the analysis of the food and dairy commissioner must be looked to for the enforcement of the law.

Resolution by Lawrence forbidding the introduction of new bills after two weeks from next Monday, without the consent of a two-thirds majority, was adopted.

THREE NEW BILLS.

The three new measures introduced were as follows:

S. B. 81, by Johnson—Amending section 1250 of the revised statutes so as to make it a misdemeanor for any saloon to keep open or sell liquor between midnight and 6 a. m., under penalty of a fine of \$300 or less or six months' imprisonment, or both fine and imprisonment.

S. B. 82, by Lawrence—Revising the statute creating the office of ball commissioner, establishing the office of ball commissioner without the consent of the city council, and authorizing the commissioner to receive fines when the judge of the city court is not in session.

S. B. 83, by Lawrence—Authorizing a change of venue from a city court under similar conditions such as may be obtained from a district court, and also authorizing litigants to submit cases by agreement to a city court judge pro tempore, who must be a lawyer admitted to the bar, said judge pro tempore will hear and decide the case, and when otherwise stipulated, the same to be assessed as costs against the losing litigant.

Tendency of the Times.

The tendency of medical science is toward preventive measures. The best thought of the world is being given to the subject. It is easier and better to prevent than to cure. It has been fully demonstrated that pneumonia, one of the most dangerous diseases that medical men have to contend with, can be prevented by the use of Chamberlain's Cough Remedy. Pneumonia always results from a cold or from an attack of influenza (grip), and it has been observed that this remedy counteracts any tendency of pneumonia to develop. This has been fully proven in many thousands of cases in which this remedy has been used during the great prevalence of colds and grip in recent years. It can be relied upon with implicit confidence. Pneumonia often results from a slight cold when no danger is apprehended until it is suddenly discovered that there is fever and difficulty in breathing and pains in the chest, then it is announced that the patient has pneumonia. Be on the safe side and take Chamberlain's Cough Remedy as soon as the cold is contracted. It always cures. For sale by all druggists.
