MINING, BUSINESS AND STOCKS.

ABOVE TWENTY MILLION MARK.

Number of Shares Sold on Stoc Exchange During Year.

SOLD FOR $11,609,401.30.

The Record of Year Shows an Immense Volume of Business Transacted.

When Secy. J. A. Shorten balanced up his books, at the close of this morning's regular call of the Salt Lake stock and mining exchange, he found that during the year just ending the amount of business transacted on the floor of the stock exchange amounted to the grand total of 20,308,534 shares, which were sold for the great sum of $11,609,401.30.

April lead all other months in the volume of business done, the records showing that 2,925,260 shares were transferred, which brought $1,561,320.95. March was the next highest with 2,925,260 shares, sold for $1,570,505.27; January was a close third with 2,059,223 shares transferred, for which was paid $1,091,045. February lined up as fourth on the list in the number of shares sold, but was outdone by September and October in the amount of money called into exchange by the transactions in the pit. The dull months were June and July, which is most always the case on account of the heated weather. During June 765,839 shares were sold for $423,330.95. In July 858,960 shares brought $908,513.30.

The sales for the present month, December, were 1,816,493 shares; which brought $731,389.75.

LAST CALL OF YEAR.

The members of the Salt Lake Stock and Mining Exchange closed up the year's business this forenoon. Only one call was held today; when that ended, with the exception of a few who remained to participate in the open board transactions, the operators were ready to lay aside their cares and start in the New Year with a fresh set of resolutions.

The market was in better tone than yesterday. The first seller of the day was Ajax, which awakened from its sleep and 100 shares were picked up at 23½ cents. Carisa seemed inclined to end the year in active form and 1,800 shares of that stock changed hands. Daly-West, Daly-Judge and Silver King, the big Park City bonanzas, did not participate in the sales of the regular call. Ingot was the next in line and 500 shares were dropped at 10¼ cents. Wabash kept at stationary figures; the prices of yesterday prevailing. California was in some demand, 5,100 shares transferring.

Tomorrow being a holiday no call will be held. The next session will begin at the usual hour Friday morning.

ACTIVITY AT ELY, NEVADA.

McKinley Company Wants the Ely Cyanide Plant.

MAKING A SERIES OF TESTS

To Determine Best Method for Treatment of Ores—Outlook for Camp Was Never Brighter.

Late arirvals from the camp of Ely, Nev., are hopeful of a very active season next year.

Among the big properties in that section of the sage brush state is that of the McKinley Mining and Smelting company, of which W. N. McGill, a prominent business man of that place, is manager. For some months past this mine has been undergoing a systematic course of development with the result that some very large bodies of low grade gold ores have been exposed. The mine is now in shape, it is said, for some sort of a reduction plant; but which kind, is a matter that the management is now trying to work out. The company proposes to profit by the misfortunes of others in this instance and before going to the expense of a costly plant, as a neighbor to the McKinley did, the Chamman company, and which has never been of service to that property.

Manager McGill proposes to execute a series of tests with the ore and is endeavoring to get a lease on the cyanide plant, owned by the Ely Mining & Milling company, located at that place.

The local directors of the latter company are not disposed to do this. However, they would be willing to sell the property at a reasonable figure. It is possible that a deal of this kind may be fixed up; but the McKinley folks on the other hand are not quite so sure that they want to go to this expense until they are more positive that the plant can be used to advantage.

The Ely plant is very complete in every respect and the Ely directors are confident that it will save the values contained in the McKinley ores successfully.

The new smelting plant of the New York & Nevada Copper company which is now in course of construction will be ready to "blow in" early in the year. This mine is considered to be one of the best copper propositions in the west.

It is not improbable that the Eureka & Palisade railroad will be exteded into camp this summer, a distance of 90 miles. All of which will contribute to making the camp livelier.

BREEZY NEWS FROM TINTIC.

Bullion-Beck Powder Fire Attributed to Carelessness

Special Correspondence.

Eureka, Juab Co., Dec. 31.—The powder magazine at the Bullion-Beck mine took fire this morning and burnt for some time without doing but slight damage. The miners in the mine at the time made their escape through the Gemini mine. The origin of the blaze is attributed to the carelessness of some miner who probably went away leaving a lighted candle near the explosive.

Work is being done on the Black Jack mine at Diamond. The property adjoins the White Cloud mine, owned by Mrs. Anna Marks and others, from which some rich samples of silver-lead ore has been taken out. W. J. Beck of Antelope, Ida., is one of the principal owners of the Black Jack and is superintending the work.

On Saturday last City Councilman W. L. Croff left for the Lincoln district in Beaver county to look after some valuable mining interests he has in that section. He owns 14 rich claims which a syndicate headed by W. F. Snyder are after. If the deal is made, and Mr. Croff is assured it will be, he will be $110,000 richer than when he left Eureka. Most of the ground is covered by a United States patent, but Mr. Croff is having a force of men doing the annual assessment work on the claims not so protected.

In the north drift from the 1,000-foot level of the Ajax mine a three-foot ledge of quartz has been struck. To further facilitate the development of the ledge a donkey hoist has been installed and active operations continued.

A contract has been given on the Klondike and Bullion-Hill claims, located near Diamond.

HOPEFUL FOR COPPERS.

General Improvement Looked for in Near Future.

There is certainly a hopeful feeling in the east over copper stocks. The Boston correspondent of James A. Pollock, wired the latter today to that effect, and advised the purchase. The eastern representative looks for a general picking up in coppers right after the dawn of the new year, and anticipates a general improvement all along the line. A more generous metal market is also anticipated; which, naturally, would cause a rallying in stocks.

Other brokers are in receipt of similar advices from the seaboard, so the outlook for the future is encouraging, to say the least.

TOLD BY A COMSTOCKER.

Joe Ryan Marvels at the Great Veins Of Tonopah.

After making a thorough inspection of the great Tonopah mine and neighboring properties, Joe Ryan, for many years a successful operator on the Comstock lode at Virginia City, was asked by a Bonanza reporter to express his opinion of the wonderful Nevada camp. He consented by saying:

"Well, if I was asked to make a report I would feel as though I ought to make it in one word, 'marvelous.' For the length of the Mizpah ledge and its width, together with the great values it carries, I can safely say the like has never been unearthed before. There are many other ledges paralleling the Mizpah, which certainly makes the permanency of Tonopah for many years to come. I believe every shaft being sunk east, west and north of Tonopah will encounter some of these ledges. Mining is a gamble, and no 'sure thing' gambler ever had any capital. Gold and silver is where you find it, and in that game of 'mining gamble' you are bound to win in Tonopah. Indeed your camp is attracting the capital of mining investors throughout the world today, and from what I have seen it is not to be wondered that such is the case. I predict a great future for your camp as soon as power and mills are in operation in Tonopah."

COAL MINING IN STATE OF UTAH.

Inspectsr Thomas Files His Report With the Governor.

INTERESTING STATISTICS.

An Increase of 268,966 Short Tons For the Year—The Daly-West Disaster.

Gomer Thomas, state coal mine inspector, has filed his annual report with Gov. Wells. The report, in addition to coal and coke statistics, gives a detailed account of the results of his investigation of the Daly-West mine disaster, which occurred in July and in which 34 men were killed. The results of his investigation were published in full by the "News" at the time he made his special report on that matter to the governor.

During the year 1902 the report states that 1,641,436 short tons of coal were mined, being an increase of 268,966 short tons over the production of 1901. The value of the coal mined during the year is estimated at $2,500,000. There were 137,765 short tons of coke produced, which is an increase of 87,145 short tons over last year. In addition to the above there were 3,530 tons of gilsonite, 50 tons of ozokerites or mineral wax, and 150 tons of elaterite produced in the state in 1902. The inspector was unable to get the proper data to estimate the amount of asphaltum produced.

There were 2,470 persons employed in and about the coal mines of the state during the year and 100 men in the hydrocarbon mines. The average amount of coal produced to each employe was 665 short tons. The fatalities for every 1,000 men employed was four. There were 327,725 pounds of black powder and 65,635 pounds of giant powder used in the mines of the state during the year.

The report states that the past year has been the most prosperous one in the history of the state in coal mining. The mines are much better ventilated than heretofore and are in a good condition. The work has been steady and the wages good. Neither capital nor labor has suffered from contentions during the year, and the relations of the employer and employed have been harmonious. Much more coal could have been marketed had it not been for the scarcity of railroad cars to transport it to the consumer. The amount of coal which could be mined is practically unlimited, as immense coal fields exist which, owing to their inaccessibility to the railroads, have never been worked and which in time will make Utah second to none in the production of coal.

ANOTHER NEW SHIPPER.

Mountain Lake Mine, Near Brighton, The Lucky One.

The directors of the Mountain Lake mine, near Brighton, in which Senator Rawlins, David Evans, Jesse Knight and a number of others are interested, will soon be enrolled among the steady shippers. This announcement is the result of an important strike of copper ore made in that property recently. A contract has been let to some parties to haul the ore down from the mine to the smelters and as soon as the roads can be put in shape the product will begin to move. Air compressors and machine drills will be installed at once and a very active campaign is to be inaugurated.

The property was taken over by the present owners a little over a year ago; since which time they have been prosecuting development in an unostentious manner. The ledge encountered some time ago is all ore assaying at the start 6 per cent copper, 3 ounces silver and $2 gold. The last 15 feet assayed 13 per cent copper, 4 to 9 ounces silver and $5 gold. A wide tunnel was then driven to the northeast. This is in 40 feet, the last 25 feet being in ore assaying 13 3-10 per cent copper, 7 ounces silver and $4.30 gold. The last 10 feet of this drift, however, runs 14 per cent copper, 9 ounces silver and $10 in gold. The walls of this ledge at this point have not yet been found. Other tunnels have been run, also. One starting below 1,000 feet from the workings just described taps the ledge and the same character of ore is exposed.

The property lies to the southwest of the Great Western mine, which also seems to have a very promising future.

GOING BACK TO OREGON.

The Baby Mine at Grants' Pass, Bonded to C. C. Higgins.

Charles C. Higgins expects to don his working clothes again in a day or so and take his departure for the mountains of Oregon.

Mr. Higgins recently took a bond on the Baby mine, near Grant's Pass. While the name would imply that the property is not of very large proportions the new owner declares such is not the case, but that he had every confidence that it will develop into something above the baby size. Truly, he states, the mine has a wonderful showing and all the development done heretofore was paid for out of the ore extracted from its treasure boxes.

The property was first worked by a man by the name of Pollock and several others who made good wages by operating an arrastra. They worked along in this manner until the pay chute near the surface was worked out and they then ceased operations. For a time, the mine remained idle, but after awhile others took hold and made alternate successes and failures. None of the work was performed systematically, however, which accounted for the irregular production.

The mine has been equipped with a mill and as soon as Mr. Higgins can reach the ground he will prepare to put this plant in order for operation. A force of men is now engaged in blocking out ore preparatory for treatment.

MINES OF PARK VALLEY.

Vein of Good Ore Struck in the Ione Mine.

Manager P. W. Madsen, of the Century and Ione Mining companies, operating in the Park Valley mining district, has received word that a good vein of ore has been cut in the lower tunnel of the latter property which gives promise of opening out into something pretty portentious. While details are yet lacking at the local offices of the company, enough is known to satisfy those about that the cutting of this vein is of considerable consequence. The working force has been increased and two shifts are kept busily engaged.

At the Century the mill is grinding away steadily and doing good work. The four foot vein of ore in the lower tunnel of this property is productive of a good flow of water, which, however, does not serve as a hindrance to operations.

WORK OF SAMPLING MILLS.

The Local Plants Did a Good Business in 1902.

The past year has been a busy one for the sampling works of Salt Lake City. Reports furnished by Manager L. A. Copeland of the Taylor & Brunton works shows that institution to have handled the immense amount of 100,269 tons of ore. From Tintic was received 45,725 tons; from Stockton, 17,514 tons; from Bingham, 17,514 tons; from other camps, 25,196 tons. The Conklin sampler received 30,446 tons, making a total of more than 130,000 tons.

This does not by any means represent the total tonnage of ore sampled in the state for there are many other plants, and besides, considerable ore was shipped out of the state and necessarily had to go through the process of sampling on the outside.

MINING CONCENTRATES.

Manager Holdaway of the Klondyke mine in Beaver county is in from camp. He reoprts that the miners have recently broken into a good vein of ore.

A carload of ore from the Eagle & Blue Bell mine is in today's market.

Will J. Gray, engineer at the Scottish Chief mine, Park City, returned to the mine today.

The annual meetings of the West Morning Glory and West Century companies will be held on Jan. 12.

At the meetings of the directors of the Copper Ranch Mining company held yesterday afternoon an assessment of a half a cent per share was levied on the capital stock of that corporation. A large part of the assessment was paid in during the day and Manager Lloyd departed for the mine last night to discharge some of the corporation's outsanding indebtedness.

J. L. Callison and Wesley Warren visited Alida valley this week, and relocated a prospect that was discovered by Mr. Allison 32 years ago. The ore is silver and of a high grade. Alida valley is one of the best mineral sections of this southern country and with the investment of capital will become a good bullion producer.—Tonapah Bonanza.

Henry M. Crowther, consulting engineer of the Blue Acre Copper company, has returned from a professional trip to southern California and Arizona camps.

Manager George Dern, of the Consolidated Mercur went out to camp this morning.

The Taylor & Brunton sampling works reports 14 cars of ore arrived today. Two came from Idaho, two from Nevada, and 10 from Tintic.

The Centennial-Eureka mine is sending on an average of 200 tons of ore daily to the United States smelter at Bingham Junction.

George Moore, manager of the Sunshine mine, went out to Mercur today and expects to be out of the city several days.

Louis Pressett is happy over the discovery of a ledge of rock in the vicinity of the Hecker property, croppings of which show $1.50 in gold 11 ounces in silver, 7 per cent copper and 1½ per cent lead. Experienced miners, who have visited this property of Mr. Pressett's say it is a good showing for a bonanza with little development.—Emery County Progress.

State Mine Inspector-elect Robert S. Bell is in the city on professional business.

Judge W. I. Snyder, manager of the California at Park City, is at that property today.

Herbert Cohen, secretary of the Keystone in Thayne's canyon, Park City, is at the mine today.

HIGHER PRICES PREVAILED.

Opening Was Very Strong and Active at Advances.

REACTIONS IN SOME STOCKS

Leaders Bought Heavily at Small Concessions, Causing Them to Rally to the Highest.

New York, Dec. 31.—The market opened active and strong at fractional advances throughout and there were heavy dealings in some of the market leaders. Dealings were very animated during the first hour's trading and although higher prices prevailed all around, the strength was largely centered in the tractions, Goulds and coal stocks. Manhattan sold at 149, a rise of 3 points and General Electric gained as much. The Eries showed the effect of realizing and gains elsewhere were checked by the same cause. The market continued active and became highly irregular. There was realizing in earlier strong stocks and reactions in prices under cover of new stength in the Pacifics, led by Southern Pacific with a rise of 1¼. A number of long neglected stocks were also advanced sharply. Gains reached 1 to 1½ in the Pacifics, Denver ¾ Rio Grande preferred, Amalgamated, United States Steel, Lead, the smelting stocks and United States Realty, and between 2 and 3 in Northwestern, Wheeling and Lake Erie first preferred, Tennessee Coal, United States Realty preferred and United States Express. Westinghouse electric first preferred jumped 3 and Cleveland, Loraine and Wheeling 10 points.

There were reactions approaching a point in other stocks.

Bonds were firm at noon.

Leading stocks were bought heavily again at slight concessions and soon rallied well above the forenoon top prices. Manhattan, Missouri Pacific, Chicago Great Western, Erie, Reading, Louisville and Illinois Central were taken in large blocks and led the market in point of strength. The rise in the tractions was due to the report a remedy would speedily be devised for the relief of the traffic congestion on the various lines. Manhattan touched 149¼, but Brooklyn Transit did not maintain its 1 point rise. The stock was not appreciably affected by the King's county grand jury presentment.

The trading became quieter, but the undertone was firm and advances were made in new quarters. St. Paul rose a point, as did Wabash, the preferred 2¼, Kansas & Texas preferred 2, Consolidated Gas 3¼, American Express 5, Canada Southern 6 and New York Airbrake 7½.

MONEY AND BONDS.

Money on call, firm, at 12 per cent. Prime mercantile paper, 6 per cent.

Sterling exchange, steady, with actual business in bankers bills at 4.86.50 @4.83.25 for 60 days.
