INTEMPERANCE IN WASHING.

A few years ago the question of ashing was throughly threshed out

Washing was throughly threshed out in the London Times, and it was won-deful to see with what strength of conviction, with what valor, with what a wealth of examples and arguments Englishmen undertook to demonstrate the utter utility of soap and water. For our own part we supposed that the question had been settled forever: but the habitual scrubbers, like all other cranks and riders of hobby houses, are a stubborn crew, and have lately been reasserting the importance of cleanliness, besides inventing new excuses for indulging in their favor-the vice. So the reformers have been vice. So the reformers have been pelled to come forward once more wage a new war against intem-te washing. Thus R. M. Theobald es in the Daily News of London: t seems to me there is a good deal hearont-bandon as to the benefit
