

UNIVERSITY OF UTAH.

Chairman and Mrs. W. W. Ritter of the board of regents will give a reception and banquet at their home on First south street this evening, to the regents and faculty of the University, Governor and Mrs. Heber M. Wells and Governor-elect and Mrs. John C. Cutler.

Tomorrow evening Professor Stewart will deliver an educational lecture at Center hall.

Dr. C. B. Gilbert, joint author of "Stippling Stones to Literature," and ex-president of the National Educational association paid the University a visit on Wednesday. While here he gave the fourth year normals a practical talk on the qualifications of the teacher.

At the regular meeting of the engineers on Monday, Ben Tibbey read a paper on "The Westinghouse Air Brake." "Current Topics" were discussed by J. C. Brown.

Regent Emma J. McVickers, Professor Babcock and Mrs. H. S. Young addressed the women students in the chapel room on Wednesday during the chapel hour. They encouraged the young women to think and act for themselves. Just before the close of the session, a temporary organization was effected. The temporary officers were: Lyla Knudsen, president; Hazel Stevens, secretary, and Elsie Ward, treasurer. The permanent organization will take place early next week.

At noon on Wednesday, Mrs. Kingsbury, Mrs. Cummings, Mrs. Lyman, Mrs. Gowans, Mrs. Young, Mrs. C. S. Rheingold, and others were entertained at luncheon by the college women.

The University training school was recently awarded the gold medal by the jury of the St. Louis world's fair. This medal is the highest award offered in that department of school exhibits.

Supervisor Horace Cummings, who has had charge of the Utah school exhibit at the world's fair, has returned home. He resumed his work at the normal school on Wednesday. The exhibit is now in charge of B. F. Cummings of Logan.

On Wednesday Dr. Talmage delivered an illustrated lecture before the students in geology, mineralogy, and physical geography.

Through the joint courtesy of the United States Mining company and J. F. Smith, E. M., the well known and efficient engineer in the employ of the company named, the University has come into possession of a valuable model showing the geological structure of part of the Ogish mountains. The model consists of a series of large glass plates, showing vertical sections at uniform intervals, and is based on the work of Dr. J. E. Talmage, Mr. Smith, and others, who have investigated the region represented.

Dr. Talmage has recently completed a series of petrographical preparations, showing the character of the formations, ore bearing and otherwise, in the vicinity of the head of Brigham canyon. Owing to the loss of the diamond saw and accessories incident to the fire that destroyed the physical building, these rock sections have been ground down by hand.

Mr. H. C. Burton has been assisting Dr. Talmage lately in the preparation of a glass model showing mountain structure in this vicinity.

Last night the Alpha Pi fraternity gave a grand "Japanese hop" in the assembly hall of the museum building.

Laboratory work has begun in connection with mineralogy A. The newly equipped laboratory in this department has been the subject of much commendation from visiting professors, the laboratory part of the mineralogy I will probably be deferred until the second half year.

Dr. I. V. Danes of the University of Prague, Bohemia, was a guest of Dr. Talmage during the first part of the week, and spent some time in inspecting the equipment in geology, mineralogy and geography.

SALT LAKE CITY SCHOOLS.

Supt. Christensen addressed the Utah County Teachers' association today at Provo. His subject was, "School Discipline as an Element in Character."

Appropriate Christmas and New Year exercises will be held in all the buildings next Friday.

The annual "Red and Black" day will be celebrated by the High school in the large assembly room, next Friday afternoon. A very choice selection of local artists has been made.

The Christmas number of the "Red and Black" will appear next week.

City teachers will receive payment next Friday for three weeks and two days' services.

Owing to the general meeting at the Lafayette last Wednesday, the regular principals' meeting was adjourned for one week.

Supervisor Wetzel met with the fourth grade teachers last Tuesday and the fifth grade teachers last Thursday. His present work is music, but in the near future reading in the grades will receive his attention.

Principal Parratt has begun a tour of inspection and instruction to the grades throughout the city. Drawing

from Salt Lake City delivered an excellent lecture in College hall. His subject was "Peter's Mistake." Those present were highly gratified and pronounced Judge Botkin a very able lecturer.

Miss Nette's eloquent students will entertain in literary next Friday night. The "Myster Club" is issuing very unique invitations to a social to be held Friday night in the gymnasium. Something extra is expected.

There are a great many more students taking work in the scientific courses this year than there has been before. Over 100 students are enrolled in the chemistry classes and heretofore the number has not exceeded 50.

The concert given Thursday evening by the orchestra was in every way successful. College hall was well filled and the students showed high appreciation for the performance.

BRIGHAM YOUNG COLLEGE.

Logan.—The college basketball team was seen for the first time in active play in the gymnasium last Saturday evening, when they met and vanquished the Weber State academy boys in a practice game. The playing was fast and at times rather vigorous, and the superior skill of the Brigham Young college team was plainly to be seen from the first. The visitors, however, made an excellent showing, and in the opinion of the local athletes they form the strongest team yet sent out by the Weber State academy. They were, moreover, a good natured company, and they took their defeat magnanimously at the same time extending a challenge for a return game in Ogden this week. This game, however, has been postponed under unavoidable circumstances. The score last Saturday was 36 to 11. The visiting players were entertained on Saturday by the College Athletic association, and in the afternoon attended the dancing matinee in the gymnasium.

There is a probability that this large team will be called upon to meet Willard Bean's champions of Salt Lake City next week, if a suitable evening can be arranged. Mr. Bean having written that he has an excellent basketball team that he would like to have meet the Brigham Young boys.

The Usona society gave an informal reception to the girls of the college last evening from 5 to 7 o'clock. Nearly all of the lady students were present. Games were played in the gymnasium, and dainty refreshments were served.

At 7 o'clock the regular Usona meeting was held in the assembly room. The leading features of the program were a book review, "Lavender and Old Lace," by Miss Julia Nibley, and a paper on the "Life and Work of J. M. Tanner," by Miss Hattie Pond. The attendance was the largest of the year.

The college is to have a skating pond this year. On Wednesday afternoon the students were given a half holiday and the boys turned out in a body and with the help of a building crew, cleared the brush from the southeast corner of the campus, where there is a favorable place for a skating pond. With very little work it can be made available this year, and that work has been most done so that water has been turned in to form a pond. It is expected that next year some additional work will be done which will make more than double the present area, and inasmuch as a running stream is always at hand, a fishing pond may be among the possibilities. The work done yesterday has added much to the appearance of the campus, in the removing of unsightly growths of willows and brush.

The Crimson made its appearance again last week with a much improved appearance. Among the important features of this number are verbatim reports of the excellent addresses given at the students' reception by President Joseph P. Smith and President Ashton H. Lund. The other articles are bright and interesting. It is pleasing to note that the Crimson is being heartily supported by the students and the advertising public and is in a flourishing condition financially. The staff is to be congratulated on the second number of volume two.

The Beacon Light society met on Friday and listened to a paper by Mrs. Hazel Peterson on the "Life and Works of Paolo Veronese and Jacopo Tintoretto," a vocal solo by J. L. Tanner, and a discussion of Shakespeare's Othello, by Miss Marian Hendricks.

Professor Hall lectured before the Boxelder County Teachers' Institute at Brigham City last Saturday.

Prof. Wright left on Tuesday to visit the art exhibit in Ogden and Salt Lake City, in both of which he has entered some of his portraits and landscapes.

Prof. Peterson spoke very interestingly to the students in devotional exercises on Monday. His subject being, "The Stanford University."

The Usona society will give the last leap year ball of 1904 on Thursday evening of next week. It is needless to say that the event will be a complete success.

The students were treated to an excellent lecture of the "Habits and Customs of the Samoans" at devotional on Wednesday. Joseph Quincy, who spent four years on the islands, was the speaker, and his lecture was one of the most interesting of the year.

The faculty and the students of the college are rejoicing over the news received today from Ogden that Prof. A. B. Wright has won the Utah state prize of \$200 for the best original painting by a resident Utah artist. The portrait of Miss Richards, which won the prize, has been a favorite among the faculty, and has often been praised by visitors to Prof. Wright's studio.

The college will adjourn for the Christmas holidays on Friday, and will reconvene on Monday, Jan. 9. A Christmas program will be given during the devotional exercises on Friday, Dec. 23. The arrangements are in the hands of the following committee: Prof. Vernon, Hall, Chamberlin, Robinson, Card.

Prof. Wolfe delivered a very interesting lecture on Friday evening in the assembly hall, before a large audience, his subject being "Six Months in the Land of Long Ago."

Last Friday morning at devotional Miss Lillian Oliver and her pupil, Miss Lillian Hall, rendered a fine piano duet to the students of the college.

AGRICULTURAL COLLEGE.

Logan.—Gov.-elect Cutler spent Tuesday at the college. In the morning he addressed the students at chapel and then inspected the college equipment from shops to barns. At 1 o'clock, in company with the president and the chairman of the various college committees, he partook of lunch served by the domestic science department in the college dining room.

The recital given Saturday evening by the faculty of the college school of music was well attended. The many admirers of Mr. Thatcher, the director of the school, filled the college chapel and greatly enjoyed his rendition of several of Schubert's songs. Instrumental numbers were also given by a trio, consisting of Mr. Thatcher, cello; Mrs. Sloan, piano, and Mrs. Linnarz, violin. Two selections were sung by a quartet, consisting of Mr. Thatcher, Instructor Hanson, Mrs. Sloan and Mrs. Linnarz. The excellent work done by all was much appreciated both by students and townspeople.

A unique affair was the Dutch Christmas party given by the Sororia girls Monday evening in the college gymnasium.

um. The hall was decorated with Christmas greens, minus mistletoe; a large fire burned in the fireplace before which hung stockings of all sizes, and the 30 young women of the club, fetchingly gowned in Dutch peasant costumes, received their guests in a charmingly hospitable manner. Nearly all the members of the faculty, with their wives and many townspeople, were present, and after an evening of dancing, all felt that this was the most enjoyable event of the college year.

Prof. L. A. Merrill spent the latter part of this week in Salt Lake City closing up the season's work on the alkali fields that the college owns about four miles in the west of the city. This farm contains 40 acres and has proved a very successful experiment, for it has produced the past year large crops of hop, oats, barley and sugar beets, the alkali which at first was deeply crusted over the whole surface, having been removed by deep disking.

Dr. and Mrs. Whitte recently entertained at dinner all the students in college that come from St. George.

Prof. R. W. Clark started last Monday his free clinics in veterinary science. They will be given every other Monday.

The rehearsals of "She Stoops to Conquer" began last Tuesday evening under the direction of Prof. Upham and Miss Moench. The chief roles will be taken by Miss Jacobson, Miss Love, Mr. Ritter and Mr. E. G. Peterson.

During his recent Farmers' Institute trip, Prof. Clark visited many creameries and was much surprised at poor dairy work which is being done throughout the state. He has therefore had sent to dairymen and farmers a printed announcement of the special winter courses to be given at the college this year, emphasizing the pecuniary advantages of scientific and practical training in this line of industry.

The first of a series of monthly college entertainments will be given on Monday evening in the college chapel by the college band of 31 pieces. The series is called the "Tyson series" from the "Little Tyson," an opera which will be given by the students and will form the chief entertainment of the series.

Prof. L. A. Merrill has received the past week a complimentary copy of "Cereals in America," by Thomas P. Hunt, a former professor of his at Cornell.

Letters received this week by President Kerr from various parts of the state, with reference to the winter courses offered by the college indicate much interest in the work to be given and a large winter registration of students.

One of the walls of Prof. Arnold's classroom is now adorned with a magnificent battle axe, presented by the students of German I, whether as an expression of gratitude for past favors in the axe line or as an exhortation to "go on the axe" some more, the instructor of the class is unable to decide.

The experiment station report on the arid farms is now in the hands of the printer and will be out during the holidays.

The second of the receptions given by

There's only one

PLUTO WATER
KING OF LAXATIVES

so you needn't fear getting a substitute, there is none. Modern invention can't cope with nature—Pluto comes direct from the springs to you—always reliable, always the same.

15c, 25c, 35c. All Drug Stores. Bottled at the Springs only, and owned exclusively by the FRENCH LAX SPRINGS HOTEL CO., Thos. Taggart, Pres't. French Lick, Indiana. "ON THE MONON ROUTE."

the Woman's league to the young women of the college took place in the gymnasium on Wednesday afternoon. A literary and musical program was carried out and refreshments were served.

On Tuesday the Sororia young women attended in a body the funeral of a sister of one of their numbers, Miss Suzie Powell.

At the Monday meeting of the Agricultural College Woman's club, Miss Elizabeth Smith, the librarian, described Peterboro cathedral, and Mrs. Ergle talked enthusiastically about Westminster cathedral.

CEDAR CITY BRANCH NORMAL.

Cedar City.—The hall given by the girls of the normal to those who worked on the skating pond was decidedly successful. Not the least attractive feature was the domestic science room, where dainty refreshments were served. Something over 100 tickets were sold, so the proceeds netted a neat sum for the treasury.

Since the arrangements for a game of ball have been perfected, the boys are doing a great deal of practicing every favorable afternoon. The weather thus far has been so pleasant as to make it possible to have a game nearly every day. It is planned to have the game in St. George on Dec. 23.

One case of smallpox was brought to Cedar City last week by a visitor from Farowan. The unfortunate lady is now under rigid quarantine, as well as those others who happened to be exposed. It is hoped to prevent a spread, and the prompt measures taken by the health board are appreciated. The case is a light one.

Students' society has under way a Christmas program for Friday night. The male chorus makes its first appearance on this occasion, and a num-

ber of other interesting parts have been planned.

Last Saturday evening Miss Spencer gave a recital. Her readings were varied and very entertaining. She was assisted by Miss Jennie Corry, in a soprano solo; Miss Mamie Jones gave a piano solo; Morgan Edwards a violin solo; and Mrs. Driggs sang a lullaby song.

The county teachers held their institute in Farowan Saturday last.

It has been Instructor Mabey's week in chapel. He gave some stirring thoughts along the line of how to keep well.

Through the efforts of Assistant Principal Driggs, several merchants of the south are buying a lot of good books instead of so many toys for Christmas. In Cedar City the firm of Page & Page is taking great interest in the matter. If the books sell as is anticipated, this firm will make a specialty of choice books hereafter. Mr. Driggs has had little chance to provide themselves with proper reading, however great their desire.

BEAVER BRANCH B. Y. U.

Beaver—Memorial services in honor of Sister Elmina S. Taylor were held by the girls of the school Friday morning. At the request of the Beaver stake officers the biographical sketch and thoughts from Sister Taylor's conference talks, were also given at M. L. A. conference Sunday evening.

The recital given by Miss Adams' students in special education Friday evening was very successful.

The '05 had a jolly time Saturday evening. Old fashioned people played old fashioned games, sang old fashioned songs and ate old fashioned lunch. Elders Heber M. Jew and Chas. Wolfender visited school Monday and spoke in devotional exercises.

The student body held a lively meeting Thursday morning. Resolutions authorizing the body to disfranchise members for persistent violation of rules of the school were read, discussed at some length and passed without a contrary vote. The discussions on the questions show that the organization begins to feel its power as a governing force and will use it for the good of the school.

Miss Crosby's class in sewing has its seamstresses' work on display. The collection consists of children's clothing and shirt waists and does great credit to students and teacher.

The basketball teams are practicing every day. On account of the work done in the gymnasium they have to practice on the campus.

The class of 1907 had a very pleasant party in the concert hall Wednesday evening, Dec. 14.

"I was much afflicted with sciatica," writes Ed C. Nud, Iowa, Iowa, Sedgewick Co., Kan., "being about on crutches and suffering a deal of pain. I was induced to try Ballard's Snow Liniment, which relieved me. I used three bottles. It is the greatest liniment I ever used; have recommended it to a number of persons. All express themselves as being benefited by it. I now walk without crutches, able to perform a great deal of light labor on my farm." Price, 50c. \$1.00. Sold by Z. C. M. I. Drug Dept.

"Make a confidant of a dog; he can't talk."
