REARER OF CHILDREN.

Ah! what would it be to us
If the children were no more?
We should dread the desert behind us
Worse than the dark before.

What the leaves are to the forest
With light and air for food,
Even their sweet and tender bodies
Have been hardened into wood;

That to the world are children:
Through them it feels the glow
Of a brighter and sunnier climate
Than reaches the trunk below.

Come to me, O ye children!
And whisper in my ear
What the birds and the winds are saying
In their sunny atmosphere.

For what are all your contrivings,
And the wisdom of your books,
When compared with your carcases,
And the gladness of your looks?

Ye are better than all the ballads
That ever were sung or said;
For ye are living poems,
And all the rest are dead.

SPRING TREATMENT OF COWS.

Farrow cows that are being milked and fattened at the same time, must have an abundance of rich food—say four or five quarts of cornmeal per day, with cut stalks or hay. Beef is now low, but so are milk-cows, and it will probably be better to dispose of farrow cows that are fat than to keep them another season. If liberally fed we have known them milked up to the time they were sold to the butcher, and still prove very fat inside. As a rule, however, the butchers will pay a little more if they have been dry a few weeks.

Cows that come in before the first of April will now, in ordinary dairies, be allowed to go dry. In the majority of cases they cease to give of their own accord. With warm stables and liberal food, some cows will continue to give milk nearly or quite up to calving. A cow with great digestive powers, that will keep in high condition, nourish her calf, and give milk, may be allowed to do so. In fact, it is probably better to keep on milking her. There will be less danger of milk-fever after calving. But such cases in our experience, are rare. It requires liberal food and the best of treatment to keep such a cow in vigorous health. As a rule, the average good dairy cow requires and will well repay a few weeks' rest at this season. And we need seldom be afraid to feed liberally. Any fat accumulated before calving will, in the case of a good milker, find its way to the butter-tub.

For ten days or two weeks before calving, it is well to give laxative food, such as branmash and linseed tea, or, if this is not sufficient give a pound of Glauber salts, or half-pound of Epsom salts, and a table-spoonful of ginger. In case of very fat cows, it is well to give this dose once a week for three weeks or a month before calving, as a preventive of milk-fever. —American Agriculturist.

The Great Snow Blockade.—What It Cost.

The consequences entailed by the great snow blockade on the Union Pacific road are computed to be equal to the loss by the Chicago fire. Not only is the entire commercial exchange between the Atlantic and Pacific coasts suddenly and completely arrested, but also the business of Europe with China and Australia, which has within a comparatively short time, begun to flow happily through American channels, has been dammed up for months together, an experience which will probably tend to drive it back to its old courses for at least five out of every twelve months. The car-pool of two eastern steamers, which were loaded at San Francisco for the Hawaiian Islands, and were to have sailed on the 15th inst., have been delayed by the blockade, and are now lying at anchor in the harbor of New York, long since past the time when the goods themselves, the sale of which was to provide the means of payments lying useless between the snow-drifts of Wyoming. One single banking house in New York estimates the loss of the Pacific railroad and the damage to its equipment, of which twenty-five locomotives are laid up for repairs, thus effectively crippling its freight capacity for some time to come. —Chicago Journal of Commerce.

Mortality Among Infants With and Without Mothers.

Dr. E. Harris, of the New York Board of Health, who has contributed some important knowledge on the subject of the public health in large communities, now furnishes some facts in regard to the history of foundlings and orphans in hospitals. The contrast between the results of treating children with and without their mothers is almost startling in its evidence of the absolute necessity of a mother's care. Dr. Harris shows that in the almshouse infant hospital on Randall's Island the mortality in the founding class of infants was 70 in 100 of the whole number received in one year, while the rate of mortality of children received with their mothers admitted was only 19 in 100. The fact is indisputable that motherless foundlings die at the rate of from 70 to 80 in every 100 unless wet-nursed during the first year of life. And, further, the fact is clearly shown, in the experience of the infant hospital, that even the spoon-fed infants, cared for by their mothers, have far better chance of life than those fed in the hands of strangers. The rate of mortality in the foundlings and orphans when artificially nourished has proved to be 70 to 80 in 100; when fed artificially by their mothers, only 30 to 40 in 100. This result is worthy of all attention, as associated with moral and economical conditions never to be overlooked. Infants abandoned to the street, wet-nursed in the asylums, or "farmed out," die at the rate of 80 to 90 in every 100 in the first year of life in American cities, and this is far better than is shown at the Montreal Foundling House, which has buried 94 of every 100 received in six years. —E.

MODELS! MODELS!

MRS. JOSEPH BULL
She teaches the popular system of CUTTING by the Celebrated
CURTIS Mathematical MODELS.
Every family in the Territory should be in possession of them. They will enable you to CUT and FIT PERFECTLY, and are without trying on, all styles of Dresses, Skirts, Coats, Waists, Corsets, etc., etc. Also the LATEST FASHIONS. Also Children's Clothing, Coats, Pants and Vests.

THE ABOVE MODELS INSURE A PERFECT FIT!

SP—Ladies desiring to test these facts can do so by calling on Mrs. J. Bull. Her home is at 1014 Broadway, between 1st and 2nd Sts. CUTTING and FITTING made, PATTERNS CUT TO ORDER.

JOHNSON'S

HOMEMADE

FAMILY MEDICINES!

Warranted to be Better! than
the Best Imported, and Give
Ample Satisfaction.

BONNETT'S PILLS.

Purely Vegetable. They cleanse and purify the blood, strengthen the bowels, act powerfully upon the liver, kidneys and urinary organs. Break up fevers, strengthen digestion and bring the body back to health to face emaciated. Are tonic, cathartic, stimulant, and soothe, by removing the cause of disease. Are safe and harmless in all cases where cathartics are required, for either sex, for young or old. Try them fairly, and you will never use any more imported pills.

Price 25 cts.

EYE BALSAM.

For diseases of vision, weak or drooping eyelids, inflamed eyes, old ulcers, sores, ringworm, itches, cracked or sore lips, hands, etc.

Price 25 cts.

ROCKY MOUNTAIN LINIMENT.

This liniment cures every ailment for rheumatism, neuralgia, sprains, bruises, stiff and weak joints, painful swellings, contracted cords, lameness, all diseases of horses and cattle that require outward application. It acts like magic; try it and be healed.

Price 25 cts.

WHOLESALE AND RETAIL.

AT

Zion's Co-Operative

Drug Store,

Salt Lake City.

And at most of the Co-operative Stores

146,000 SINGER SEWING MACHINES

WERE SOLD WITHIN THE PAST YEAR.—Scientific American, June 10, 1911.

The Singer Manufacturing Company,

AT THE WORLD'S FAIR

—Constituted by the homes of the people—

Received the Great Award of the Highest also and have left all rivals far behind

Sold in 1910 127,933 Machines!

SEWING MACHINE SALES FOR 1910.

The magnitude to which the manufacture of Sewing Machines has attained is shown by the

fact that the Singer Manufacturing Company has sold more Sewing Machines in the year 1910

than in any other year since it began its manufacture. According to these returns

the number of machines sold by each manufacturer in 1910 is as follows:

The Singer	127,933	Florsheim	17,800
Wheeler & Wilson	52,500	Gold Medal	8,912
Brother	35,000	Kenner	5,500
Grover & Baker	25,000	Kenner	5,500
Wood	20,000	Kenner	5,500
Wilcox & Gibbs	15,000	Kenner	5,500
American National	10,000	Kenner	5,500
and Oversewing	11,573	Kenner	5,500

And several other companies who sold a few machines.

It will be seen by this table that the popularity of the Singer Machine far exceeds that

of all others, their sale being one-half greater than even that of the famous "Wheeler &

Wilson" machine. This is owing to the fact that the Singer Company have lately com-

pleted a new and improved machine, which is so simple, so easy to operate, and so

perfectly adapted to the needs of the home, that it is selling at the rate of one to one

hundred better than their old style. Their total sales for 1910 were 127,933 machines against the

127,933 of 1909, showing an increase of one-half in the latter year.—New York Sun.

One-half of our Gigantic Sales, now nearly:

THREE-QUARTERS OF A MILLION

Machines Sold,

AND ALL IN PRACTICAL USE. WERE MADE WITHIN THE PAST THREE YEARS!

But the greatest proof of our sales over all other Machines, being within the past year

This is incontrovertible proof that

Our Machines are the Best in the World!

The New Family Singer Sewing Machine,

With Attachments for All Kinds of Work,

is fast winning supreme favor in the household, as shown by the rapidly increasing sales, over

all other machines.

This New Family Machine is now capable of a range and variety of work such as was

formerly thought impossible to perform by machinery. We claim and can show that

it is the cheapest, most easily operated, and most perfect of all sewing machines, and

it is the only machine that will sew all kinds of fabric, from the finest to the coarsest, and

it will sew all kinds of work, from the simplest to the most complicated, and it will

sew all kinds of work, from the simplest to the most complicated, and it will

sew all kinds of work, from the simplest to the most complicated, and it will

sew all kinds of work, from the simplest to the most complicated, and it will

sew all kinds of work, from the simplest to the most complicated, and it will
