## MINING, BUSINESS AND STOCKS

# BINGHAM METAL **ALMOST READY**

This Boston Company Will Soon Start Development Upon An Extensive Scale.

#### HAS EXPENDED ABOUT \$25,000

In Development and Equipment in Past Year-New Compressor Installed.

The Bingham Metal Mining company, organized less than a year ago to develop a promising group of claims in Bingham, has been carrying on a somewhat noiseless campaign and according to H. A. Smith, the company's legal representative, things have been shaped up for the inauguration of work upon a more extensive scale than has been the

The company is controlled by Boston parties and since the organization of the enterprise additional ground has been acquired which makes up a group of 58 claims, for which applications for patent are about to be made. The ground is situated partly in Salt Lake county and partly in Tooele county, the locations covering the main divide of the Oquirrh range of mountains.

A tunnel site has been located over on

the Tooele side, and has been selected as the spot from which the company will carry on its permanent develop-ment work. A tunnel has been run to the length of 250 feet during the past year and the same is to be pushed on as rapidly as possible. The installation of a new air compressor, which will supply energy for the operation of five drills, is about completed, and the plant will probably be in commission within Mr. Smith says the Bingham Metal

company has expended all of \$25,000 for development and equipment, and is in good condition financially to carry out

good condition financially to carry out its proposed plans.

The face of the tunnel now shows the presence of copper, but nothing of commercial value, as yet, has been encountered, nor has it been expected. But by pushing the tunnel into the mountain further, the management expected. pects to encounter large ore deposits at the intersection of the fissure, to-

wards which the tunnel is now headed.

The company has acquired some good water rights in Middle canyon, and the stream is big enough to run the power plant through the medium of a Pelton Supplies are taken into camp

#### ON MINING EXCHANGE.

#### Daly Judge Still at \$11-New York Bonanza Higher.

The forenoon sales ofthe mining exchange did not quite reach the \$12,000 mark today. To be exact, the amount was \$11,278, representing the value of Little business was done on the regu-

lar call, leaving the bulk to the open board. Daly Judge again refused to get away from the \$11 mark. Columbus Con. did business at \$7.55. Nevada (Fills weakened slightly, while New York Bonanza closed somewhat stronger, as did South Columbus of Alta. closing quotations and sales

#### Wandamere. PIOCHE WILL BOOM.

Camp Paper Looks Into Future Optimistically.

completion and termination of the San Pedro into Pioche, says the Record, will make this the supply and shipping point of a territory rich in agricultural, mineral and stockraising for a distance of 100 miles north and west, including Silver Park, Lake Val-ley, Paterson, Cave Valley, White Riv-er, Troy, Little Cherry, Friburg, Silver King, Bailey, Bristol, Jackrabbit, Stam-pede, Lone Mountain, Comet and numerous other camps and valleys east, north and west. It will mark the era of permanent improvement and rapid progress and in a few years Ploche will be the decided metropolis of Lincoln county, if not in fact of the southwest-ern part of Utah and Nevada. It will mean large retail and wholesale establishments, supply houses, machine shop, foundries, manufactories, mills, smelters and every concelvable reduction works, new and extensive water works, large and expensive tunneling propositions, steel holsting frames, elec-trical railroads to the different mines and deep and permanent mining throughout the districts.

The chamber of commerce of Pioche has taken up the matter of advertising and placing before the public the various resources of this section in a re-Pioche will shortly be the scene of ac-

## LEAD BULLION ELECTION.

Officers Chosen at Meeting Held in Provo Last Night.

Special Correspondence. Provo, Ang. 8,-A meeting of the Lead Bullion Mining & Milling company was held here last evening, and the following directors elected: G. H. Heindselman, Geo. W. Gee, Albert Sin-gleton, D. H. Thomas and Arnold S. The company owns valuable ground

in the Duck Creek mining district near Ely, Nevada, on which development work is being rapidly pushed. The mines are within 13 miles of Ely, where the railroad which passes within four miles of the property is expected to reach in a few weeks.

A United States mining patent has been issued to Selah J. Carpenter, Adolph Vom Baur and Ferdinand Christianson for the Success mining-claim in the Tinile district.

## TEAMS ARE SCARCE.

Alta Operators Unable to Move Ore as They Would Like To.

Alta mine operators are having a difficult time to get teams with which to move their ore to the smelters, and for that reason the output of the camp is much lighter than it otherwise would

William M. Wantland, assistant manager of the Consolidated Flagstaff, said before his departure for camp today, that anywhere from 50 to 60 teams could be used if they could be had. His, company has a lot of profitable ore on the dump, but is unable to move it for the reason stated.

The fact that the farmers in the valley are busy with their crops is probably one explanation for the scarcity at the present time. But a little later, it is expected, this trouble will be entirely overcome.

The Columbus Consolidated company,

likewise some of its neighbors, \$3.20 per ton to get its ore moved into the valley. It was reported today that some of the teamsters now at work had intimated that they would demand an increase of 50 cents a ton in the present tariff. If this is the case, and if an attempt is made to exact the extra amount, the chances are some of the operators will wait until some oth-er means of transportation are provided before attempting to get out a large

# BOSTON WANTS WESTERN COPPERS

Walter C. Orem Returns From a Financial Center Where They Are Talked About.

BINGHAM HAS MADE A HIT.

Found Much Interest Taken in Yerrington-Good Reports From Nevada Copper.

Walter C. Orem, manager of the Utan Apex mine at Bingham and the Nevada Copper company, operating the Douglas group, near Yerrington, Nev., returned last night from Boston and other castern cities, where he went partly on business and partly for a little recreation among the pleasure places of New England.

Mr. Orem spent considerable time in Boston, which is the head quarters of the companies with which he is associated, where he found a lively interest being taken in western mining investments, notwithstanding it was vacation time for the investor.

'I studied the situation very carefully," said Mr. Orem today, "and I have come to the conclusion that the coming fall and winter is going to be an ac-tive season for the buying and selling of western mining stocks. There is plenty of money down east for invest-ment in stocks which have merit; people are ready to take hold of anything good, but I also believe that they are becoming educated to the fact that mining, like any other enterprise, can suc-ceed only when it is conducted on business principles. They have awakened to the fact that mining is also just as legitimate and just as safe as any other business, if it is carried out along prop-

"The wonderful progress being made in Bingham has simply astonished eastern people; as it has many of our home folk. The reent letters of Mr. Walker in the Boston Commercial, have also done much to spread the fame of the camp. Bingham is talked about in Boston a great deal right now, and I was really surprised to learn how well post-ed some people are about Yerrington. The fact that Captain Delmar and the Guggenhelms are interested in this Nevada district is well known, and of course I was kept busy answering ques-

tions about Nevada Copper."

Things have progressed splendidly both in Bingham and at Yerrington, during Mr. Orem's absence and he is particularly well pleased with the manner in which the Douglas property is developing. After wading through a big pile of correspondence and getting it out of the way he will go out to Bingham to make a personal inspection of the properties now in his charge, after which he will go to Nevada for the

The Orem syndicate has some big plans on foot affecting its Utah and Nevada enterprises all of which have the soundest kind of financial backing.

## MINE DIVIDENDS.

Uncle Sam Con. Will Post One Today Butte Coalition in Line,

The directors of the Uncle Sam Con-solidated will hold a meeting late this afternoon and a dividend of \$5,000 will probably be posted.

The directors of the Butte Coalition

company have declared an initial quar-terly dividend of 40 cents a share, pay-September 17, to all shareholders of record on August 14.

## MAJESTIC COPPER.

E. E. Abercrombie Says Conditions in Gomer Shaft Are Favorable.

In a Boston publication which came in yesterday's mail, E. E. Abercrombie, managing director of the Majestic copper properties in Beaver county, makes a statement regarding conditions and undertakes to reply to a criticism recently printed by the Boston Com-mercial. Mr. Abercromble says: "During my absence on a visit to

your properties a letter was published in one of the financial papers of Bos-ton in which the writer evidently endeavored to underrate the value of Majestic and thereby doubtless caused more or less uneasiness among those who had invested their funds in this property. The writer of that article did not make an examination of your properties and was, therefore, in no properties and was, therefore, in no position to pass an opinion. He also severely criticised the smelter which is one of the assets of the company, and I desire to say that on my last visit I had one of the best smelter men in the west make a thorough examination of the smelter and he re-

ported on it very favorably.
"The conditions at your properties are most favorable. At the bottom of the Gomer shaft, as we have previously told you, a good body of lead-silver ore is exposed at water level, and in cutting out for the station pump bunches of copper were discovered, showing assays as high as 64 per cent. but no development work can be done until the water is pumped out. At the O. K., where the rich body of high-grade copper ore was found under a previous management, three shifts of men are at work on development with every indication of success, as, when I left, the face of the drift

was in good ore. During my visit this time I made a contract to ship copper ore from the Old Hickory.

"The story having been circulated that your company would default on interest on their bonds due Oct. 1 of his year, I desire to say to you on behalf of the board that the money with which to pay these coupons is in hand; the coupons will be paid promptly through the Actna National bank of Hartford, Conn.

## SILVER KING MILL.

Practise Indulged in Noted by Eastern Publication.

The current issue of the Engineering & Mining Journal contains an interest-ing article on mill practice as it is apits. The writer goes into detail to onsiderable length, but among oththings says: The ore is hauled by a mule in trains

of 10 cars each to the mill bin which holds 2,500 tons. From the bin it is drawn off into cars and taken to plat-form scales where the ore is weighed. The ore is then dumped upon a grizzly with 1-inch openings, the oversize going to a 10x20-inch Blake crusher, the product of which joins the undersize and goes to a 250-ton bin. It then passes to a 0.5-inch trommel, where water is added. The oversize goes to a set of 26x14-inch rolls, while the undersize joins the recrushed oversize and is cle-vated to the 6.5-inch trommet. The crushed ore finally passes to an automatic sampler, which consists of a tilting box which fills with water. The full side goes down and pulls a spout across the falling ore. The lower box

empties, the upper one fills, the box tilts, and another pass of the spout through the ore is made. The sample of ore falls from the spout to a series of three splitters which cut the samples in half each time. Samples are taken about every 15 minutes.

The ore, having been sampled, goes to series of four trommels fitled with a outside spray of water. The first three of these trommels are fitted with perforated screens having 5-16, 3-16 and 1-16-Inch openings respectively, while the last trommel has a 20-mesh wire

The oversize of each of these screens eeds two-compartment Harz jigs, thile the undersize from the 20-mesh reen goes to the V-shaped settling The sands then go to the No. 9 jlg which is also a two-campartment Harz jig, while the overflow goes to two Wilfley tables placed on the table floor. The coarse jigs treating the oversize from the 5-16 in, trommel are side-discharge, while the others discharge most from their concentrates from the butch. These figs make a clean lead product

which goes to the bin on the floor be-low, whence it is drawn into cars and to the sampler. The tails go to a belt elevator and are raised to a Flem-ing dewaterer, or "poddle wheel" as it is called at this mill. This is the original dewatering wheel invented by J. B. Fieming, who remodeled the mill and also was the originator of the remarkable feature of this mill, viz, the concentration of the slimes by filter-pressing. This wheel is also installed at the Dely-Judge mill, where a more perfect type is used, but at the Sliver King it has one feature which the Daly-Judge wheel fails to use, viz., the box in which the wheel rotates has an adjustable side so that the overflow is regulated. By lowering the side more sands go with the water, while by raising it less sands are carried away by the water, s installed at the Silver King only one set of puddles is used. The Fleming dewatering wheel is the one thing which all the fill men in Park City unite in praising.

### DOWN AT SEARCHLIGHT.

Weather is Cooler and Miners Are Getting Busy.

Special Correspondence. Searchlight, Nev., Aug. 6.-As the summer heat is disappearing, there is quite a resume in the activity among the properties that suspended operations at the beginning of the tions at the beginning of the warm spell. Notably among the new operators are the Searchlight Treasurer, Searchlight Vanina, Searchlight Cop-per-Gold, Wyoming Searchlight and the El Dorado Searchlight Mining compa-

During the past week 13 freight loads of machinery arrived for the different mines and many hoists will soon be in active operation hauling and hoisting

The property of the Duplex Extension Mining company has been surveyed for patents and the papers have been already filed. Development work will be in charge of W. W. Hurt, one of the ablest mining engineers in the United States. Mr. Hurt has operated in Europe, South Africa, Australia and in

The Searchlight Copper-Gold Mining company is operating the Eclipse group, eight miles north of Searchlight, and five more claims on Copper mountain.

## CONCENTRATES.

L. Jacobs was in Bingham yesterday on mining business.

The Granby Copper company has declared a dividend of 3 per cent. J. D. Hawkins, manager of the United States Reduction & Refining com-pany, has returned to Colorado.

Col. George W. E. Dorsey, who is exvada, came in from the west today. George F. Gunn, manager of the

pulled out for the west again last Secy, and Acting Manager Lambourne of the Daly Judge Mining company,

departed for camp this morning, accom-The ore and bullion settlements re-

ported late yesterday by McCornick & Company were. Crude ore and conentrates, \$60,000; bas bullion \$75,000. The last shipment of vanners for

use in the Utah Copper company's new mill, according to advices re-ceived at headquarters, will leave San Francisco some time next week.

John W. Royer, general manager of the Lucky Dutchman property in the Crescent, Nevada, district, has returned from a trip east and departed for the southern camp last night, William M. Wantland, assistant

general manager of the Consolidated Flagstaff mine at Alta, went to camp this morning accompanied by Edward Hickman, a Philadelphia shareholder in that corporation

Moroni Heiner, who is working a property near the Carbonate Hill property in Morgan county, was down from camp yesterday afternoon and reports mining conditions very prosperous in that district, The initial shipment from the Lake. rice initial supment from the law-side copper property on Promontory point west of Ogden is expected to reach the sampler almost any hour. This is the property in which How-ard S. Stowe of this city and a num-

ber of Ogden parties are interested, Willard F. Snyder, president of the National Development company, has returned from a tirp to Nevada. While away he closed a deal for the purchase of six additional claims which are to be added to the one which recently formed the basis for

organization of the Nevada-Fairview Mining company. Windsor V. Rice, one of the big men in the Nevada Hills enterprise, accompanied by members of his family, returned yesterday from a very enjoyable trip to Alaska, While in the north Mr. Rice heard considerable about mining in the interior and those in position to know say the output of gold this year will be a record

G. D. R. Turner, manager of the West Quincy mine at Park City, returned from the east yesterday, where he has been on a brief business trip. He left for Park City this morning to make note of development work performed during his absence. He says, however, that good progress has been made with the prospecting of the property with the Davis Calyx drills and some days as much as 20 feet is made with them.

Solon Spire, manager of the Little Bell Mining company at Park City, is out with a monthly statement which says the output of that property was \$15 dry tons of ore during the month of July. For this was received 145,-008.72. Good progress is being made with the work of installing the new compressor and by the first of September the mine will be in shape to report with a larger daily tomage than has been possible heretofore. # PRICE CHANGES NARROW AND DOWN

Small Demand Was Shown on Efforts to Make Sales At Opening.

#### MARKET DULL AND FEVERISH.

A Few Stocks Showed Resistance, Some of the Important Ones

New York, Aug. 8.-At the opening of the stock market teday changes from last night's level of prices were generally narow, many of the prominent speculative leaders selling at unchanged quotations. Great Northern preferred rose 2 and Reading Ps. while Colorado and Southern fell searly a point.

Efforts to make sales at the opening figles revealed a very limited demand. The entire market soon was sold vigorousl; for a time and prices generally gave way to below yesterday's closing. The market afterwards became very sull and feverish but snowed little sign of recovery. Anaconda fell 2, American ice 22 and 84. Paul, W. C. Southern preferred, Brookyn Transit and Consolidated Gas to 1 to the American Ferrage and add 4 points to

Paul, W. C. Southern preferred, Brook yn Transit and Consolidated Gas to 1 to 1½. American Express adued 4 points to its recent sensational rise. Missouri Pacific ross 1, but fell back.

The reaction in prices became more pronounced, the selling pressure centering upon St. Paul which lost 1½ and the Harriman stock. Union Pacific, Northern Pacific, Atchison, D. & R. G., Erie second preferred, Smelting, Lead, Colorado Fuciand Distillers' Scurifies all lost a point, Amalgamated Copper 1½, Interborough Metroopiltan 1½ and Sugar 2. Pennsylvania offered good resistance and rose ½ over last night. Northwestern gained 1. Railies were feeble at d led to duliness and heavy tone persisted.

Bonds were irregular at noon.

A few of the important stoks continued to sag slowly but the general list was firmer. Pennsylvania raining 1. An incident of the trading was a 3-point decline on a few sales in New York Central 3½'s. The bonds sold at 82½. Great Northern preferred yielded 2, Wabash preferred 1½ and Canadian Pacifis 1.

The market moved narrowly in the afternoon on light speculative operations outside of Pennsylvania and Amaigamated Copper, in which the room traders managed to trade profitably. A good portion of the morning's losses were made up gradually, but the transcontinental stocks were sold at times American Car gave way 1. Cotton Oil 13, and Minneapolis, 8t. Paul and 8. S. M. 25.

#### PRODUCE. CHICAGO.

Chicago, Aug. 8.—Continuance of wet weather both in the southwest and northwest caused strength today in the local wheat market. September opened is to bligher at 73% to 12% and sold up to 73%. Additional rain throughout the corn belt had a weakening effect on the corn market in general, september was quite firm, however, that we have been been a share to 16 lower at 49 to 49% and advanced to

49%. ... ptember outs opened 5,8% to 5,6%, higher at 31% to 31%, sond at 31% and advanced to 31%. Provisions were inclined to weakness by a 10-cent decline in the price of live hogs. September pork was off 2½ at 11.19; lard was also down 2½ at 8.85. Ribs were 5 cents lower at 9.20.

Cash: Wheat-No. 2 red, 72% 6.4%; No. 3 red, 72% 73%; No. 2 hard, 72% 73%; No. 3 hard, 71% 72%; No. 1 northern, No. 2 northern, nothing doing; No. 3 spring, 72 671.

071: No. 2, 304; No. 3, 30. Close: Wheat Sept., 134; Dec., 454; Corn-Sept., 494; Dec., 454; Oats-Sept., 314; Dec., 454; Oats-Sept., 314; Dec., 454; Oats-Sept., 314; Dec., 454; Oats-Sept., 8, 15; Dec., 48, 14, 40; Lard-Sept., 8, 174; Oct., 8, 874; 68, 90; Rye-Cash, 574; 655; Sept., 574; 6 Timothy-Sept., 4.25@4.40.
