DESERET EVENING NEWS THURSDAY APRIL 18 1907

owners are de-e-elighted. A railroad between Tonopah and Ely is the latest thing being talked about in Nevada and sister states. There is a stretch of exceedingly rich territory between these two camps and a rail-road will furnish an outlet for hun-dreds of acres of ground, covering tons upon tons of milling ore. The Golden Arrow: Bellhelen Horseshoe: Hot Creck and Tybo are a few of the real good ones which will open in great shape with the comins of a railroad. It is said Tonopah mining men are now backing a scheme to get a railroad to connect Ely and Tonopah. and the Western Idaho Sugar Com-pany has steadily advanced, and both companies have been put on a dividend paying basis. In our judgment the rise in value will continue. For this reason all who can keep their stock should do so. If you cannot well hold your stock let us sell it for you. To those who wish to buy now is the best time to invest your money. A little Western Idaho Sugar stock can be bought at par; and some Idaho today at \$8.50 per share. The former pays 7 per cent and the lat-In today's local markets, the receipts include five cars of oranges, two cars of lemons, two cars of bananas, two cars of potatoes from Idaho, with brok-en shipments of tomatoes from Florida, stringed bears, raddishes and lottuce from California, and quite an assort-ment of vegetables from Salt Lake county. Texas stringed beans are not a favorite in this market, as the gro-cers say they are too tough for public acceptance. There are no more Cuban tomatoes, as the season has just passed ter 6 per cent per annum dividends on par (\$10 per share). GEO, M. CANNON CO. Rooms 512-51: Templeton Building. 'Phone 57 Bell. some time to bring them up to their full capacity. It is, therefore, very conservative to estimate that it will be at least the latter part of August to the first of Sep-tember before either plant is in effect-ive operation acceptance. There are no more Cuban tomatoes, as the season has just passed for them; but when the Florida Keys railway is completed, immediate con-nection will be made with Havana and then Cuban trults and vegetables will be rushed into the American markets. Spring hand is now on the market. With the growing of the grass milk is becoming plentier and the price of but-ter can no longer be kept up, so that it has fallen a nickel. California new po-tatoes are down 5 cents, rhubard is cheaper, so is htriped bass. Finnan haddies are out of the market, and oysters soon will be. Poultry is be-coming plentier. The prices ruling to-day are as follows: The Boston Consolidated continues The Boston Consolidated continues stripping the overburden from the big porphyry ledge at its Bingham plant and has plenty to keep it occupied with for the present time. The railroad facilities by which both companies will handle their big daily production must also receive some atcompanies will handle their big daily production must also receive some at-tention before the Copper Belt railroad, which is already overtaxed, is put to the extra strain of moving this big tonnage of ore. New locomotives have been ordered, but it is questionable whether this will solve the problem.---Boston Financial News, day are as follows

BIG DIVIDENDS.

Copper Companies Announce Coming Twelve Dollar Distribution.

New York, April 18.—Directors of the Amalgamated Copper company de-clared a quarterly dividend of 1½ per cent, and an extra dividend of half of one per cent. This dividend is un-changed from the last previous quar-ter. Directors of the Boston and Consol

idated Copper & Silver Mining com-pany declared a quarterly dividend of \$2 per share, and an extra dividend of \$10 per share.

JUNE WEDDINGS

see samples. THE DESERET NEWS

The mine will pay from the very first shovelful of dirt moved-something un-usual, even in this age of every-day sensations. The shipments to be sent right away will net the company is nice little sum. The ore being scraped off the surface will net enough money to pay for deeper working, and as ore is extracted from additional deepth it will increase in richness, promising money needed for still deeper work and assuring a growing bank account be-sides. With an increased working force and teams at work the Utah-Esmeralda is going to make a noise like a big pro-ducer. Copperfield, the new town, is now a city of tents but building will commence within a short time. The territory in Flitting and other surround-ing districts is being taken up rapidly. **SHIPPING IS RESUMED.** The recent storms and resultant bad roads have prevented shipping being carried on from the Colorado in the Tintic family. Ore has been accumu-lating in the bins and there is now 30 tons of good stuff ready to be haul-cd to the railroal. Hauling was re-sumed at the first of the week and will be carried on right along if at all possible. Ore has not been reach-ed yet on the 300-foot level but it is Stringed beans, per pound . Wax Beans may be actually \$2,000,000 surplus when the bank opens its doors for business. There will be only the friendliest of relations with the Na-tional City bank heretofore known as the Copper Bank of New York. The new institution could probably start with deposits exceeding \$10,060,000 if it thought wise to do so. On the contrary it is considered the part of window by the directors to becontrary it is considered the part of wisdom by the directors to be-gin moderately and show a steady and continuous growth there-after. But little of the stock of the new bank is held in this city. We understand that the Davis Daly Estate Copper company has struck the Thomas lode in the original cross-cut at a depth of 1.800 feet and that they are in 20 feet in ore with no foot wall in sight. The assay values of the ore have not been ascertained they are in 20 feet in one with no foot wall in sight. The assay values of the ore have not been ascertained but it is stated that are is the average of the district. It has taken longer than anticipated to reach the Thomas lode, but it is apparent that the ore bedy dipped more to the south than was estimated from surface indica-tions. In addition to the Thomas lode, three biling stringers were cut in Davis Daly ground in the original cross-cut drifting upon which may open important ore bodies. South of Thomas lode are seven known veins and all will be cut before cross-cutting is suspended. Under the agreement between the Davis Daly company and William A. Clark, the former com-pany can use the original shaft for the holsting of its ore. It is estimated that the Davis Daly company will be-gin the production of ore from its Smokehouse shaft and possibly also from the Thomas lode within two months. FARM PRODUCTS. months. Amalgamated Copper dividend pay-able May 27, books close April 25, and re-open May 6, Annual meeting June 3. Books close May 13, and re-open June 4. UNCLE SAM AND MAY DAY. When the first news was whispered around that Uncle Sam was making advances to May Day the wondering ones reasoned thus; "Now there's something doing. The Uncle Sam crowd is a quick to think, slow to act aggregation of keen mining judges so May Day must have some attraction." This attraction is believed by many to be the possibility of the Eeck Tunnel's wein running through the Uncle Sam to MEATS AND POULTRY.

LOCAL MARKET REPORT.

the district mineral strikes and great activity prevail. A stampede ten miles to the south where prospectors are opening up a new rich gold terri-tory, occupied the early part of the week. Much country was staked. This new country will be tributary to Versen and preparis belows to the Vernon and properly belongs to the Seven 7 Right

Seven Troughs mining district. Right on the town limits of Vernon several important strikes have oc-surred of late. Important among these several curred of late. Important among these is the discovery of a fine quartz velu on the Annie and Josie claims with average assays running into the hun-direds. Not less important is the con-tinued exposures of rich gold quartz on the Buckhorn partially owned and managed by Mr. Moler. These dis-coveries are revealing a territory whose richness is exceeded by no prop-erty in the camp. erty in the camp. The Vernon-Nevada near the west

town limits of Vernan is drifting into very rich ground. The Seven Troughs Vernon has been sacking ore for some Vernon has been sacking ore for some time, and the appearance of H. W. Knickerbocker, one of the principal owners in the camp, is the signal for increased activity. On the Golden Treasure north of town, Fred Redmond is cross-cutting to the vein from both sides of the hill for the marvelous rich wein that approx on the creat of the vein that apexes on the crest of the

The Monette-Truitt crowd of lessees from Goldfield, Milton M. Detch and Ray D. Harris and other lessees on the grounds of the Seven Troughs Mining company are paying no attention to the continued rich surface exposures but are sending their work-ing shafts down to depths of several hundred feet without a halt or a cross-

Up at Stone House at the north end of the big district W. F. Farrell has exploited his great vein of over 20 feet in width to a depth of 50 feet and feet in width to a depth of 50 feet and assays taken from the shaft bottom at this point have caused a veritable stampede into this region. The stam-reders are now returning with mar-velous tales and samples of ore show-ing gold to the naked eye. The net result of all these activities is a boom for the towns along the Seven Troughs porphyry belt. Vernon Seven Troughs and Mazuma are grow-for with leave and bounds. Building

with leaps and bounds. Building operations are creating a transforma-tion in these towns weekly. Five auto lines, two stage lines and numerous private conveyances are taxed to carry the travel.

ON TRIP OF INSPECTION.

W. T. Snyder. Grant Snyder and Col. N. Treweek Are in Fly.

Willard F. Snyder of Salt Lake, president of the Ely Consolidated Copper company, Col. EXCHANGE FOR ROSEBUD.

Former Salt Laker, W. J. Lawrence is President-Building Started.

Special Correspondence.

Rosebud, Nevada, April 14 .- At a arge and enthusiastic meeting held at he offices of the Rosebud Investment the offices of the Rosebud Investment Co., last night the organization of the Rosebud Mining & Stock Exchange was completed and the following directors were elected: W. J. Lawrence, A. F. Dixon, J. R. Van Flect, John G. Guerin, R. L. Thomas, J. W. McLisle and Geo. L. Tomb. At the meeting of the direc-tors the following officers were chosen: L. Tomb. At the meeting of the directors the following officers were chosen: W. J. Lawrence, president; A. F. Dixon, vice president; G. L. Tomb, temporary secretary, and R. L. Thomas, treasurer. The membership of the exchange has been limited to 75 members and 60 have already here subscribed for The ave.

been limited to 75 members and 60 have already been subscribed for. The ex-change has secured a lot and a building committee has been appointed to sub-mit plans for the building and it is the intention of the organization to rush the building to completion as fast as possible and it is confidently hoped that ere 80 days has clapsed the exchange will be housed in its own building. It is intended to make the opening of the exchange an epoch in the history of Rosebud and invitations will be ex-tended to all other exchanges over the country to assist in the ceremonies.

Country to assist in the ceremonies. The great showing that has been made on all the properties in this dismale on all the properties in this dis-trict is attracting attention from min-ing men all over the country and every stage brings in a number of investors who are in search of property. The universal opinion of all mining men who have covered the sround is that for a camp so young the showing is marvelous.

No other remedy on earth is so good for children as Hollister's Bocky Mountain Tea: makes them eat, sleep and grow. Eright eves, rosy checks. 35 cents, Tea or Tablets. Z. C. M. I. Drug Dept. 112-114 So. Main St.

ating in the oins and there is how 80 tons of good stuff ready to be haul-ed to the railroal. Hauling was re-sumed at the first of the week and will be carried on right along if at all possible. Ore has not been reach-ed yet on the 300-foot level but it is expected a short drift will lead into it. The cre being taken out now is believed to be a continuation of the Beck Tunnel's bodies and should this belief be correct the Colorado will prove to have big bodies of high grade rock. The Beck Tunnel is working in ore which makes possible. o monthly distribution of \$4.000; money being paid into the treasury at the same time and all expenses being paid as affairs progress. The Beck Tunnel is hurrying preliminary work in order to get its double compart-ment shaft in and working as soon as possible. Both the Beck Tunnel and Colorado are well managed. and Colorado are well managed

GUESSES "APRIL 1."

Eastern Paper Thinks Big Concentrators Will Not Start Until Then.

Boston.-The failure of the Utah Copper company to get its big con-centrator into operation on April 1, the date set for its operation, emphasizes the difficulty that is met with in get-ting large sized plants organized. All of the parts of the big mill are in place, with the exception of the big engine which is to furnish the motive power for the mill. This has not yet been shipped from Milwaukee, and aft-

power for the mill. This has not yet been shipped from Milwaukee, and aft-

been shipped from Milwaukee, and art-er it arrives at the property some time will be taken to get if into place. The company has been operating its tables and some of the parts of the mili with such motive power as has been already installed and hopes to have the big plant in perfect adjustment by the time that the engine is ready for action Tables averating into consideration. big plant in perfect adjustment by the time that the engine is ready for action Taking everything into consideration, it is very doubtful as to whether the big concentrator can be got into opera-tion before Aug. 1, although part of the plant may be ready before that time. The mining end of the property is more than ready to furnish the concen-trator with needed material. Four big steam shovels have been installed un-derground and the company will be ready to send ore to the surface in any quantity just as soon as the mill is capable of handling it. The shovels are being used at the present time for enlarging the openings that have been already made, and in placing in view large ore reserves for the turure good of the big proposition. The small plant in Bingham canyon which can handle about 1,000 tons per day is being fed from the development work that is being done in the big por-phyry ledge along. The Boston Consolidated, which is operating upon the upper part of the same ledge that the the the same ledge that the the

The Boston Consolidated, which is operating upon the upper part of the same ledge that the Utah Copper has developed further down in the canyon, has again begun its stripping operations using the same type of big steam showels that have been found so ef-fective in the Superior iron properties. The company expects to have its first unit, which will have a stated capacity of 2,500 tons per day, ready by June 1, but it will probably be nearer Aug. 1 before the company gets into operation. The Boston Consolidated, however, continues the shipment of sulphides steadily to the Garfield smelter, which, when the company gets to using more of the product, will provide it with a big income in addition to the money made through the handiling of the por-nhy.

be the possibility of the Beck Tunnel's vein running through the Uncle Sam to the May Day. It has been asserted that the alay Day will have 800 working feet on this vein. With a vein of high grade ore running through two proper-ties, the wisdom of the consolidation of both needs no explanation. It is under-stood the May Day is to be reorgan-ized for a million shares of which the Uncle Sam will got 500,000. Just how the trade will be figured is not known.
