

LOCAL AND OTHER MATTERS.

OFFICIAL PROCLAMATION.—It will be seen by the Proclamation of his Excellency, Acting Governor S. A. Mann, in today's paper, that Hon. B. A. McKean is, from this date, appointed to preside over the 3rd Judicial District Court, for this Territory, and that Hon. O. F. Strickland is appointed to the First Judicial District.

THE MUSEUM.—We understand that Mr. Willis, a conductor on the U. P. R. R. has presented to the Desert Museum a beautiful specimen of calcareous incrustation, from the Territory of Idaho.

INFORMATION WANTED of the whereabouts of John Craddock, who emigrated in 1844 from Cannock Chase, Staffordshire. Address, James Goddard, Chase Town, Staffordshire, England.—*Mill Star*, August 6th.

WASHINGTON.—Brother A. K. Whitehead, just in from Dixie, gives very favorable reports. The most abundant crops of wheat and fruit, ever raised in Washington have been raised this season. The Washington gardeners Club held its annual exhibition of fruit, just before his departure, at which there were eight assortments of grapes, plums, figs, pears, peaches, acorn apples, etc. Some of the common wild plums exhibited measured five inches around.

MARRIED in this city, on Monday, September 5th, 1870, by Elder Geo. Q. Cannon, Elder Moroni L. Pratt, son of the late Parley P. Pratt, and Miss Caroline Beebe, formerly of Polk city, Polk county, Iowa.

SUSPENSION.—The usual semi-weekly performances at the Theatre, will not take place to-morrow evening, and the patrons of the institution will regret to learn that it will remain closed until further notice.

GENERAL SHERMAN expects to reach San Francisco to-morrow afternoon the 7th inst., so telegraphs to the society of California Pioneers, and will be at the command of that society for their celebration on the ninth, that being the day on which they will hold their twentieth anniversary.

A LIVE MARQUIS.—The Marquis of Sili-go spent Sunday in the city, and attended services at the Tabernacle. He left yesterday afternoon for the West. He is plain and unassuming in his manners, and is about fifty years of age, the year of his birth being 1820. He is a peer of Ireland, and also a peer of Great Britain, and sits in the House of Lords as Baron Monteleale. His family name is Brown.

WATER MILK COWS OPEN.—The Illinois Farmer has an excellent article upon this subject. It says there are no animals about the place that require so much attention in the matter of being provided with water as the dairy cows. They do not get neglected in this particular on large dairy farms; but with the ordinary farmer or person who keeps a few cows, the case is different. They are frequently not watered enough, and the supply of milk falls off. There are many pastures not furnished with water, into which cows are turned and are only furnished with water at milking time, morning and night. This practice is poor economy and downright cruelty. This subject is worthy of attention.

A LONG SLEEP.—A letter was received this morning addressed to the "editor and proprietor of the Times and Seasons," requesting a copy of the paper to be sent to the writer, with the terms of subscription, as he wanted to subscribe for it! This bears "Rip Van Winkle." "Rip" slept twenty years; but this correspondent must have been asleep at least twenty-five years; for it only lacks a few months of that period since the stoppage of the Times and Seasons.

SIR GEORGE GREY, whose name is familiar to many of our readers as a distinguished Colonial Governor of long standing was in town yesterday, accompanied by his niece, and left yesterday afternoon for the West. He visits the Sandwich Islands on his way to New Zealand.

NAPOLEON'S INCOME.—The London correspondent of the Chicago Tribune states that Louis Napoleon has enough invested in the English funds to bring him in an income of £100,000 a year. Upon this fact he says, "you may rely;" and he adds: "probably an equal sum stands invested elsewhere." He does not state his reasons for making this assertion; but expects it to be believed on his bare statement. It may be true, and it may not. Napoleon is not the only one about whose statements of this kind have been made, and which have passed current in the columns of leading journals; but which we know to be false.

THE "SALT LAKE HERALD."—We learn that John T. Caine, Esq., has recently become associated and connected, as Managing Editor, with our cotemporary, the Salt Lake Herald. Mr. Caine is a gentleman of ability, and his past course here, as theatrical manager and other positions of trust and responsibility, has won for him the esteem and confidence of those with whom he has been more immediately associated, and we regard the association of Mr. Caine with the Herald as an additional augury of its success.

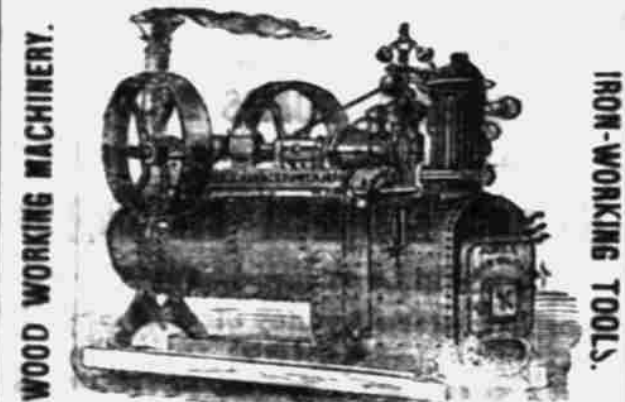

We also learn, from the Herald of the fourth, that its office has been removed to much more commodious quarters, namely to First South St., near East Temple, first door east of Hooper, Eldredge & Co's bank. The Herald, in its leading article of the first, says:

"We wish it distinctly understood that the Herald is not published in opposition or rivalry to any of its contemporaries. Those who advocate the principles of liberty, truth and right, will find in its conductors shoulder to shoulder with them."

Died: In West Jordan Ward, on the 4th of September, a child, Emma Beckstead, wife of Henry Beckstead, daughter of William and Sarah Marsden, aged 2 years, 3 months and 13 days, formerly of Sheffield, Yorkshire, England. *Mill Star* please copy.

RUSSELL & CO'S
IMPROVED

THRESHING MACHINES!

Double Fan Three-Hitch Gear

The success achieved by this machine during the past season is without a parallel.

Over Eleven Hundred Sold
During the season just closed, all of which have given entire satisfaction. Men that have made a business of threshing for twenty years, say that the Russell & Co's Machine will thresh and clean more grain of all kinds and do it better, with less power, than any Machine in the Country.

The Three-Hitch Gear and Pivot Cylinder
Has been found not only more convenient and durable than any other arrangement in use, but to run much lighter and is less liable to get out of order.

The Adjustable Concave
Has greatly increased its capacity for clean and speedy threshing, and the

Separating Capacity
Has been vastly improved by the increased width of Straw Carrier and the extra Beater in the second carrier.

The Two Fans
Now used in this machine have more than doubled its capacity for cleaning—in fact it is the only machine that will clean grain at the threshing and do it in such quantities as will justify a man in spending his time in threshing.

DOUBLE - PINION HORSE - POWER.

With Russell's Patent Movable Center.
Russell's Improved Double Pinion, eight and ten-horse Power, with movable center, has long been in use, during which time it has withstood the most severe tests; and for light draft, strength, and durability, it has no equal.

The movable center, as constructed by us, is of great value, for by its use the master wheel is enabled to adjust itself to the master pinions, so as to divide the labor equally, thus overcoming friction, and removing to a great extent the liability to break by sudden jerks or starts of the horses.

Russell's Patent Safety Coupling.
This enclosed safety tumbling-pod coupling is undoubtedly the best ever offered to the public.

Straw Stackers.
Straw Stackers, single length, sixteen feet, or to fold, twenty feet long, either with or without canvas sides.

Truck Wagons.
The truck for hauling the Separator is made thoroughly seasoned lumber, and trued with the best of iron, and suitable for farm purposes.

CURTIS MODELS—PRICES REDUCED TO MEET THE TIMES!—The merits of this system for Cutting all kinds of garments worn by Ladies, Gentlemen and Children are known by scores of ladies in this City and Territory; but the sure way is to prevent for one's self which may be done without charge. This system removes all anxiety regarding the cutting of garments, as all its directions are absolutely positive. There will be no altering—no taking up or letting out, which not only injures the material but destroys the proportions and often ruins the garment. The system is very simple and can be learned in a few hours.

AS—CASE AND PRODUCE taken.

REVOLUTION IN MEDICINE!

THERE is no disease but Walker's Vinegar Bitters will cure. Their great success in healing all ailments is proving to the world that Doctors are the greatest humbugs of the age. Mr. Walker challenges the medical fraternity to show him a disease for which his BITTERS are not a cure, and if it can be done he stands ready to donate FIVE HUNDRED DOLLARS to any benevolent Institution in the United States to be named by the person who will prove that the above assertion is not true.
