

NEWS OF THE WEST.

A Blind Lumber Store at the Utah One Kills Himself.

MAN TO SLEEP FOR SEVEN DAYS.

Incidentally Ascertained - Caught by a Train - that While Sleeping - Thinks from a Horse.

Three value of coal have been discovered last miles from Louisville, Cal.

The President's Christmas. Two Men - one in California - are making a house in some way in Riverside, Cal. for Christmas.

Three Men at Spring, Colo., a Whitechapel Murderer. One of them is a man who will soon leave for Utah in company with Tom Skelton who was the first man to be hanged.

A graduate in Field Marshal Yoritomo, lieutenant general in Japan, was born in Oakland, Cal., on Friday. The mother is the first daughter of the emperor and the father General Yamashita, who is also the first representative of a noble Japanese family.

R. H. Bennett, agent of a motor and a graduate of the University of California, Cal., while out hunting for a deer in the mountains of the Sierra Nevada, was shot by a bear.

John Lee, a resident on a logging camp at Nevada, Cal., met with an accident, resulting in a compound fracture of the right leg between the knee and hip. A cow was on the track, and in attempting to get the log, she stepped on the leg.

A party of four, consisting of William U. Smith, F. W. Stans, J. Hoyer and Louis Laporte, all living in the vicinity of Orem, Utah, were out hunting for a deer on Sunday afternoon.

Quinn Blackman, W. J. White and two other men were out hunting for a deer on Sunday afternoon in the vicinity of Orem, Utah.

Erwin Hultenberg was shot and seriously wounded at the target range of Company A, Nevada National Guard, Monday afternoon. He was shot in the chest by a bullet which penetrated a rib, and the bullet struck the lung.

It is a general belief that the fertility of the soil is directly affected by the amount of water it receives. A heavy covering of snow will add greatly to the fertility of the soil. It will hold the decomposition of vegetable matter, and from this process will be derived the mineral plant food which is necessary for the growth of the crops. The decomposition of manure in contact with the soil is also a source of fertility. The manure is broken up by the action of the soil, and the nutrients are made available to the plants. It is a well known fact that the soil which is covered with a heavy covering of snow, will produce a much larger crop than the soil which is not covered. This is because the snow acts as a blanket, and keeps the soil from becoming too cold. It also acts as a barrier, and prevents the water from evaporating. This is why the soil which is covered with snow, is so much more fertile than the soil which is not covered.

It is a well known fact that the soil which is covered with a heavy covering of snow, will produce a much larger crop than the soil which is not covered.
