

WINNING BUSINESS AND STOCKS.

RALLY IN SIXTEENTH BRINGS A BIG CROWD

Judge W. H. King Reviews the Political Situation and Shows Evil of "Ring Politics."

The rally in the sixteenth ward amusement hall was well attended last night. Councilman John Holly presided and introduced Joseph S. Hyde, candidate for the council from the First ward, as the first speaker. He declared that the best possible results could be obtained from a non-partisan business administration by picking out the best men for the city government.

When William H. Wallace entered the hall at the close of Judge King's speech he was vigorous and animated. He declared that the prospects of the fusion candidates were bright, and that the voters of the city had given the movement considerable encouragement. He pledged himself to give Salt Lake a clean business administration and declared that he would make every effort to curtail the social evil and the saloons. At the close of his address he was hurried in an automobile to another meeting.

WEATHER AFFECTS TRADING.

Colorado Is Stronger on the Local Stock Exchange.

The weather had its effect on the local stock exchange this morning and trading was slow. The trading this morning ended the week of the exchange for the week and the month of October. A comparison of what has been done in the month of October has been done during the present month shows that trading as far as the amount of business was concerned was below standard, but the volume of business was above the average.

Colorado was stronger this morning. Its strength is believed to be due to the dividend expected next month. One block of 42 shares of the stock of the Colorado Fuel and Iron Co. was sold at 11.25, while 200 shares were disposed of at 11.25. Grand Central was more active than it has been in several days although there was some sagging in the price. Iron Blossom showed but little change from yesterday. Provo continues to attract considerable attention and was selling at 9 1/2 and 10 cents this morning. Sioux Consolidated was quite active today around 62 and 63 cents.

The total number of shares disposed of was 66,442, while the amount represented was \$1,337,225. The sales for the week were below the average and 33,324 shares of stock changed hands at \$193,616.25. The volume of business for the month was above the average. On account of the low prices of stocks there was a greater amount of selling to realize money. The average price of stocks transacted in during the month of October was 30 cents. At present Grand Central, Daily Judge, Silver King and Ohio Copper are the highest priced stocks on the board and trading in them has been limited. Nearly all the more active stocks are under the dollar mark. The total number of shares of stock that have been sold on the local market board during the past month was 2,464,491. The price at which the stocks changed hands was \$463,485.37. There was greater activity on the curb market this morning than at either the regular or open board sessions.

Utah Traction Hill brought 10 cents for 1,000 shares. During the session 3,500 shares of Utah Traction Hill were sold at 40 cents. Bingham Central Standard was one of the most heavily traded in, and 500 shares sold at 35 1/2 cents, buyer 40 cents. 200 shares of Utah Traction Hill were sold at 35 cents. Nevada hundred shares of McDonald Ely went at 40 cents and 200 shares of Mammoth sold at 41. The only other sale on the local market board during the past month was 1,000 shares of Columbus Extension at 10 cents.

TINTIC ORE SHIPMENTS.

The following were the ore shipments out of the Tintic district for the week ending Friday night: Cent. Eureka, 42 carloads; Uncle Sam, 3; Chief Consolidated, 2; Eagle & Blue Hill, 4; Iron Blossom, 15; Colorado, 12; Sioux Consolidated, 18; Beck Tunnel, 3; Ophongong, 2; Swansea Consolidated, 1; Gemint, 2; Carisa, 1; Grand Central, 2; Victoria, 4; Mammoth, 2; Scranton, 5; Scotia, 5. Total, 128 carloads.

CONCENTRATES.

Superintendent Andrew of the Utah Traction Hill property at Park City is in the city.

Manager Grant Snyder has returned from a trip to the Beaver Carbonate property at Beaver.

Word was received from Superintendent William Lloyd of the Centennial Flinche property yesterday that the shaft is now in a highly mineralized manganese and shale, such as was encountered in the Prince Consolidated before reaching the ore.

This is regarded as the best possible proof that the Prince ore bodies extend into the Centennial Flinche ground. The shaft is now down 275 feet.

For some time it is understood that a consolidation of a number of Alta properties has been talked of. The consolidation as proposed would include the City Rocks, Prince of Wales, the Richmond, the Carisa, the Woodman and others and a strong combination would be formed that could develop the huge territory property. This far reaching definite has been done and terms have not been talked of.

Judge S. W. Dyer of Portland, Me., American representative of the English syndicate which controls the British Federal mine, now known as the North Utah Mining company of Bingham, and Arthur I. Pearce of London, consulting engineer for the company, yesterday visited the property in company with General Manager W. D. Bohm. The mill is now treating 100 tons of ore a day and it is to be remodeled shortly. It is believed to treat 300 tons a day.

BULLION TRANSACTIONS.

London, Oct. 29.—Bullion amounting to \$20,000 was taken into the Bank of England today and \$20,000 was withdrawn, of which \$20,000 was for shipment to Egypt and \$20,000 to South America.

TODAY'S MONEY MARKET.

New York, Oct. 29.—Money on call nominal. Time loans easier; for 30 days, 4 1/2 to 5 per cent; for 60 days, 4 3/4 to 5 per cent; for 90 days, 4 3/4 to 5 per cent.

NEVADA CON. LEADS IN PRODUCTION COST

Comparison of Reports Shows That Nevada Consolidated on Smaller Output Beats Utah Copper.

For some time there has been considerable discussion as to the merits of the Nevada Consolidated and Utah Copper properties and various methods of comparison have been adopted. Since the announcement of the initial quarterly dividend of the Nevada Consolidated, this question has been brought out more strongly. Friends of the Utah Copper have been contending that it has been making the better record of the two, while friends of the Nevada Consolidated have been just as firm in the belief that their favorite was making the better showing. One reason for the contention of the Utah Copper is that the quarterly dividend of the Nevada Consolidated is 3 1/2 cents, whereas the Utah Copper is paying 50 cents quarterly.

A careful study of the following comparative table showing conditions of the two companies, their recent operations and disbursements, shows conclusively, however, that the Nevada Consolidated is in a much stronger position and that stockholders are faring much better than in the case of the Utah Copper stockholders. The table shows that the quarterly dividend of the Nevada Consolidated is 3 1/2 cents, whereas the Utah Copper is paying 50 cents quarterly.

Table comparing Nevada Consolidated and Utah Copper: Number shares, Par value, Quarterly dividends, etc.

LARGER PROFITS.

The most important point brought out in the above comparison is that the Nevada Consolidated on a much smaller production is showing much larger profits and that the income yield at present prices is 2 per cent more than is shown by the Utah Copper.

It is evident, too, that the Nevada Consolidated's cost of production must be at least two cents below the Utah Copper figure.

At the present time the production of the two companies is running about even and the next statement will probably show the Nevada Consolidated much stronger. It is reported that the company has recently been earning at the rate of \$4,000,000 net annually.

It will be noted that the above figures include the proposed increase in the capital stock of the Nevada Consolidated amounting to 400,000 shares, which is to be taken over the Cumberland Ely as this new stock will receive the initial dividend. The Nevada Consolidated has no debts and by the first of the year it is figured that the convertible bonds will be all turned in, leaving nothing but stock outstanding.

Another important point to consider is that this company carries its own copper, not being obliged to obtain advances on it.

As to the future possibilities it is safe to predict that the Nevada Consolidated will increase its dividend rate next year, the expectation being that it will be raised to 50 cents a quarter during 1910. This is assured by the progress now being made at the property and the steady increase shown in production together with the gradual decrease in cost.

MONEY MARKET

SENSIBLY RELAXED

New York, Oct. 30.—The stock market halted and veered in the early part of the week but gathered force for a renewed upward movement as the week progressed.

The opening stock market today showed a good deal of irregularity, sharp gains in specialties being mingled with small declines in the active trading stocks.

Although there were sharp advances in the hands of specialties the general course of the market was downward.
