MINING, BUSINESS AND STOCKS.

SILVER KING IS VERY STRONG.

As High as $60 Per Share Offered for the Stock Today.

STAR CON. WAS VERY ACTIVE

Ajax Shows a Falling Off—Mammoth Higher—Grand Central Sells—Yankee Con. Stationary.

TODAY'S METALS:

SILVER 62⅞

LEAD, $4.00

CASTING COPPER 15¼

Business was not so brisk on the exchange today. Fewer stocks participated, and the value of the business transacted was represented by the sum of $4,902.12. One of the features of the call was the big figure offered for Silver King of Park City. As high as $60 per share was bid for the stock today, which is on the basis of $9,000,000 for the mine. The new developments in the lower levels of the mine are responsible for the sharp advance.

On the whole, prices ruled quite firm today, the most notable exception being Ajax, which, seemingly without any good reason, declined from 48½ to 44 in four sales.

Star Con continues to attract much attention. Over 4,000 shares were traded in today at prices ranging between 82 and 80. The first sale was made at 81½, from which figure the stock advanced to 82, afterwards selling down to 80. The last sale was made at 80¾, and the stocks closed offering at that figure, with 80 bid.

Mammoth was firmer, recording the sale of 100 shares at $2,28½. Grand Central transferred 25 shares at $4.95.

Galena sold from 7½ up to 8, while Daisy of West Dip was handed out on a bid of 1 cent per share.

Yankee Con remains quite strong, though a slight decrease is recorded since yesterday. Thirty-five hundred shares were sold today at 19.

Lower Mammoth was much weaker today, owing, it is said, to indications that the mine will not be made to pay its way out in the immediate future.

May Day was stationary today around 88½, while West Mountain Placer was offered at 6 cents per share.

Daily West was very strong today.

SAMPLES FROM THE BONAZAS.

Will Make the Fair Mineral Exhibit the Best Yet Shown.

RED WING WILL START UP.

Work to be Resumed in Lower Tunnels—Decline in Ajax—Bingham Company's Smelter.

"The mineral exhibit at the Fair, which opens October 2nd, will be the best exhibit that has ever been made in the State," said M. W. Taylor today. Mr. Taylor has charge of the work of securing and arranging the almost numberless exhibits from the different mines in this and adjoining States. Park City will be represented by choice samples from the Silver King, Anchor, Valeo, Daly-West and Ontario, while Mercur will disclose some of its riches in the form of specimens from the Mercur, Golden Gate, Overland, Sacramento, Geyser-Marion, Sunshine and Northern Light mines. Tintic will be represented there by excellent specimens from such mines as the Bullion-Beck, Centennial-Eureka, Mammoth, Swansea, Ajax, South Swansea, Grand Central, Gemini, Uncle Sam, Yankee Consolidated and May Day. Bingham's list will include the Highland Boy, Winnamuck, Old Telegraph, Old Jordan, Mogul, Julia Dean, Congor, Eldorado and Montezuma. The La Sals, Deep Creek, Stateline and other places will also be represented.

Some of the samples weigh several hundred pounds. Besides several cases of samples, there will be about fifty bins filled with ore. Mr. T. W. Jennings expects to furnish what will doubtless be the best copper exhibit ever seen in this city. It will consist of about half a ton of ore from the Grand Gulch, which will average 75 per cent copper. Some hand samples will also be shown carrying 80 per cent in the red metal.

The response by the mining companies of the State to the enquiry for samples has been prompt and generous, but some space yet remains available to anybody who desires to show mineral specimens from any part of the State.

RED WING TO RESUME.

Mr. H. T. Sappington will Manage the Property for the Next Six Months.

Preparations are being made to resume operations at the Red Wing, of Bingham. For several months past the company has extended lessers' privileges to several parties who have been working in the upper levels. It is now the intention of the management to push work in the two lower tunnels, one of which is in 500 feet, theo ther being in about 700 feet. The work will be under the direction of Mr. H. T. Sappington who has interested himself in the property by the purchase of some of the $50,000 forth of bonds issued by the company. The company is just about out of the woods after its vicissitudes of the past few months. Mr. Sappington feels that depth is needed to disclose the ore in paying quantities and to this end he will direct a vigorous campaign. Some of the board will visit the mine in a day or two after which the winter's campaign will begin.

THE SMELTER BUILDINGS.

Work Being Rushed on Two of the New Smelters.

After nearly six weeks of delay the structural steel for the Bingham Copper and Gold company's new smelter has arrived, and is now in place. The building is also nearly covered with the sheet iron roofing. In spite of the fact that work is being pushed as fast as possible the delay caused by the steel company will hardly be overcome and the completion of the smelter will probably be delayed a few weeks longer than was at first supposed.

Joe Dederich, the well known mill builder, is up from the Annie Laurie, and will give his attention to the Highland Boy smelter addition as soon as some of the material arrives. A few men are at present employed. It is expected that the steel will arrive some time this week.

BONNEVILLE CO. INCORPORATES

Capitalization is $40,000—Property the Rhymney Group in Farmington.

A certificate of incorporation issued from the secretary of state's office today to the Bonneville Mining & Milling company of Farmington, Davis county, Utah. The incorporators are William D. Riter of Salt Lake, John Bogan and James F. Bogan, Park City; Thomas Lyons, of Arcola, Illinois; R. W. Barnes, of Kaysville. The capital stock is placed at $40,000, divided into 400,000 shares of the par value of ten cents each. The company's property is situated in the Farmington mining district, and consists of the Rhymney, the Rhymney No. 2, and the Rhymney No. 3. The cash value of the claims is $59,800. Mr. Riter is president, Mr. Barnes, vice president and treasurer; Mr. Lyons secretary and Mr. John Bogan, general manager. These gentlemen, with Mr. James F. Bogan, also constitute the board of directors.

DROP IN AJAX.

Conditions at the Mine are the Same as Usual.

Ajax stock was much weaker on the exchange today, being traded in as low as 44, after hanging around 49 for the past two or three weeks. Mr. Weir is aware of nothing that ought to depress the stock. The management is still driving for the vein on the 1,000-foot level, and in the meantime it is said enough ore is being shipped to pay expenses.

PRICE OF QUICKSILVER.

Is Liable to Increase Owing to the Heavy Demand for the Metal.

Much of the newspaper talk as to the threatened shortage of the quicksilver supply is preparatory to an advance in the market price of that metal in obedience to manipulations in New York, London, and Paris, says the Mining Reporter. For many years past, the price has been controlled by the quotation asked for the product of the Almaden mines in Spain, which are the largest producers of the metal in the world, and have been largely under the control of the French Rothschilds; who have held them as security for money loaned to Spain. When this arrangement was made, mercury was in very active demand on account of its extensive employment in the metallurgy of silver, as well as of gold, and was worth from 90 cents to $1.15 per pound; but with the growth of the concentration and smelting industries, and the abandonment of silver amalgamation mills, the price rapidly receded. These circumstances, coupled with the extensive resources of California in mercury, has kept the metal for many years at about 50 cents per pound, with only a moderate profit to anybody in its production. When the South African gold mines began to produce heavily, there was an attempt made to advance the price, but it was unsuccessful because the California mines were at any time able to and did increase their production heavily and at short notice. Finally as the gold production all over the world began to grow, the demand for mercury has advanced gradually to an amount which equals the supply, so that at the present date there is a real cause for an increase of the price. And the immediate cause of the threatened increase is the impending reopening of the South Africa mines, where, of course, a large amount of the metal is consumed.

The quicksilver mines of the world are producing at present about 4,000 tons of metal annually, of which, in round numbers 1,700 tons comes from Spain, 1,200 from California, 600 from Austria and 400 from Russia. There is a small production in Italy, Mexico, and Australia. There are very extensive but at present unworked deposits in China and Peru, and the Australian deposits are supposed to be susceptible of a greatly increased yield if developed. As the price, which is now about 62 cents per pound, is certain to advance, there is every reason for the American miner to give attention to the metal. It is known to exist in Nevada, Utah, Arizona and Texas, and there are good grounds for expecting its existence at several other places, notably northeastern New Mexico. There will be good money in quicksilver, at least until the Chinese and Peruvian mine are reopened, and possibly for some time thereafter.

To Close Sampling Rooms.

W. B. McDonald was expected to reach town today to take charge of the belongings of the American Smelting company at the erstwhile gold sampling rooms on West Temple street. The last lot of cyanides has been received at these rooms, and in the future the producer will be forced to ship his product direct to the Argentine plant at Kansas City—at least until other arrangements are perfected. Two or three parties are figuring for the business. Mr. George Moore has a new process which he hopes to use to advantage. It may take some time, however, to perfect the fomula, and in the meantime the Sacramento and other properties will sign no contracts but will ship to Kansas City.

MINING NOTES.

The Mammoth of Tintic disposed of 11 cars of ore on today's market.

Two cars of copper ore were marketed today from the Horn Silver of Frisco.

The Montezuma of Bingham was on the market today with two cars of ore.

The Shawmut of Bingham had two cars of concentrates on the market today.

Twenty cars of ore were on the market today fro mthe Centennial Eureka of Tintic.

Supt. R. H. Channing of the Highland Boy at Bingham is in town for a few days.

The Conklin sampler reported 11 cars of ore from Tintic and two from Bingham today.

Two cars of ore were reported today from leasers on the United States property at Bingham.

It is reported that work on the Typo group near the Creole property at Park City, will be started at once.

The Taylor-Brunton sampler reported four cars of ore from Bingham and two from Frisco today.

The shareholders of the Golden Star Mining company will meet tomorrow to consider amendments to the articles of incorporation.

An option on the Liberal and Butler No. 2 at Bingham has been secured by Carl Hayden of Colorado and John Hudgens of Arizona.

Jay A. Czizek, State mine inspector of Idaho, is down from the North and reports interesting conditions in the Seven Devils district.

Hon. A. W. McCune, who has returned from Montana, reports a material decrease in the flow of water in the Watseca mine in Madison county. Development is being pushed and very high grade gold ore is being exposed, some of which runs $2,500 per ton.

A small lot of ore from the Silver King property in Deep Creek was sold yesterday afternoon on controls, showing 22 per cent copper, 15.8 ounces silver, and 60 cents in gold per ton. The lot was a trial shipment, and Mr. Young, who sent it in, says it was quite satisfactory.

The production of the Mount Morgan Gold Mining company, of Queensland, Australia, for the year ending May 31st, 1900, was $3,624,768, of which $1,638,718 was profit. This production came from 239,276 tons of ore (of which 59,291 tons were sulphides, and the balance oxidized) so that the average value per ton was over $15. The mineral is all treated by chlorination.

TRADING OPENED ACTIVE.

Was a Spurt Upward and Then Dullness Came In.

Wall Street's Record Today—Live Stock Fairly Steady—Produce Keeps Strong.

New York, Sept. 26.—Opening prices for the majority of stocks showed slight gains over night but a few prominent stocks were lower. Trading was active and well distributed. A good buying movement arose for stocks which had been recently under pressure. Of this class Tennessee coal was the leader, and rose two points. Sugar, Consolidated Gas and Metropolitan street railway were all a point or more better. Steel stocks generally moved upwards. In the coalers there was a small spurt. Realizing sales met at the advance and there were sharp fractional reactions. The market became dull at the decline. Large blocks of Northern Pacific were unloaded, which put the price under 48. General selling of the list then commenced, but in only a few cases did the losses reach a point. Speculation became dull and steady toward mid-day. Bonds were quiet and irregular.

An energetic drive was again made against the stocks in the final hour, which carried prices to the lowest level. Northern Pacific was driven down an extreme 2¼. The most important stocks were depressed a point or over below last night's closing level. Hasty covering by shorts caused some sharp rallies, the specialties generally and some of the railroads rising to about last night's level. The closing was active and strong, and there were net gains in many stocks.

ST. LOUIS WOOL MARKET.

St. Louis, Mo., Sept. 26.—Wool dull and easy.

BOSTON WOOL MARKET.

Boston, Sept. 25.—The wool market here continues dull and sales ruled light during the past week. Manufacturers are only demanding such quantities of wool as they need in the manufacture of their product. The prices are being held for all kinds of wool, but any pressure to force sales would undoubtedly tend to reduce prices greatly. Territory wools continue to head the list of sales.

Quotations: Territory wools: Scoured basis, Montana and Wyoming, fine and medium, 11@13c; scoured, 50c; staple, 52@53c; Utah fine medium and fine, 16@17c; scoured, 48@50c; staple, 52@53c; Idaho fine medium and fine, 16@17c; scoured, 48@50c; staple, 52@53c. AVAILABLE GRAIN SUPPLY.

New York, Sept. 25.—Special cable and telegraphic communications to Bradstreet's show the following changes in available supplies from last accounts:

Wheat—United States and Canada, east of the Rocky Mountains, increase, 1,534,000 bushels. Afloat and in Europe, increase 3,100,000. Total supply, increase, 4,634,000 bushels.

Corn—United States and Canada, east of the Rockies, increase 1,044,000 bushels.

Oats—United States and Canada, east of the Rockies, increased 794,000 bushels.

Among the important increases are those of the 6,600,000 increase in the Northwest and the interior elevators, and 70,000 bushels at Chicago private elevators.

Stocks of wheat at Portland, Oregon, and Tacoma and Seattle, Washington, decreased 208,000 bushels last week.

Burlington Route

Why! Of course you have heard of the Burlington. Everybody has, nevertheless you will be surprised when you see the train, it's a wonder, and that dinner is immense, the meals cannot be excelled, the neatness of the napery, courteous waiters, cleanliness and service in general are appetizers. The improvements in track have made the Burlington almost noiseless. You can sleep in a sleeper, dine in a diner, smoke in a smoker, read in a library car and recline in a reclining chair car all under one roof. And to make this whole train go the Burlington have the largest engines in the West. They are as big as a house, as fast as a whirlwind, and weigh 114 tons each. You should go over this road to see and ride behind one of those monsters.

Two trains a day from Denver to the East. The Chicago Special leaving Denver at 4:00 p. m. The Vestibuled Flyer at 10:00 p. m. for all points East. Through sleepers daily, Ogden, Salt Lake, Provo to Denver, Omaha and Chicago via Rio Grande Western & Burlington Route.
