

CARE OF FARM ANIMALS

WHAT YOUR HORSE WOULD SAY IF HE COULD TALK TO YOU.

A lot of "horses" for the Condition of Horses Owners and Veterinarians There. Pay heed to them and your Horse will thank you all his life.

Don't let me to an iron post or raking when the misery is below frame. I need the silence my horse needs.

Don't let me have him in my stall at night in a bad cold right where I need him. Don't let me eat and don't make a smooth place.

Don't compel me to eat more salt than I want by mixing it with my oats. I know better than any other animal how much I need.

Don't let me, because I am free under the whip, don't get tired. You would move up if under the whip.

Don't think because I am strong that iron rods and bars won't hurt my mouth.

Don't stop me when I get frightened along the road, or I will expect it next time and may not stop.

Don't tie me up; for I have to carry you and the buggy and myself too. Try it yourself some time. Run up hill with a big load.

Don't keep my stable very dark, for when I go out into the light my eyes are bright, especially if made to see a ground.

Don't say "whoop" unless you mean it. Teach me to stop at that word. You may knock me if the lines break and save a runaway and a fall.

Don't think I drink too cold water or have a frosty bit in my mouth. Warm the bit by holding it half a minute against my body.

Don't forget to file my teeth when they get jagged and I cannot chew my feed. When I get loose it is a sign my teeth were filed.

Don't ask me to "back" with blinders. I am afraid to.

Don't run me down a steep hill, for if anything should give way I might knock you over.

Don't put on my blind leads so that it terrifies me, or leaves my forehead that it will fall in my eye.

Don't be so careless of my harness as to hit a great acre on the before you attend to it.

Don't lead me to some blackhead that has come out. I have.

Don't let me in the cold without a blanket after driving me until I sweat. I can catch cold and die.

Don't put blinders on me. The God who created us would have given me blinders naturally if I had needed them.

Don't give me poor hay after a hard day's work. I like to have a good drive. I have a stomach and it needs good food.

Don't make my cheek sun so tight that it keeps breaks my neck. I suffer quite as much as you would in so unnatural a position.—Logan Journal.

Case of the Stallion.

"Best and last are the greatest enemies of the horse," says Dr. Paul Payne, and every stallion owner would wish his truth in practice; there would be little need to write anything further on this subject. His observations would be potent to improve the lives in strength, vitality, endurance and longevity, but, by taking up a glass to notice, correct the irrational frenzies and abnormal conditions under which he is often raised. Not that the conditions surrounding the horse in a state of nature should be wholly imitated, for they do not all tend to his improvement but should be adapted to it.

But it is evident of most that the wild horse is tough, sound and healthy, and making fine allowance for the influence of natural selection or the survival of the fittest, when we observe that his descendants, when all is said and done, are not half so fit as the stallions of yesterday, we may reasonably connect this as cause and effect, and safely consider exercise, pure air and simple diet the fundamental conditions upon which to build up, by skill in breeding and training, the highest and most perfect equine type—stallions. Grace.

Prize in Sheep.

Four years ago a Margaret county farmer bought 12 acres at \$4 each. The first year he sold wool to the amount of \$15, the second \$27, the third \$35 and the fourth \$45. In the second year he added to his income by selling sheep to the value of \$40, the third year \$50 and the fourth \$55. At the present time his flock numbers 130, which he very reasonably believes is worth at least \$400.

The Lloyd's of the Alliance Mortgaging company are now about to a farmer living near Julesburg, Colo., from a sum of wool and sheep the farm paid \$100, and the purchase price included a year, and now has 300 head of superior animals—Blackface Friesians.

MAKING A MARKET.

Good Advice to a Man With Legumes Eggs to Sell.

"We have sent 300 Legume hens, and will like to find a market for their eggs to which we could ship them by rail. They crack as fast as they are laid, so that they would be strictly fresh. If you know of any parties who would like to engage them I would be pleased to respond with them."

Answer—It is hard to coax 300 hens into laying eggs, and to find a market yet, to derive a profit, one must start small. Anybody can ship eggs to New York and take what the commission man will let it return, but this business is not satisfactory to the man who knows he has a fine class article to sell. It is best to start with a few dozen hens, and then increase a sort of double十二wheel which revolves with great force and makes the thing go. At least three weeks' time will be required to get the hens to lay well, and the market will be open to them.

The point is to get in with some responsible dealers, and convince him that the eggs are strictly first class, and that they can be supplied in certain quantities. Have a circular neatly printed, stating in large type that the eggs will guarantee over 90% to be fresh and good. Offer to supply one dozen fresh eggs for every one dozen bad, or stale before a certain date. Stamp every egg with a nest stamp, showing when it was laid. Never let a sold egg be badly colored egg go out of your store. Have a card neatly printed with a

your name, address, age, guarantee and a popular name for your poultry farm. Scatter your cards and circulars whenever you can, and circulate to every hotel keeper, every first class grocer and provision dealer you can hear of.

Put a neat advertisement in the paper that circulates among the best people in your town or village. Make a visit to your local newspaper, where you can tell what you are doing. In short, be it in yourself and in your card, then "blow your horn"! If you blow hard enough you will be sure to please somebody, and hold his attention. In order to build up a "special" market for your eggs, you will have to "school" the public, have a favorable opinion of himself, his work and his product. The world loves a self-reliant man and will take pleasure in following him to his egg business as well as elsewhere.—Reuter New York.

He Was Grossed.

It is a known fact that wool buyers annually sustain more or less loss on their purchases, owing to the improper handling of wool by greasers. It is claimed that the same losses have not been experienced by the Manhattan Wool Company, which, when entering the new factory, however, did not seem to care.

Don't let me be up; for I have to carry you and the buggy and myself too. Try it yourself some time. Run up hill with a big load.

Don't keep my stable very dark, for when I go out into the light my eyes are bright, especially if made to see a ground.

Don't think because I am free under the whip, I don't get tired. You would move up if under the whip.

Don't think because I am strong that iron rods and bars won't hurt my mouth.

Don't stop me when I get frightened along the road, or I will expect it next time and may not stop.

Don't tie me up; for I have to carry you and the buggy and myself too. Try it yourself some time. Run up hill with a big load.

Don't lead me to some blackhead that has come out. I have.

Don't let me in the cold without a blanket after driving me until I sweat. I can catch cold and die.

Don't put blinders on me. The God who created us would have given me blinders naturally if I had needed them.

Don't give me poor hay after a hard day's work. I like to have a good drive. I have a stomach and it needs good food.

Don't make my cheek sun so tight that it keeps breaks my neck. I suffer quite as much as you would in so unnatural a position.—Logan Journal.

Points of Interest.

Nothing seems to be fixed any more in Australia, in England and on the continent of Europe. The visiting records of all sorts of all kinds of men and women are not safe to my where the visiting room will stop. They are not the visitors of equal equals those should be treated with respect and with two strings each way and ends out with a string up. This will help to brace any servant or house in case any should occur.—American Civilization.

I am afraid to touch with blinders.

Don't run me down a steep hill, for if anything should give way I might knock you over.

Don't put on my blind leads so that it terrifies me, or leaves my forehead that it will fall in my eye.

Don't be so careless of my harness as to hit a great acre on the before you attend to it.

Don't lead me to some blackhead that has come out. I have.

Grace.

In the counties of Douglass and Idaho, in the state of Colorado, there are less than 12,000 cattle every winter, and there are 10,000,000 sheep, though intelligent citizens took into their own hands in several instances and made short work of the cattle thieves.

In Bulletin No. 8 of the Missouri Agricultural college, Columbia, Mo., Dr. Paul Payne gives full directions for the raising of cattle for market by operating on the flank. The bulletin will be sent free to those applying.

In connection with the sugar beet industry the fattening of choice cattle for market flourishes. The refined beet pulp is fed to beef animals with excellent results, the esophagus pulp forming a most nourishing food.

It may only appear natural at all points to the farmer to feed his cattle to the fattening of choice steers, when the market calls for them.
