THEATRE.—There was an appreciative house last night to witness the performance of the new version of the play of "Unmasked." Miss Dargon enacted the leading role with her characteristic earnestness and intensity, was loudly applauded throughout the play, and twice called before the curtain. She was respectably supported by Messrs. Cogswell, Thorne and Harris, and Misses Adams and E. Clawson.

This evening Miss Dargon will assume her great part of "Deborah" in the powerful play of that name. Miss Adams appearing as "Anna," Miss Simons as "Rose" Mr. Cogswell as "Joseph," Mr. Thorne as the "Schoolmaster," Mr. Harris as "Peter." Miss E. Clawson and Mrs. Bowring, and Messrs. Thompson and Wilton are also announced.

After the play Miss Dargon will recite "Sheridan's Ride."

To-morrow evening the last of the engagement of Miss Dargon, that gifted lady will appear in the new Irish drama, entitled, the "Rising of the Moon."

If Miss Dargon during her brief stay shall be honored with full houses, it will be an evidence that the theatre-goers of Salt Lake recognize and appreciate eminent talent when they have the opportunity.

"SHERIDAN'S RIDE."—Miss Augusta L. Dargon will recite "Sheridan's ride," at the close of the other performances at the Theatre, to-night.

TWO DAYS' MEETINGS.—Two days' meetings will be held, by the quorum of the Twelve, at Farmington, to-morrow and Sunday. It is probable, as the weather is fine, that the attendance will be very large.

SPANISH FORK, May 7th, 1873.
Editor Deseret News:

There are four cases of small-pox at Salina City (Pond Town) in the family of Nathaniel Hanchett. The disease was taken there by the children of Brother Huggins, who died, of small-pox, at Nephi, and after it was supposed that there was no danger of infection. All the cases reported are doing well. The residence of Hanchett is quarantined. Respectfully,

WILLIAM CREER.

LECTURE.—We understand that Gen. Geo. C. Bates will deliver a lecture at Independence Hall, three weeks from next Sunday night. The subject upon which he will treat is, "The Providences of the Almighty," in which he will allude incidentally to the development of the Northwest, and circumstances connected therewith. The known ability of General Bates will be likely to have the effect of attracting a large audience, and the broad character of the subject affords ample scope for the exercise of his abilities as a lecturer.

ARTESIAN WELLS.—It has been a matter of astonishment to many people that a persistent attempt has not been made in this part of the country to obtain artesian wells, and certainly it has not been because they were unnecessary that such an effort has not been made. In fact if artesian wells can be obtained hereabouts it would be the next thing to impossible to over-estimate the benefits that would result from them. Large tracts of land, which are now arid, sterile and unproductive, would, as if by the hand of the magician, become verdant and fruitful. Those are broad acres, for instance on the west side of this valley, well situated, but beyond the reach of irrigating waters, and consequently now unproductive, which could by such means be transformed into beautiful farms. Even in this City many parts that are now valueless so far as the land is concerned would become most desirable locations for residences. What a blessing artesian wells would be on the north and east benches, where many people have to convey water, even for culinary purposes, distances of from one block to three-quarters of a mile.

The machinery to make the attempt to obtain those wells is now on the way and is expected daily from the east. The gentlemen to whom it belongs are Mr. Curtis B. Mawley of this City, and Mr. Ben Herrington, of Iowa. The latter has been engaged constantly during the last four years in boring wells in his native State, and has been successful in every attempt in striking water. The drills will be worked by horse power, it requiring four animals to work them.

When the machinery arrives and Messrs. Hawley and Herrington get ready to begin operations they will be prepared to contract with parties for the boring of wells. The apparatus is not only useful for making artesian wells, but can be used to great advantage in boring draft flumes for mining tunnels.

Should the undertaking prove successful its projectors will not only have fallen on something that will be likely to prove remunerative to themselves, but the enterprise will be an incalculable benefit to the Territory generally. It is to be hoped the attempt will not be a failure, and we see no reason why it should be. If artesian wells can be obtained in other parts of the West, we can see no reason why they should not be here.

INFORMATION WANTED.—Of the whereabouts of Mr. Benjamin Carman, carpenter, resident of Salt Lake City, who left his home three weeks ago, for Sandy, and intended visiting Dry Kanyon. He had on, when he left home, a greenish brown striped or carded coat, pants of the same color, but different cloth; copperas colored jeans, vest, small brownish hat, etc. Any information of his whereabouts will be thankfully received by his anxious wife and family.

Address—Mrs. M. J. Carman, Box 193, Salt Lake City.

WEBER MILLS.—In October last Mr. William Jennings sold out those flouring mills to Mr. D. H. Peery, and before doing so the former had spared neither pains nor expense in bringing them to a high degree of excellence in point of machinery as well as general fittings and arrangements. Since purchasing the mills Mr. Peery has continued where Mr. Jennings left off and now the mills are in as satisfactory a condition as probably any in the west, and it is doubtful about their being surpassed by many in the east. The machinery is of late and improved styles. The wheat is put through one of J. L. Booth's cut and weed extractors previous to passing into a Vandegrift smutter. It is then taken to the hopper through the conveyor. By an ingenious process the grain is moistened with water before being ground, which causes the bran to shell off cleaner and much easier than it would otherwise. The grinding is done by four run of French burs, to which the wheat is taken by a glass tube silent feeder, in which it can be seen in its clean and prepared condition.

An examination of the flour made at these mills, through a glass, shows it to be of the very finest quality. Mr. Peery has shipped large quantities of flour to the east, where it is considered to be first-class, so much so that dealers there have been anxious to put it in sacks under their own brand. The wheat shipped eastward by that gentleman, after being put through the cleaning process at the mills, has also been very highly valued.

It is a subject for congratulation that Mr. Peery is taking a course to enhance the outside estimate of the products of Utah, and it is to be hoped that millers, farmers and others will be incited to "go and do likewise." The course of some has had a directly opposite tendency, and as a consequence ample justice has by no means been done to the products of this Territory in other markets. It is a fact that as good wheat can be and is raised here as is produced in any other part of the country, but there has been a slovenliness manifested by many farmers with regard to properly cleaning their grain before placing it in market, that is to be regretted and certainly should be remedied.

Good clean wheat should and always does command a better price and readier sale than that which is filled with dirt, weeds and smut, and parties by whom the Weber or other reliable mills can be readily reached should consider whether it would not be to their advantage to have their grain cleaned, for a consideration, at those places. We are of opinion that the enhancement of the value of the grain by doing so would considerably more than cover the expense of cleaning. The soil of Utah does its part towards securing a ready and remunerative market for its products, and it but remains for man to do his part and the matter becomes a settled fact.

The Weber Mills are in charge of Mr. Williams, a miller of extensive and long experience, who appears to thoroughly understand his business.

LATEST BY TELEGRAPH.

FRANKLIN.—Forty-three mounted Metropolitans, commanded by Mike Coney, passed here at 9 this a.m., unmolested. There is nothing now to prevent their forming a juncture with those at Martinsville.

WASHINGTON, D. C.—Marshal Packard telegraphs from New Orleans, to Attorney General Williams, that, having warrants for the arrest of D. E. Blanche and ten other leaders of the organization, he called upon Gen. Emory, who furnished a military force of two officers and forty men to make the arrests. This force arrived at Brazier city by rail, but did not proceed at once to St. Martinsville, for want of transportation by water.

CINCINNATI, O., 9.—The Chamber of Commerce, to-day, adopted a memorial on the death of Chief Justice Chase, recognizing his unity of purpose, the earnest maintenance of his principles, his clear intellect, force of character, strength of will, his excellent influence in moulding the destiny of state, and his important relation to the revolution.

NEW YORK, 9.—The Chamber of Commerce, to-day, adopted resolutions expressive of the loss to the country by the death of Chief Justice Chase, and appointed a committee to attend the funeral. The Mayor requested that flags be displayed at half-mast throughout the city, by the shipping, on Saturday.

MADRID, 9.—Admiral Topete has been arrested. General Velarde says many Carlists are surrendering. He is about to order a levy *en masse* to crush the insurrection. Bands of Carlists under Campo and Gamez have been defeated, and many insurgents, including leaders, killed. The misunderstanding between Velarde and the minister of war, Nuvills, has been adjusted.
