Tintic-East Lilly Improvements tary, had employed him to purchase the O'Hara stock or act as an expert for Brandl, and he declined to say whether the Coalition people had rec-ommended him to employ W. I. Snyder as his attorney; in fact, he declined to auswer every question put to him Eureak, Nov. 6 .- Some time ago the Colorado company shipped a carlbad answer every question put to him which would, in any way, connect the Coalition people with the efforts to ob-tain a list of Consolidated stockholders. of one which vielded over \$22,000. It In answer to a question the witness re-plied that his refusal to answer the questions put to him was not because they would tend to incriminate him. It was shown that Brandl had never before sought an inspection of the books and that Edmunds had never be-fore numbered stool, through Arma fore purchased stock through Arm-strong, and that he had never before employed Snyder as an attorney. The could would not compet Edmunds to answer, but suggested that an action in the nature of a bill of discovery might be brought against him, and up, on this suggestion a continuance was granted on motion of defendant's attorneys to permit them to institute proceedings to compel Edmunds to divulge his connection with the Coalition in-terests.

ARRANGING FOR MILL.

George Z. Edwards Down from Can-

Mr. George Z. Edwards, returned and George Z. Edwards, returned from Soldier, Blaine County, Idaho, 12 miles north of where, in the Little Smokey Mining District, is situated the Cannon Ball Consolidated Min-ing and Milling company's holdings, over which he is now in charge. A number of prominent business men in this city are interacted in this in this city are interested in this property which has been systemati-cally developed during the past year and upon which a five 300-pound stamp mill was erected a few months ago for demonstration purposes. Mr. Edwards now arranging for the instal-lation of a mill of ergasity to treat lation of a mill of capacity to treat 50 tons per day. The vein is a fissure in Granite, the Granite being micacous and the vein over three to five feet in thickness. The ores carry about \$13 a ton in gold.

CONDITIONS AT ALTA.

dated Mine.

Alta, where he found conditions quite satisfactory both at the Columbus and South Columbus mines. In the former, a large body of shipping ore has been developed recently. This resource is located on the 400 level and has been followed for all of 50 feet.

SENT SOARING New York, Nov. 7.-A flood of buying orders which had poured in on brokers during the night sent prices soaring on the stock exchange today and brought scenes of activity on the floor, the like of which had not been witnessed in many months, So strong was the bullish sentiment that in some instances prices jumped upward points at a time on single sales. The readiness with which purchases were made at the advanced figures indicated that many buying orders had been placed practically without limitations in price. New York Central rose a

points on a few purchases and United States Steel by short spurts forced itself up to 5512, the highest price over touched by that stock. Many other prominent stocks rose 1 and 2 points over last night's closing. There was no definite single piece of news to account for the extreme activity, but

over last night's closing. There was no definite single piece of news to ac-count for the extreme activity, but speculation apparently was stimuated by reports from all sections of the country of receipts of large orders by manufacturers, of rapid expansion in wholesale and retain lines and that large numbers of workers are being re-employed. The big advance in New York Cen-tral was attributed in part to a rumor current to the effect that E. H. Har-riman soon is to become a factor in the control of that system. Neither confirmation nor denial of this report was to be had today. The animated trading continued un-til the close though considerable sell-ing to realize profits developed in the closing hour. As a result of the <u>Fains</u> in some of the prominent stocks were wheld out but the substantial advances in some shares remained to the end Prices were working upward again when the closing gong put an end to the trading for the week. There was continued very active de-mand for stocks when the market open-ed today which carried prices sharply upwards. A large number of the Ac-tive stocks rose a point. Great North-ern Ore Certificates gained 135. Read-ing 1% and New York Central and American Smelting 14. The demand embraced a large number of stocks not usually active in the market, and dealings showed great variety and ani-mation. Eager buying continued on a large vances of from 1 to 3 points in the principal stocks. The sensational jump of 5 points in New York Central and Northeru Pacific did not prevent a gen-real rection which ran to nearly a point. In a few prominent stocks this sold a fraction under last night. Sub-stantial gains remained for most stocks. There were late recovered and Northeru Pacific did not prevent a gen-cral reaction which ran to nearly a point. In a few prominent stocks this sold a fraction under last night. Sub-stantial gains remained for most stocks. There were late recoverees in some cases, notably the Hill stocks and Utah Copper, which jumped 4½. make. Daniels the Tailor

HARRISON IS MUM.

HARRISON IS MCM. Edward H. Harriman was informed by those at his home at Arden, Orange county, this afternoon of the rumor that he was to become an active fac-tor in the management of the New York Contral & Hudson River rall-road, and the price of the stocks had advanced supposedly on the strength of that rumor. He declined to discuss the subject. LIVESTOCK.

At the Eagle and Blue Bell the work is still being car-ried on by leasers, who took out about 12 carloads of ore during the month of October.

KING CONSOLIDATED CASE.

Endeavor to Show King Coalition

Connivance in Brandl Suit. In the district court yesterday, in Judge Lewis' division, the case of Jo-seph Brandl of Park City against the Silver King Consolidated Mining company was given attention for a time and continued for two weeks when it will be brought up for final hearing. Brandl is a shareholder in the defendant company and was denied th fendant company and was defined the privilege of examining the books of the latter in company with J. W. Edmunds, an expert accountant. The denial was based on the belief that the examina-tion sought was in the interest of the Silver King Coalition Mines company, against which the Silver King Consoli-tated Walner, company, has brought dated Mining company has brought suits to recover damage for the alleged unlawful extraction of about \$1,000,000 worth of ore. substantiate its pleading that the

sought-for examination of its books was in the interests of the Coalition was in the interests of the Coalition company, rather than for any legili-mate purpose on the part of Brandl, or others before him, it was shown by the testimony that two such moves had been made through W. W. Armstrong, who was considered closely connected with the Coalition people. One of these moves was shown to be Armstrong's moves and offer to have an official paper personal effort to have an official repre-sentative of the King Consolidated company supply him with a list of the shareholders, and the other was his effort to have a certificate of one O'Hara, a Coalition employe, trans-ferred to J. W. Edmunds, who, it was shown, had been the expert accountant for the Coalition company, and Kearns and Keith, the chief men in the companies referred to.

When the examination of Edmunds was begun by attorneys for the Con-solidated company, by whom he had been subpoenaed, he was ased if the Coalition people had any interest in the stock purchased by him from O'Hara. He declined to answer. He also declined to answer whether Frank Westcott, the Coalition company's secre-

opened up further. 'The South Columbus mine is looking fine. We are sinking a winze from the old Quincy tunnel level; it is down 50

feet and all sides and bottom are in ore. Copper sulphides are also coming in in the lower tunnel."

COPPER WIRE RISE.

A Boston Copper authority is quoted as saying: "I firmly believe we shall witnes:

18-cent copper before next summer. Our large production at the present time does not disturb me in the least When the railroads begin to electrify the suburban lines, the public will rise up and make a universal demand that all roads shall do the same. We are facing an enormous consumption of copper from the railroads. It is sura to come

ORE AND BULLION.

The ore and bullion settlements re ported late yesterday by McCornick & Company were: crude ore and concen-trates, \$40,000; base bullion, \$75,000.

CONCENTRATES.

M. M. Johnson of the Newhouse staff of engineers is now at the Silver Peak Valcalda property at Blair, Nevada. William Ochs departed today for

Sylcanite, New Mexico, which has een attracting considerable attention of late.

H. H. (Bullfrog) Clark, has gone to Virgin City to give personal attention to the oil drilling operations now in progress there.

Herman C Bellinger, the mining and metallurgical engineer, will leave for Ploche, Nevada, this evening on proessional business.

James McGregor departed for the coast yesterday and will sail in a few days on a journey around the world. He expects to return in about four nonths

The Red Metal Mining company. with property near Schurz, Nevada, will resume development work again a few days. W. J. Craig of this ity is manager.

Word has come from the east that Engineer L. A. Jeffs is in Boston, and that it is feared that he will have to undergo another operation before his lame knee gets all right again.

Courtenay DeKalb of the editorial staff of the Mining & Scientific Press has arrived from San Francisco for the of acquainting himself with local mill and smelter conditions.

Ford W. Correll, president of the Nevada-Superior Mining company op-
