conney, eked out by English which the stale accepted as legal , was not always sufficient for etc of traders in their dealings the state. The government of in the Congo insist on all pixe for carriage as well as the made in Congo cois or sover-al times there is not consigh b comage to be found in Bona form than once the governor of ingo has had to interfere in or-provent a money crisis, and or-

Belgian minit must be busy for a long time to come. Putting the needs of traders aside the \$200,000 or so left in the Congo by King Leopold will hardly be a drop in the backet when the government pay-day comes around. The pay-roll of the Belgian Colonial office is enermous. The department of argiculture employs indives in the public force; 4,600 mi-tures are employed regularity on the rallway works; in the shipyards at Leopaldville alone 500 matives are ca-faged; many thousands are observed on the state vessels and waterways and there are other great departments are employed results.

# LABOR TAX.

From a careful analysis of the Cor o Budget it annea a that 53.41 of the go Budget H appears that 63.44 of the ordinary expenses of the state comis-under the head of what have been called "services from which the blocks derive at least partial utility." Thus "services" are those in which the na-tives work and draw pay the Nation-al Bonudn. for example, the work-ing of which cost the state over \$1.200, 000 in 1206, while the unity were still aboring on it under computation of the labor ins, and paid in kind; the public forse, which costs \$1.100,000 and the naval service, which costs aver \$400, 000.

From the foundation of the state to

From the foundation of the state to need, its total outley exclusive of ex-traordinary expectiture, annumed to trajentation, but this sum over \$42,300,-600 was paid to the mailwas, or ex-pended on warks of immediate beau-it in theory. This was the actual event in cash to the state. The cash was spent in part on trade goods with which to pay wages, but though the money did not remain in the Congo, the state has had to pay that som for the optosep of the colony, and Heisinaria will have similar payments to make in the future. HOW COIN DISAPPEARS.

HOW COIN DISAPPEARS.

atting noises, ears, arms and legs with it. is probable that the fear of the preat drain which would be caused by the continual disappearance of coin from carrency was a cause which led King Leopoid's government for cen-tinue the truck system of payment for as many years. The existence of this danger was proved by the manner in which the natives used the money inde from bruss wire. They bent the midakos into rings and the estanta-tions rick covered themselves with them to such an extend that their integs stretched up to almost twice their ordinary size. SLAVES AS CURRENCY.

thinks crude, as for example, decor-ating noses, cars, arms and legs with

## SLAVES AS CURRENCY.

SLAVES AS CURRENCY. Sinves were the gold standhrd of the natives for years. There was contin-uid dealing in slaves everywhere in the Congo for home use, as well as for export, and by retail, in small por-tions, as well as wholesale. It was a common thing to have live slaves brought to market and sold piecement, limb by limb to different buyers. The white traders who were estiled in sentral Africa before the founda-tion of the Congo State, did not in-ternes with the slave trade, but they set up an abominable money standard of their own, one in witch hottles of sin rock the place of soli. The representative of the Nother-lands explained this, and definited if a the Conference of Berlin. "The side of drive," he said, "was undoubled in the Conference of Berlin. "The side of drive," he said, "was undouble into the way, and were the prin-cipal instruments of the Nother-lands explained the said, "was undouble to the the slave of solin. The conference of Berlin. "The side of drive," he said, "was undouble in the work of exchange in the comes basin. The conference refused to plotterive with the sale of gin, but it is a since been stamped out. NATIVE TRADING.

# NATIVE TRADING.

NATIVE TRADING. Protestant missionaries each to have been the first who sought to raise the natives by means of trade. Tasy acted on the matives' inter of master and traffic. Their plan was that of harter. They opened stores and bar-terest native cloth, beads, breast r.ds, knives and all sories of trade model for-mating materials, food and generally, for whatever the natives had to offi-of value. "A dirty husiness," said Mes-fination functions, who silv R p.ac-tised in the commencement, "but one the natives themselves thereaughty en-

and largely, and dazaling profits were drawn from dealings in truck and by means of the brais wire carrency. These dealings were never dec are 1 be imposed on the matives, that their tasks are bealties in which they are carrency. These dealings companies, the kneat, another are bealties in which they are are another there are bealties in which they are are another the tasks, that in might be as low as \$1.90 a year, and that it should never be trading companies, the Kneat, amount of a grounces inct, in 1906.
The profits of one of the independent to the provide explained, in the off field publications of the state, that he payments the tasks the tasks, writing from the Congo is the independent for work into the matives" by loriting functions of the state, that he last weak of the matives are of the matives are the congo of the independent for work into the matives" by loriting functions of the state, that he last weak of the field publications of the state disconcertes and others. The state are working from the congo of the finder and the state of the foreign coersenter and the last year of the foreign coersenter the task of the foreign to construct the statements of the Belgian was compared being there does not the statements of the Belgian state was obligatory on the natives are at as the payment, or reward to them was made to kind. The aystem was changed in 1906, when it is an one matter and the to coup.

their labor. From this plan there doe veloped the famous Congo system, En-der it to using passed hands until presently Labor was obligatory on the natives as a tax; the payment, or ro-ward to them was made in kind. The aystem was changed in 1906, when it
