

ADJACENT CITIES OGDEN.

The City Council at Circles.—Says "Dear Notes."—Notes.

Those who happened to attend the meeting of the city council last night will remember that, with President Bestall and a few of the councilmen as the performers. The petition submitted for the removal of Chief Hindman that evening and the discussion of the measure a little later were穿過 the providers and the consumers, quite the repetition of the week previous, ensued. President Bestall wanted his way and the members of the council could not unanimous agree to it. The meeting was adjourned by the time Mayor Lundy's investigation of the charges brought against the fire chief came to a close, it was safe to say, judging from last night's conduct of the discussion, that no interesting developments will occur. After the council adjourned a star chamber session was held and it alighted the councilmen made an effort to smooth matters over with their chairman. Other than that, they are providence only know what inspired.

Chief Clerk Shuey, of Superintendent Knobly's office at the Union depot, had a novel experience with a star and dumb couple yesterday. Both were probably between the ages of twenty-five and thirty years. They were dressed in dark clothes, and the woman knew and gave him a very pitiful story of their misfortunes and asked for transportation to California, which was furnished them. But this wouldn't satisfy her, so she wanted to go to Europe too, and informed the officials they wouldn't go on their journey until they got it. The mutes became so very annoying to the officials, Chief Clerk Shuey had them conducted to the transportation office and a single ticket was issued. This left them without anything, and last evening they were hunting for Mayor Lundy for relief.

Secretary R. L. Armstrong of the Inter-Mountain Cattle Growers' association has received letters from several governors of western states accepting an invitation to the first annual convention of western cattle growers and stockmen to be held in the Grand opera house in Ogden in April next. The prospects of the forthcoming convention, he thinks, are very flattering indeed.

Mrs. E. Later of Harrisville had the unfortunate circumstance of being bitten in a snake bite, and was in danger of losing her life. She endured such excruciating pain that for a time she was rendered unconscious. Medical assistance was called, and the lady is now recuperating very nicely.

Miss Clark Guy, who was injured Saturday last by having her leg cut off in a fall from a horse, was brought to Ogden yesterday and is now being cared for in the Union Pacific hospital.

LOGAN.

Botted Hosing Claims.—The New Waterworks System.—Lecture by Hon. Moses Thatcher, etc.

Regular Correspondence

Three of the most promising mining claims at the head of Logan canyon have been bonded for \$50,000. Work will be commenced as soon as the snow goes off the hills. It is expected that the establishment of the new copper plant in Salt Lake will have a stimulating effect on the development of copper mines at La Plata and Mineral Point. Several of the claims there have given assays of 30 per cent copper.

The contracts for piping, etc., for the new system of waterworks have been let. The cost of all materials, except lead, amounts to little more than \$15,000. The new system will supply all the water required. The iron required pipe was laid to bring the water down as far as the agricultural college. The contracts now let are for piping and other materials to carry the water from the college into town.

The supply will be ample for all purposes, and there will be a pressure of 140 pounds if desired.

Two old residents of Logan have just died—William P. Bell of the Fifth Ward and Mrs. Ann S. Slavari of the Third Ward.

Mr. David Eccles was in Logan last week making arrangements for the erection of a three-story brick block which he and Messrs. McAllister and Farren, his neighbors, will build in the spring.

The streets are impassable, being filled with snow several inches in depth and still it comes.

Hon. Moses Thatcher delivered a lecture before the literary society of the Brigham Young college on Friday evening. His topic was "Civil Government," during which he spoke on the evils of class legislation. Many such special acts had been passed for the subculture of this people of Utah. One of these had within the last few years been made which was not only bad, but bad to those who pass it, in regard to the trouble between the Bullock-Hock Co. and its miners at Etterea. The officers of the company did not believe in the employment by especially the colored men, and the public officers for the protection of their property, and the law should be sufficient.

The Taylor Dramatic company appeared in Belvoir on Saturday evening. The night was stormy and the attendance poor. The performance was a creditable one.

Incapacitated.

Hicks—And you say that Stiles was shot at by a missive in the public street. What a right it must have given him! He doesn't suppose he'll live over it for years.

Wicks—He'll never get over it. He is as proud as Lucifer about it. He dares himself that he was worth a million dollars.—James Thompson.

Induced.

"Papa," said Jack, "what is extravagance?" "Well, my son," returned the wiser agent, "if you had a seventy-five-cent straw hat blown off into the sea, it would be extravagant to hire a boat for \$1 to go out and get it." —Hargreaves, Young People.

THE REFINERY CONTRACT.

What Mr. Green Agrees to Do for the Booms.
