CONTROL OF DOMAIN. We ask that the Woolgrowers' asso-chation, now in session at Salt Lake City. Utah, appoint a committee of not to exceed three men from each of the arid states and territories, active stock-men, to meet the land commission in the near future to confer with them relative to the government control of the public domain, said committee to be instructed by this convention to try to show the commission that under the now existing circumstances it would be better for all concerned to defer government control of these domains until the forest reserve policy is more government control of these domains until the forest reserve policy is more definitely settled, and also discuss the most feasible and fairest way to all persons interested in these domains whereby one person's interests will not be ruined in order to build up an-other's. With due respect, this conven-tion and the people owe this to the president of the United States, as Mr. Pinchot has explained to you. It is further recommended that a meeting with the United States land commission and the members of this committee at some convenient place in the very near future be held, said com-mittee to name place of meeting. We protest against the present fees charged for grazing sheep in the forest reserve as being excessive. The fee charged for grazing sheep is greater in proportion to the amount of feed consumption than that charged for cattle cattle We further demand an equitable di-

vision of the grazing ground in the forest reserves as between sheep and other kinds of stock, and where prac-ticable that each kind of stock should be made to graze within its allotted district. We recommend that the forestry de-

partment authorize the extermination of and pay a bounty on predatory wild animals within the forest reserves; the we favor a uniform bounty law in the different states.
