MINING, BUSINESS AND STOCKS

CON. MERCUR HIT HARD BY BEARS.

Stock Opened Under a Dollar a Share, Closing Weak, With 91 Cents a Share Bid.

DALY-JUDGE MAKES ADVANCE.

Park City Trader Cuts Close to \$12-Daly-West Inactive-Today's Quotations and Sales.

On the Mining Exchange this morning 4,546 shares of stocks were transferred for \$13,111.85.

The feature of the early calls was the severe hammering administered to Consolidated Mercur. In a stagering condition the stock was brought into the pit; as a starter it was offered at 98% cents and before the "bears" let up a sale was marked up at 92 cents. On the contrary, Daly-Judge took on new vigor and advanced rapidly, cutting close to the \$12 mark. Daly-West continued weak and falled to arouse enthusiasm. On the open board a 200 share lot sold at 20 cents. Star. Con. opened weak but improved some. For Grand Central \$3.80 was bid, the stock being offered at \$3.95.

The governing board of the Exchange decided to hold only one session tomorrow on account of the election. The morning call will be held at the usual

LIPMAN'S TUNNEL SCHEME. Mining Man Has Succeeded in Launching a \$3,000,000 Corporation.

M. H. Lipman, formerly of this city, but now an extensive mining operator in the Wood River, Ida., district, has completed the organization of a tunnel company and has succeeded in ealisting local talent in the enterprise.

The officers are Gov. Heber M. Wells, president; Fred J. Kiesel, of Ogden, vice president; W. A. Nelden, treasurer; Fisher S. Harris, secretary, and Mr. Lipman will serve the corporation as general manager. With the ation as general manager. With the above C. E. Hudson and Rulon S. Wells, constitute the board of direc-

tors.

The articles of incorporation of the new company are to be filed at once and it will have a capital stock of \$3,-000,000, divided into 1,500,000 shares. 000,000, divided into 1,500,000 shares.

For nearly a quarter of a century Mr.

Lipman has had in mind the matter of
driving a long drain tunnel the purpose
of which is to unwater all the principal
ledges of the district and thus enabling the extraction of ores at depth
and which are now inaccessable because
of the inventee volume. of the immense volume of water. It will take possibly two years to obtain the desired results, but the work is to be pushed as rapidly as men and money

SMELTER MEN COME AND GO. American Officials Spent Yesterday at The Big Murray Plant.

Yesterday was a busy day for Manager Whitley of the American Smelting & Refining company, who had in charge the party of officials who arrived at an early hour in the morning.

The guests consisted of Simon and Daniel Guggenheim, Edger I. Vor.

The guests consisted of Simon and Daniel Guggenheim, Edgar L. Newhouse, H. Payne Whitney and J. Hays Hammond.

General Traffic Manager Silas W. Eccles assisted the local manager in the entertainment of the visitors, and the greater part of the day was spent in making an inspection of the big smelters at Murray.

While Daniel Guggenheim, the spokesman for the party, confirmed all that has been said of the improvements

increasing tonnage from the mines of Utah and other states, he declared that it is yet too early to discuss details concerning them.

concerning them.

Discusing the report of the United States commission on international exchange and the agreement to fix the ratio between gold and silver at 32 to 1, Mr. Guggenheim declared that the ratio would be of great benefit to this country as well as to other nations. He believed the parity fixed at 22 to 1 would be the most satisfactory that could be obtained, all things considered.

The outlook for good copper prices is excellent, is the view expressed by Mr. Guggenheim, who said the cooling of the Amalgamated furnaces in Monthe Amalgamated furnaces in Mon-tana would certainly figure to the au-vantage of those who are operating their mines inasmuch as the supply on hand in the warehouses of the consum-er is running dangerously short. The vistors departed for the north last night and after a few days at the ranch of Mr. Eccles in Idaho will pro-ceed on to Montana and the Coeur d'Alenes.

HELD UP IN NEW JERSEY. Exhorbitant Franchise Tax Moves Con. Mercur to Reduce Par Value of Stock.

Notices were plac I in the mails vesterday, addressed to stockholders of the Con. Mercur Gold Mines comthe Con. Mercur Gold Mines company, calling a special meeting which is to be held in Jersey City, Dec. I.

The purpose of the meeting is to reduce the capital stock from the parvalue of \$5 to \$1 per share, thus making the capital \$1,000,000 instead of \$5.

000,000.

The reason for making the change, Manager Dern states, is on account of the excessive franchise tax charged by the state of New Jersey, under the laws of which the company is organized. The commonwealth exacts a fee of \$14,000 annually at present, while of the proposed reduction is made it will not exceed \$1,000 thus meaning a saying of eed \$1,000, thus meaning a saving of

THE TINTIC FIRE.

Trying Circumstances Under Which the Blaze Was Finally Located.

The underground fire that, three weeks ago, caused the Centennial-Eureka, Eureka Hill, Bullion-Beck and Gemini mines to close down, has been located and extinguished by superintendent Earls of the Bullion-Beck and his men, in the Gern stope in the Eureka Hill mine. To reach this stope they were compelled to use scaling ladders, and to cross a narrow ledge through dense smoke and blinding gas under trying circumstances, where a misstep meant death. The men who made the perilous trip in the discharge of their duties were Superintendent James Earls, Foreman Richard Chope and Mr. Anderson, the company's bookkeeper. These men performed an act of dering the like of which, on a battle field, would have won them undying daring the like of which, on a battle id, would have won them undying me, and they were prompted solely the sense of duty to the company. It is the sense of duty to the company. It is the sense of duty to the company. It is the sense of duty to the company. It is the sense of duty to the company. It is the sense of duty to the company. It is the sense of the sense of

SUPT. BROWN IN TOWN. a Good Word to Say About the Tetro -Miners in the Beck

pt. Robert Brown of the Centenis in the city today. Of the latter he says work has been resumed again and that the property is looking better than it ever did. Mr. Brown seems to be very well satisfied with conditions, at

any rate.
At the Centennial-Eureka work is going on about the same as it did be-fore the fire. The people of Title are rejoicing over the success attained in stamping out the blaze in the Gem stope of the Eureka-Hill. The Bullion-Beck has a force working underground

WAGES ARE INCREASED.

Judge Management Announces Changes-Other Park City News.

The Daly-Judge posted notices at its The Daly-Judge posted notices at its works this week to the effect that hereafter al miners should receive \$3 instead og \$2.75 and should work eight hours straight. The Daly-West posted notices also to the effect that all top men should work nine and one-half hours, thus including the mechanics. Such acts as this are bound to be appreciated by the company's workmen, and were they more frequent labor troubles would be much scarcer.

Hyrum Steele is driving a tunnel on the Portland Park property, across the guich from the Corona. He is now in about 25 feet and is following a well-

about 25 feet and is following a welldefined vein.

A pipe line has been run from the boilers of the shaft house at the Com-stock to the boilers of the mine, so that

stock to the boilers of the mine, so that in case of accident one or the other may be used. New flues are being placed in one of the boilers this week.

The pump at the J. I. C. is in place and after a few minor details have been attended to the plant will again be put in operation. The mine now has three pumps and these it is almost certain will easily take care of all the water that may be encountered. The shaft is now down 540 feet and the contact is expected to be cut about 60 feet further down and here ore is looked for.

A new whim was put into commission

ther down and here ore is looked for.

A new whim was put into commission at the Corona last Wednesday and now development will go ahead without delay until something "drops." Up until the present time the dirt has been hauled from the shaft by means of a windlass, but it proved too slow a process for Foreman Hasson and he made the above mentioned change. The irecline shaft is now down 110 feet, with the one shift going an average of three feet per day. The shaft is being sunk at a pitch of 60 degrees to cut the contact, Mr. Hasson being of the opinion that another 30 feet will take them to this point. A blacksnutrn shop has been erected and as soon as material can be placed on the ground a building 20x30 will be put over the whim and a night shift put on. A great deal of Iron has been found in the rock encountered, the formation growing harder as depth is attained.—Park Record.

Drilling for Potassium.

Special Correspondence,
Cody, Wyo., Oct. 30.—Machinery has
arrived at the DeMaris hot springs, on
the Big Horn river, and drilling for pottasium will be commenced at once. A
Chicago company has secured a lease
on the ground, which is said to be rich

Chronic Diarrhoea Cared,

Mr. Walter Richardson of Troutville,
Va., had an attack of diarrhoea that came near ending his life. His physician had falled to relieve him and the disease had become chronic when he began using Chamberlain's Colic, Cholera and Diarrhoea Remedy. It soon cured him and he new recommends that preparation whenever an onportunity offers. For sale by Z. C. M. I. Drug Dept.

Smoothly.—Stateline Oracle.

The articles of incorporation of the Ciyde Mining company were filed late Saturday afternoon with 500,000 shares of the par'value of 5 cents a share. The incorporators are George Tucker, J. B. Burbridge, B. D. Slegfus, Ed C. Tucker and John P. Park. The first named is preparation whenever an onportunity offers. For sale by Z. C. M. I. Drug Dept.

SENT OUT TODAY.

Manager Madsen Says Mine is in Shape to Keep Up Payment of Regular Dividends.

THE LAST OCTOBER CLEAN-UP.

Reported to be as Good as Any Preceding Ones During the Month-Letter from the Mine.

The treasury of the Century Gold Mining company, checked out \$1,500 today, the amount of the November dividend declared last Friday. This makes the third distribution of the year and Manager Madsen says there is no reason why stockholders should not receive a little parcel of "velvet" regularly each month at the present rate of

It was decided at the last gathering of the directors to make all future dividends payable on the 5th of each month and the rule will be adhered to

Manager Madsen is in receipt of a letter from the mine today which told him of very satisfactory conditions there and that the last clean-up for October would be equally as good as the two others which had preceded it during the month.

MINES NEAR SPRINGVILLE. Some Rich Float Brought Down from

Near by Mountains. Broker E. M. West spent yesterday at Springville. He reports there is considerable talk going the rounds in that section about the possibilities of opening up some good mines in the immediate vicinity of that town. Mr. West saw some samples of float brought down from the mountains which he was told assayed as high as

\$200 in gold to the ton.

Mr. West says several Park City mining men have looked over the region and that they look upon it with

LARGER SALARIES FOR CLERGYMEN

Probably no class of workers has actually shared less in the great material prosperity of the country during the past few years than clergymen. The cost of living has greatly increased in these same years, while their stipends, as a rule, have remained the same. The minister is restrained by the character of his profession, as men of other professions are not, in indulging in business speculation on his own account, no matter what opportunities he may have, although he is expected at the same time, with his family, to maintain a standard of living as high at least as the average of his congregation or of the community in which he lives. As a matter of fact, if the average salary paid to ministers throughout the country were increased at once by 50 per cent, it would only be an act of common justice and fair dealing to a class of men to whom the country owes far more for light and leadership than money itself can ever repay.—Leslie's Weekly.

Furniture Store was the scene of unusual activity. Corn—No. 2, 44@44¼; No. 3, 44@44¼. Oats—No. 2, 34@34½; No. 3, 33½@34. Every visitor was anxious to inspect the many attractions which this store alone offers. Our exhibition of a model home, on the third floor, is a revelation to buyers, for never before were they aware that such a handsome collection of Furniture and House Furnishings could be had at such prices. It is to your interest to come

VENTRILOQUIAL FOWLS.

M. Emile Merwert, Secretary-General of French Gulana, has sent to the Jardin des Plantes in Paris two pairs or ventriloquial fowls. These birds are greatly amusing visitors to the gardens who assemble round their cage by their cries, which at one time appear to come from the trees, at others from the sky, and sometimes from the midst of the crowd itself. The flesh of the birds is said to be more savory than that of pheasants or the finest guinea fowls, and their eggs are in great favor among American epicures. The Empress Josephine tried to acclimatize the species in the Malmaison aviary, but without success.—Tit-Bits.

G. P. & T. A. Missouri Pacific Ry., St. Louis, Mo.

C. P. A., Missouri Pacific Ry., Salt Lake City, Utah.

Irrigated Lands.

The Burlington has recently built branches into Big Horn Basin and North Platte Valley. These sections are now the scene of intense activity in irri-

gation development. Lands are cheap now-as Colorado and Utah irrigated lands once were, and history will cer-

tainly repeat. It will pay you to investigate. I will be glad to send you folders about these lands free on request.
