# Women Will Fight.

London, March 19.-A dispatch to the buly News from Bloemfontein, dated Friday, March 16, says:

Events have occurred which induce some to predict that the war will last edy so long as it takes to march to Pretoria. The educated Boers, even of the Transvaalers, are ready to accept

I am told that a corps of 2.000 women is been formed at Pretoria. It is alled the Amazon corps. All the mem-ies are uniformed in kilts, and are

## Another Lynching in Prospect.

Joplin, Mo., March 18 .- At 11 o'clock might a mob of nearly 2,000 citizens currounded the city jail and demanded tegro who had been arrested in the trening for assaulting a 7-year-old white girl. When the officers refused to surrender him, the mob broke the all office windows and crowded into he office. During the excitement the ights were turned out and the negro snuggied from the building and started for Carthage, ten miles distant. The mob later learned that they had been fooled and started after midnight for aritage, bent on lynching the culprit.

MONEY DEAR IN ENGLAND.

Financial Situation There is Far from Being Satisfactory.

Interest Rate is High, and Cash is Starce, Paralyzing Speculation and Chilling Business Enterprise.

New York, March 19 .- The Times' London financial correspondent cables: Perfect happiness is denied even to the money markets. Here have we been beating the record of your war ban last in, with one subscribed for eleven times over, and every dealer in credit is grumbling like a bear with a sore head.

And the cause is patent enough when the Bank of England's return is exsniked. Before the applications for the loan hegan the market owed the bank about £5,000,000, and it now owes £12,000,000 in spite of disbursements by the treasury, with the consquence that every shilling of approximation of the second hely at four per cent and thinks its stion liberal, but the market grunts 'Ny should the bank be allowed to had our money?" and demands the intant issue of allotment letters. This a easier asked than granted, since the

aumber of applications is about fort thousand, so money discounts were tatt all last week, quite four per cent and for two days brokers aked the per cent on sixty days' re-There seems to be no immediate or approximate chance for the better in prospect, because the market resources its fully engaged even without a loan. and we cannot increase our currency at

will, but must rest altogether on credits from the state bank for increased means. At a point undetermined the bank must check its advances, because the most check its advances, because the more it distends credit, the more sur stock of gold is imperiled. Should, however, the government money be disjurned mostly within the United Kingdom, we may see a more comfor-table state of matters by the middle of April. The true point to bear in mind is that until the bank is paid

produced by this step, as our banking depends on checks far more than on notes. As a matter of fact, the active note circulation of the bank down to 1897 tended to decline, and has gone up since then merely because of the rapid increase in the number

of small branches opened of other joint stock banks. As the bank buys government securities with extra notes, and receives interest thereon with little deduction, it naturally makes the most of its privilege, and this past three years the note circulation has swollen to about  $\pounds 4,000,000$ .

The stock market has failed wholly to respond to the news from South Af-rica. The fact is, stocks are para-lyzed, partly by dread of what the Boers may do to the mines and partly by the enormous hidden speculation for a rise already existing in Kaffir and copper shares. Also four per cent chills adventures in the market and

clogs every form of gambling. New enterprises are putting forth their wares once more, but meet with scant encouragement. Our rallways themselves fume for money, far from readily forthcoming, and the colonial loan of £1,000,000 offered last week was laboriously underwritten at 11/2 per cent below the price at which it was offered to the public. How can fresh capital be found when the market is overhead and ears in debt?

All over the continent also, except in Paris, where strenuous efforts are being made to keep things smooth, credit again is becoming dearer and the German government is finding the sale of the new loan of £12,000,000 that it requires by no means easy except at a price it is naturally not willing to con-

# No Squadron for China.

New York, March 19 .- A special to the Herald from Washington says: Secretary Long expects to receive a dispatch shortly from Rear Admiral Watson announcing the name of the

vessel he has ordered to Taku, China, to protect American interests. "Admiral Watson," he said, "was instructed to send a vessel to Taku to provide protection for American Interests. We have been informed that there is some little trouble in Shan Tung province, and that American mission-aries are in danger. The vessel to go,

probably a gunboat, will take all proper measures to protect American citizens." The secretary said further that there was no thought of sending a squadron to China. It is the expectation of the department that Rear Admiral Watson will select a gunboat, perhaps the Cas-tine, which is at Shanghai, or the Yorktown, or the Bennington. These ves-sels are suitable as to draft. Each has a sufficient force on board to land a detachment to protect missionaries who

may reside at a short distance from where the vessel is stationed. Secretary Long expects that the trouble just reported will be suppressed,and the vessel at Taku will then be directed to return to her proper station.

Rogers. Taking ment to the proposal by the queen of the wearing of the shamrock by Irish soldiers, and as to her majesty's visit man into custody, Langford took the afternoon boat for Tacoma. It is supposed that he took the train for it is a tribute to Irish nationality which California last night.

Infantino is said by Langford to be be an ex-convict, having served twelve years of a twenty year sentence in the State penitentlary of Massachusetts for murder.

### Must Stay in Asiatic Waters.

New-York, March 19 .- A special to the Herald from Washington says:

of carping objection, but as an illustra-tion and lesson, may I point out that Secretary of the Navy Long is puzwards this small thing. I point out is a remarkable example of the slowness and duliness of wit, the want of imaginzled over the report from Admiral Watson that extensive repairs are required for the protected cruiser New Orleans, now at Nagasaki. He has cabled Admiral Watson declining to permit ex-tensive repairs until he knows whether they are necessary, the thistle without interference, while the Welsh soldier could wear the leek, the Irish soldier, for year after year, was sent by some stupid officer to pris-on because he wore the emblem of his retirective. This refusal grows out of the fact that just before the ship left New York for Manila her officers reported that her boilers were in need of repairs which would necessitate two months' work. A board of officers, which inspected the essel, reported that she could get away in two weeks, and the work was finshed in that period.

Admiral Watson cabled that he had rdered a board to make a survey of the abrupt or a hostile answer from the "And now, after all the bitterness of ship. There is a suspicion in naval circles all these years, after the imprisonment, and the snubs, and all the rest, the

to believe the report that the New Or-leans is in need of extensive repairs grows out of the department's action in ordering the vessel to proceed to the Asiatic station without undergoing all the repairs which her officers deemed necessary. The department purposes to keep the ship in Aslatic waters, not-withstanding its understanding that her officers would prefer duty on the North Atlantic station.
