

—A new spider has been discovered at the Ararat diggings in Australia. It is about half the size of the common tarantula, and is banded longitudinally, with alternate stripes of very dark green and gray. The back is furnished with a kind of shell, to which there are fifty entrances, from which young spiders may be seen leaving and again returning after a short stay outside.

—Old Father Bushnell, of Vermont, used to say that the best criticism he ever received on his preaching, was from a little boy who sat at his feet, looking up into his face, as he was preaching in a crowded house. As he was going on very earnestly, the little fellow spoke out, "You said that afore!"

—Child-murder is almost as common in London as in China—so says a leading London journal.

—The dog-star Sirius, known in ancient times by its reddish tint, spoken of by Horace as "*rubra canicula*," and by Seneca as having a more vivid color than Mars, "*acrior ruber*," is now without any perceptible color.
