MINING, BUSINESS AND STOCKS

TRADING STILL FULL OF GINGER

Slight Drops in Most Active Stocks and Gains in Others.

TINTICS ARE IN DEMAND

Colorado Mining is Attracting Attenrion-Rumors of Coming Dividends Sends Stock on Rapid Climb.

Despite a falling off in the totals this morning's trading in the local mining stock exchange was brisk, Uncle Sam closed at \$8 and prices around this figure brought out block after block of this stock. Yankee went down a few points but small block selling was a feature of this stock's activity. Lower Mammoth made a pretty gain and was a good seller. Victor was a heavy seller but remained stationary, Colorado Mining closed at \$2.874. Colorado Mining has been one of the active stocks for the past few days and when the stock elimbed to \$3 local market followers began to sit up and take notice. Reports from Tintic were varied but the most plausible reason volunteered was that the company will shortly post a dividend, probably in the neighborhood of f cents per share or \$40,900 and 4 cents per share or \$40,000 and starting this distribution some time during May will post monthly or quarterly dividends from that time on. The Beck Tunnel company, another Knight property pays dividends every month. One netting \$1,400 and \$2,000 per car has been shipped and a big sum is stored away in the company's stocking. With shipping going on in good shape and the 250-toot level yielding faster than it can be taken away the Colorado Mining is one of the best things in Utah, cay its owners.

one of the best things in Ctan, say its owners.

Uncle Sam opened its morning activity with a sale of 1,600 at \$8, seller \$6. Another sale at the same price moved \$00 shares and a third sale at \$3 involved 400 shares. Two sales were made which involved 500 shares each; the first lot at \$9, buyer 30, and the second at \$8, buyer 30. The last sale of the regular call moved 100 at \$7, seller 60. Three sales constituted this ateck's doings on the open board;

\$7, seller 60. Three sales constituted this stock's doings on the open board; 200 at \$7, 500 at \$7 and 100 at \$8.

Lower Mammoth opened at \$1,95, 500 shares changing hands at this pilee. One hundred shares sold at \$1,97½ and the regular call trading ended on the open board; the first block comprised 200 shares at \$1,95 and the second, 100 shares at \$2,95 and the second, 100 shares at \$2,00.

Yankee dropped from 51 to 48, four sales totaling 700 shares. May Day was a good seller at 29½ and \$0; 2,000 shares going at the first price and 4,500 at the second. The foregoon's sales, totals and closing quotations follow:

SEARCHLIGHT JUBILANT.

Greatly Needed Machinery Starts to Treat Its Milling Ores Soon.

Special Correspondence. Searchlight, April 27 .- The New York Searchlight is introducing two innovations into the district, both of which mean much to the entire camp. Following the return of General Manager Hurt, who has been scouring the country to secure the early delivery of one of the largest plants of machincry yet to be installed here, comes the arranged to establish a 19-stamp cus-tom mill on its property. This an-nouncement will be received with en-thusiasm by hundreds of prospectors who have good milling ore, but who cannot open up their properties until they can secure money for ores in sight.

they can secure money to sight.

There is ample water on the property for milling purposes, and with its equipment and milling facilities it will be one of the largest propositions in the district. The machinery now en route consists of a 5¢ horse-power -out-cylinder Union hoist, a 12x 12 air compressor, power drills, ore care, rails and double-deck cages. These are the first cages to be installed in the district, skips invariably beed in the district, skips invariably

company will introduce the The company will introduce the copper precipitating system, in general use in many large copper camps. In one of the shafts on the New York Scarchight, the ledge carries from 5 to 6 per cent copper, while the water i sso strongly impregnated with copper that precipitating will be profitable. Large reservoirs will be constructed near the shaft and tin cans and scrap iron und to precipitate the copper.

and scrap from the McCready electric plant at the Santa Fe mine will be utilized for the compressor and the shaft and buildings will be lighted by electricity. The diamond drift outfit with which the company will prospect its own as well as many other properties in the district is now en route to Searchlight, and will be put into operation as rapidly as possible upon delivery.

THIS MINE HAS HISTORY.

Was Guarded by Armed Locator While His Companions Dug Ore.

Special Correspondence. Special Correspondence.

Nelson, Nev., April 28.—Among the important developments in the vicinity of Nob Hill, which is in the southern division of Eldorado Canon country, is the financing or the Eldorado Spinx, one of the old discoveries of the district, and which was worked 40 years ago by pioneers of the upper Colorado rict, and which was worked 40 years ago by pioneers of the upper Colorado river. For the past few years all that has been done on the property has been the development of water and the opening up of new workings in the old tunnel, ran by the trait blazers.

The Eldorado Spinx carries a romantle history, including bloodshed and intering the old the original discoverer. John Weaver, retiginal discoverer. John Weaver, retiginal discoverer. John Weaver, retiginal discoverer increased to the district after many years theread to the district after many years.

brighted discrete after many years and some to begin prospecting again. Weaver stood guard day after day on the summit of the Sjhinx ledge, rifle in hand to keep the Indians away while his partners took from a shallow slope horn silver that went all the way from 50 cents to 31 per pound. This slope penetrated the "y" in about 50 feet and only a narrow streak was worked out. The present owners had driven an adit tunnel into the ledge, which showed 27 feet in width on the surface, and have put down two winzes, one 45 feet and the other, further in 25 feet deep. In both these workings only pay ore has been encountered, and at the present point it is estimated that the rein cartes pay from the grass roots.

There is an old dumn mater again. Tonopah Nevada, 20.00 and 3.000 the wast by a perphyry dyke and on the east by lime. The cropping are it on quartz and at a depth of 10 feet gazy quartz, white from and spar are found to be the formations.

SAN FRANCISCO MARKETS.

James A. Pollock & Ca. bankers and brokers furnish the following, received over their private wire, this afternoon:

COMSTOCK.

Ophit, 13:62:40; Mexican, 75:018; 26:6018 & Curry, 31:632:60; Allenge, 30:031; 27:76100 Jacket, 90:93; Brichen, 15:03:18; 26:100 Jacket, 10:03:18; 26:100 Jacket, 10:03 This monster ledge is traceable for one mile; and at its ages on the Spinx carries pay from the grass roots. There is an old dump estimated to be worth \$50,000, consisting of ores ranging from \$20 to \$100 per ten, but which was not rich enough to ship via the Guif of California to smalters. The preponderance of values is vivar, while ore running 100 ounces in the white metal carries with it from \$20 to \$30 in gold.

It is the plan of the owners to erect a concentrating plant uson a mill site located a few hundred feet away, where water has been developed and whence ores can be conveyed by a chute into the mill. By concentrating from three to five into one the property can handle every ounce of ore at a profit. With at present 30 feet or ore daysloped for a distance of 100 feet this is one of the largest properties yet opened in the district, and shows millions in siems. At least \$40.000 is to be spent immewill be shipped mainly via Nipton to the

HOIST FOR WHEELER.

E. Caine and C. N. Strevell Visit

Property in Yerington District. Joseph E. Caine and C. N. Strevell, who visited the district this week, also spent some time at the Wheeler prop-erty in the East Walker section of the erty in the East Walker section of the district, says the Lyon County Times. They report a very encouraging outlook for the property being developed there. This is a gold property, which the company acquired about a year ago. A tunnel now pierces the ground for a distance of 425 feet, following a ledge which has an average width of three feet, and the ground is improving as the tunnel advances. The ore is all an average milling grade, which will run from \$10 to \$59 per ton.

is all an average milling grade, which will run from \$10 to \$29 per ton.

The tunnel is now cutting the ground at a depth of about 250 feet from the surface. There are two velos in this ground and in one of them a winze was sunk to a depth of 75 feet and some phenomenally rich ore encountered at this point—ore that ran well up into the thousands. When the 425-tunnel is advanced another 50 feet it is believed that a function of the two velos will be reached, and at this point it is contemplated to sink another whize if conditions are favorable. For the purpose of sinking the company has orconditions are favorable. For the purpose of sinking the company has ordered and will install a steam hoist of sufficient of pacity to get into the bowels of the earth for several hundred tet. Steam power will be used because there is a sufficient quantity of wood and water in the vicinity to make it the chargest power to be of wood and water in the vicinity to make it the cheapest power to be obtained Last fall this company shipped from Salt Lake a ten-stamp mill to be used in reducing the ore being produced from the mine, but the winter weather and bad roads prevented some of the machinery being put on the ground. Now, however, this mill will soon be installed and the mine will no doubt be placed in the class of producers.

GEORGE W. HEINTZ HOME.

George W. Heintz, traffic manager of the United States Smelling company, is back from a trip east. He reports that the company's big smelter at Chrome, N. J. will be blown in this Chrome, N. J. will be blown in this month. This with the big refinery, one of the largest in the United States, can handle all business arising along the Atlantic coast and the refinery, with its 12,000,000-pound per month capacity, can handle "mats" from all over the United States.

SACKING COMMENCED.

SACKING COMMENCED.

A letter received by E. T. Woolley from Supt. F. L. Steward of the San Pedro and Blackhorse mines in the Blackhorse district, contains many interesting items. Sacking ore for shipment was commenced last Thursday, and as soon as teams can be bired shipping will be commenced. The weather is ideal according to this letter. Over 200 tons of ore is in sight and this will pay all expenses so far and leave 100 per cent profit besides. The mines show over 200 tons of excellent shipping did and steady sacking and shipping did and steady sacking and shipping are being planned. The ore will be hauled to Frisco, Utah, a distance of about 80 miles.

TOM MOORE IMPROVES.

Conditions in the Tom. Moore at Bingham are improving with every drill-tap. The tunnel being run nearly east and west was switched to the northwest and porphyry was encountered. This indicates the near presence of ore. The deposit is a heavy blue porphyry east account of the control of the blue porchyry, carrying copper in good quantities and some gold and silver. A streak of purple is especially rich in copper. The mass will go over \$10 a ton right now. A contract for another 100-feet of tunneling has been let; porphyry in Bingham means ore somewhere close, so the Tom Moore's owners, Mr. and Mrs. A. M. Surbagh of this city, are anxious to prove their property up quickly.

VISIT COMMONWEALTH.

A party including N. A. Dunyon, Dr. F. Stauffer, William Pischel, W. T. Atkin, J. H. Paterson, R. J. Deighton and Mr. Mason, officers and directors of the Commonwealth Mines company, visited the Commo Beaver county at the end of the week. Beaver county at the end of the week. The travelers have returned. The new five-drill compressor plant and 60-horse-power gasoline engine were started Thursday and are running smoothly. The main tunnel is in about 400 feet, and with the new machinery assisting, 50 feet of work will be done each week. It is expected the big north and south ledge which runs through the Commonwealth's ground from the Burning Moscow will be caucht with 500 feet more work. A ground from the Burning Moscow will be caught with 500 feet more work. A vertical depth of 500 feet will have been reached when the vein is encountered. In addition to work in the main tunnel, another tunnel has been started in the Marble claim. This is in ore running 42 ounces in silver and 28 per cent lead. A 100-foot shaft is to be sunk upon the Beacon. The main tunnel is being worked so as to permit numerous east and west fissures being opened up. The Commonwealth is believed by its owners to be one of the biggest things in Beaver county and one of the coming big things of the state. coming big things of the state.

CONCENTRATES.

President Ernest R. Woolley of the Lexington-Concord left for the mine last evening.

Capt. Duncan MacVichie of the Bingham Con. and chief consulting engineer on F. A. Helnze's staff, has returned from New York.

Louis Gordon of the firm of Gordon-Beason, stock brokers of this city, leaves today for an extended trip through Nevada and California. The senior class of the Colorado school of mines is spending a few days in this and surrounding cities enroute to Butte and Yelowstone park. The party, numbering about 40 members, visited Bingham Sunday, and will spend today in Park City. The students left Denver April 22 and will return to that city by May 22. They are traveling in two special cars.

The Valeo Lease, Milling & company was organized Monday when its articles of incorporation were filed with the county clerk. The capital stock is \$100,000, at 50 cents per share. There have been 240,950 shares set aside as treasury stock. The company owns claims in Wasatch county. The offi-cers are: J. M. Carpenter, president; L. M. Carpenter, vice president, and Alex H. Birrell, secretary and treas-

BABIES' MINDS.

Experts in Teaching Them How to Shoot to Meet Today.

New York, April 30 .- Experts in the

work of starting baby minds on the long road of learning will gather at Teachers' college, Columbia university, beginning today, when the first sessions of the international kindergarten convention will be held. More than 100,000 delegates are in attendance, including Mrs. Alice Putnam, who founded the first kindergarten in Chicago 30 years ago, and others well known in the work.

A preliminary conference of kindergarten training teachers will be held
this afternoon. The first public session
will be held in the evening in the auditorium of Horace Mann school. Miss
Bertha Payne of the school of education. University of Chicago, and Miss
Geraldine O'Grady, supervisor of the
Brooklyn Free Kindergarten society,
will read papers which will be discussed

PRODUCE.

CHICAGO.

Chicago. April 30.—Continued wet weather in Kansas induced renewed selling of wheat in the local market today and caused a further decline in values. Pit traders and longs sold freely. July opened unchanged to 12 lower at 32 to 52% and sold on the Nacottal. traders and longs sold freely. July opened unchanged to 12 lower at 32 to 82% and sold off to 81% \$18%.

The corn market opened steady on firm cables, but soon eased off on selling brought out by the weakness of wheat. July opened unchanged to 14 higher at 43% to 50, and sold off to 25%.

Oats were easier because of improved weather conditions for the growing crop. Selling was quite general. July opened unchanged to 36 higher at 41% to 42, and sold off to 41%.

There was only a light trade in provisions and the market was easier owing to the weakness of grain. July pork was off to 75% at 15.75 to 15.75%. Lard was unchanged to 24% higher at 8.750%.77%, and ribs were a shade lower at 8.67%.

YESTERDAY'S.

by local appacations, as they cannoreach the diseased portion of the ear There is only one way to cure deafness and that is by constitutional remedie Deafness is caused by an inflamed condition of the mucous lining of the Bustauchian Tube When this use is official, ed you have a rumbling sound of Imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition hearing will be destroped forever; nincases ous of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

F J CHENEY & CO., Toledo, O. Sold by druggists. 75c.
