AMERICAN.

CONDITION OF THE PRESIDENT.

WASHINGTON, 27. — Postmaster-General James called this morning. When leaving the cabinet room he said: You know I have never lost confidence in the President's recovery. To-day that confidence is greatly increased. Secretary Windom came to the house shortly afterwards, and left saying, from what he learned from the physicians he thought the President's condition more favorable.

The bulletins issued last evening and this morning were fuller than their predecessors, in consequence of the decision of the physicians in attendance not to say anything individually, but to express themselves more completely in their official promulgations. Despite that determination everything was so satisfactory to-day that the physicians could not abstain from expressing their hopeful opinions. It is understood that the surgeons are well enough satisfied with Professor Bell's induction balance to give it a trial, in case it may yet be discovered that the ball is doing mischief. There are no indications of such mischief yet.

The sensational story about the President being at one time regarded as about to die, and the Vice-President being on hand with the Justice of the Supreme Court ready to swear in the new President, lacks the essential element of truth. Since the two days immediately succeeding the shot of Guiteau, the doctors never despaired of the President's life and certainly nothing that indicated the slightest foundation for the story mentioned has ever occurred.

The *Star*, to-day, publishes an interview with General Crocker, warden of the jail, about Guiteau. Crocker said, speaking of Guiteau, that there has been no event in his life during the past week that is worthy of mention. He does not seem to have any friends. His brother-in-law was here, but he did not appear to take any special interest in him. There was no animosity, however. Guiteau is as quiet as any other prisoner. He seems to have made up his mind to patiently await the result. He knows enough not to talk. He has sense enough for that. He has not expressed a desire to talk with anyone except Mr. Bailey, the stenographer, who has been taking his autobiographical sketch.

More Disputation.

NEW YORK, 27. — The *Herald*, which has within a few days published a broadside of adverse criticism on the President's condition and treatment, says we have been gentle as the doctors. Where they have made ten blunders we have pointed out one, and wherein they have objected to our observations they have opened themselves to political annihilation. We have shown them the charity of silence, but the result of this case now is known. On the difficult point of pyæmia, Dr. Hamilton says the President has not pyæmia, Dr. Hammond, formerly surgeon-general of the United States army, said, in an interview printed in the *Evening Post*, that the preliminary signs of pyæmia were unmistakable, and our own opinion is that the President is now in that typhoid state which is one of the stages of pyæmia.

The *Times* has a very careful statement of the President's condition, evidently compiled from the best authorities in attendance upon him and also around the President's bedside, and re-affirms the conclusion that he is quite as well as before the relapse, in a fair way to get well, and the physicians in attendance on the President, including the two consulting surgeons, are firm in the belief that their patient will get well, unless some extraordinary complication arises, of which there is no probability. All that the physicians are willing to say is, that today the President is better and safer than since the shooting; that they have a perfect mastery over his case; also that all the probabilities are that he will surely recover. Such minor disturbances as are likely to occur can be treated without trouble or danger to the patient. He will certainly get well if all the appliances of modern surgical skill and the most unrelenting care can save him. The *Times* adds: Our statements can be relied on as correct. Speaking of the exaggerations, it is not intended to say that the President's condition is not serious. It has been very serious from the first, but there was a steady improvement up to the time of Saturday's relapse, and since then, brought by the operation of Sunday, and to-night there is a feeling of strong hope at the White House. Referring to adverse reports, one of the most wicked attempts in the line has appeared in the form of an interview with Dr. Hammond which by its citation of authorization, has all the marks of a carefully prepared publication. In this article he attacks the surgeons in charge, particularly Barnes, Woodward and Bliss. He seems to suppose that the public has forgotten that he was first out of the army by a court martial, and that he would naturally be displeased with those who succeeded him, and those who approved of the result of the trial in his case. Besides, he has offered his services by telegraph in the President's case and they have not been accepted.

Tichborne Imposture.

The *World* says: A daughter of Ferris, the California Tichborne claimant, is living in Brooklyn. She is about 18 years of age, and is named Jennie E. Ferris. She says her father, Charles Ogden Ferris, abandoned her when her mother, his first wife, died about 15 years ago. The daughter was left in charge of her aunt, Mrs. Wm. H. Earle, who remembers Ferris and who is thoroughly convinced that his claim to the name of Tichborne is an imposture. The daughter has the same belief, and says she thinks it her duty so expose her father's fraudulent scheme so as not to assist it by keeping silence.

Simonton's Resignation Accepted.

In accepting Simonton's resignation, to-day, the executive committee of the Associated Press adopted a resolution expressing the regret of the Association, and its profound appreciation of his faithful and valuable services, and directing that such arrangements be made as should be agreeable to him in regard to the time when he should be relieved.

Sprague Estate.

Roger A. Pryor thinks that there has been any settlement effected in the matter of the Sprague estate, but William, Mary, Amasa and Fanny Sprague will probably accept the proposition to purchase the property. This will stop litigation.

Fighting All Along the Line.

Passenger rates west continue to decline. The Baltimore & Ohio sell to Chicago for $7.50, St. Louis $13. Other agents sell to St. Louis from $11.50 to $12.50, Cincinnati $7. Some scalpers think the fare will soon be $5 to Chicago.

He Rises to Explain.

Rev. Edward Cowley, formerly of the Shepherd's Fold, is endeavoring to raise money to print the evidence submitted to the committee of the Episcopal church touching the feeding, clothing and general treatment of the children under his care. He claims the result will be his complete justification.

A Fatal Fire.

DENVER, 27.—*Republican's* Poncha Springs: Last night a fire broke out in the Bank of Poncha Springs. The citizens burst in and subdued the flames. J. P. True, owner of the bank, arrived just after the flames were extinguished, and ordered the people out. He then procured a revolver and accused Major Randolph Carpenter, of Leadville, of starting the fire. Both men were greatly excited. The city marshal struck both with a revolver. True, supposing the blow was struck by Carpenter, fired, fatally wounding him. True was arrested. Both parties are well known business men.

FOREIGN NEWS.

Fitzmaurice and Gladstone Lock Horns.

LONDON, 26.—In the House of Commons, this evening, on consideration of the committee's report on the land bill, the clause proposed by the attorney-general for Ireland, providing that no land commissioner shall be capable of sitting in the House of Commons during his tenure of office, was agreed to.

On consideration of the clause of the land bill empowering the court to fix fair rents, Lord Edmund Fitzmaurice, liberal, moved an amendment confining the benefit of the clause to tenants valued under $100. In support of this proposition, which he said would only exclude 18,000 tenants, he urged the expediency of not making this exceptional legislation broader than was necessary, and quoted the authority of Lord Carlingford, Baron Bowes, baron of the court of exchequer in Ireland, for the proposition that these large tenants are quite able to take care of themselves.

Gladstone energetically opposed the amendment, and pointed out that no such recommendation had been made by either of the commissioners, and declared that government would be no party to drawing a distinction which was directly opposed to the lines upon which the bill was drawn. The amendment was negatived—241 to 205. The narrowness of the majority was greeted with loud cheers. Several prominent liberals voted in the minority.

A Beautiful Infernal Machine.

It is feared the premature publication of the facts about the seizure of the infernal machine will render futile some important investigations now in progress and destroy the chances of the discovery of the senders. One of the machines is retained at the head constable's office, Liverpool. It is described as very beautifully made and most effectively designed. Although the machines are all charged with explosive substances, there is tolerably conclusive evidence that there was no intention on the part of the senders that they should explode in the hold of the steamer while in transit from Boston to Liverpool. The machine is enclosed in a long case of zinc, of which it occupies the upper portion. There is a clockwork arrangement which, upon being set, runs a hand six hours; then it closes over to descend upon a tube bearing a cap and communicating with the lower half of the case. The tube is filled with explosives, which, upon being fired, sets off the cap placed in the middle of the dynamite compound in the bottom of the case. The presumption is that the machines were intended for the destruction or injury of public buildings throughout the country in accordance with the avowed Fenian programme. Unfortunately government have reason to believe some warning was raised which conveyed an intimation of the expected arrival, and also warned the senders and consignees.

Freedom of the Press.

The *Pall Mall Gazette* in a leading article referring to the Irish press in America says: If the American government should suppress these odious newspapers tomorrow, the conspirators who devised the infernal machines, if we accept the theory that they were devised by humans, are not the kind of men that need a sanguinary leading article to set them to their detestible work. They may be presumed to be cool, ingenious, calculating, unscrupulous men who will certainly not let O'Donovan Rossa into their secrets. It is highly desirable that all governments should make secrets of this sort as dangerous as possible to the malefactors who harbor them, but to deprive ourselves of the means of knowing what they are thinking and saying to one another does not bring us nearer our ends. We do not believe such propagation of assassination is a farce, although it is a sign. Even if it could show to some extent farce as well as sign, it would still be an open question whether its mischievousness would not be counterbalanced by its utility as a signal.

An Insolent Savage.

A correspondent at Durban says: As the differences which have arisen between the royal commission and the Boers are exciting attention, it is well that the public should be made acquainted with the nature of the objection raised by the commission. Busker is a Hollander. During the war he was a Boer General. Kruger was his secretary and his adviser. During the siege of Potchefstroom, his influence is supposed to have induced the Boer General Winsow. Our troops and people at Potchefstroom complained bitterly of Busker's insolent manner and savage behavior to prisoners and townspeople, and very grave charges were preferred against him. On the arrival of the Boer leaders at Newcastle to attend the commission, they were accompanied by Busker, as secretary general. Sir Evelyn Wood informed them that the commission would not allow some one else substituted for Busker to act, and naturally objected to being brought in contact with a person over whom such grave accusations were hanging. Gen. Wood stated that Busker might even have to be arrested under the clause of the truce providing for the punishment of those guilty of acts contrary to the usages of civilized warfare. To this request the Boer leaders paid no attention, and much to the mortification of all Englishmen at Newcastle, Busker continued to attend the commission, and swagger through the streets. What fresh cause of offense he had given to the commissioners is not known, but there is no difficulty in believing that by his conduct he rendered it impossible for them to associate with him.

The Temporal Power Agitation.

MADRID, 27.—The Cardinal Archbishop of Toledo, Primate of Spain, in a pastoral letter, read in every church in his diocese, has most violently attacked the Italian people and government, including all Catholics, and exhorts even princes, statesmen, politicians and journalists to combine and, if necessary, use force and arms to restore the independence and temporal power of the Pope in Rome. The Italian Minister at Madrid immediately protested, and the Spanish Cabinet declared that it severely blamed the primate's language and would cause strong remonstrances to be made to him. Government has submitted the pastoral to the council of state, but will veritably express to the primate their disapproval.

Our Cousins German.

BERLIN, 27.—The Saxony elections to the Landtag show a conservative gain. Bavarian conservatives are still more successful. The ministerial press is very sanguine of the other elections resulting similarly.

There is no prospect of Italy gaining the Austro-German alliance.

Prompted by electioneering necessities, the *North German Gazette* is now producing a series of articles intended to persuade constituencies that free trade is a delusion which is rapidly being exploded. The first course of articles on the Cobden Club says: The club is really colossal machinery for provoking political agitation abroad. The *Gazette* concludes that these principles, called by Cobden, with horrible blasphemy, "God's international law of peace," have, wherever they have applied, ruined agriculturalists, degraded workmen to mere machines, and converted the countries which have accepted them into tributaries of Manchester.

Emigration returns from Bremen show 17,033 persons left there for America the first half of '81. It would not be astonishing if Germany lost 33,000 people during the year.

A Critical Moment.

PARIS, 27,—The vote yesterday in the Chamber of Deputies, on the order of the day, has prevented a ministerial crisis at a critical moment, but it is only palliative and the situation will remain precarious as long as the chamber does not contain a disciplined ministerial minority.

Midhat Emigrates.

CONSTANTINOPLE, 27. — Midhat Pasha and all the other convicted murderers of the late Sultan, except the two actual assassins and Izzet Pasha and Seyed Pasha, who were implicated in the crime, embarked on Monday for El Hedjaz, Arabia, where they will remain in exile for life.

BRIEF TELEGRAMS.

The Sheffield Equitable Building Society, liabilities $100,000, has suspended.

Mrs. Coleman, who shot George Cole, was committed to the Tombs by the coroner.

D. W. Caldwell is confirmed general manager of all the Pennsylvania railroad lines west of Pittsburg.

In the Commons Parnell's amendment to the report on the land bill, relative to absentees, was rejected—115 to 82.

A Chicago dispatch says: Lumbermen have raised prices materially to-day. The demand is in excess of the supply.

A petition has been presented for the winding up of the Blackburn and district building societies. Liabilities £20,000.

In the Commons this afternoon, in consideration of the report on the land bill, Parnell's amendment to omit clause 27 was rejected—268 to 167.

A Texas dispatch states that Jay Gould will change the Red River road, narrow gauge, recently acquired by him to a broad guage and extend it to Dallis.

Vice-President Arthur was at home all day of the 26th. He believes the President will recover, having re-assuring dispatches from Blaine and Secretary Brown.

The depot of New York and Brighton Beach and the Pierrepont House, together with 10 or 15 railway cars are destroyed. Fire still burning. (27th.)

The arrival is reported in Glasgow of one consignment of Minnesota wheat *via* Barge line and New Orleans in good condition. Other consignments will follow.

Bow Street Police Court granted a summons against Chas. Newdegate, conservative member of Parliament, on the charge of maintenance preferred by Bradlaugh.

News is confirmed that important dissentions have broken out among Tunisian insurgents and several tribes, provoked by importunities and exactions of others, have sought French assistance.

Boston telegrams (27th) from various parts of New England mention that a heavy storm of thunder and lightning did great damage to barns and buildings. Many horses and cattle were killed.

A St. Petersburg dispatch says: The expected budget for 1882 will be one hundred million roubles less than for 1881. The war office expenditures being diminished sixty million roubles and other departmental expenditures forty million roubles.

A Russian letter states that many are arrested and expelled from St. Petersburg on account of the discovery of another plot against the Czar's life. The nihilist who betrayed it has been assassinated in the suburbs and there have been six arrests in consequence.

A St. Petersburgh dispatch of the 26th declares that the epidemic among the cattle is extending to Livonia. The ravages caused such alarm that medical men have been sent in all haste from Dorpot. It is believed to be the Siberian plague, as in one case a peasant took the disease and died.

In the House of Commons last evening, on consideration of the committee report on the land bill, the clause proposed by the Attorney General for Ireland providing that no land commissioner shall be capable of sitting in the House of Commons during his tenure of office, was agreed to.

A London correspondent of the *Courier* says he is informed that the United States Government has intimated its disinclination to join in the proposed general representation on the subject of the treatment of Jews in Russia, on the ground that it has already instructed its minister to Russia on the subject.

A dispatch of the 26th says that the warfare in passenger rates is likely to continue for some time to come. All the roads were selling this morning at $8 to Chicago, $7.50 to Cincinnati and $13.75 to St. Louis. At half past 10 General Samuel Carpenter, ticket agent of the Pennsylvania Central R. R. ordered all ticket offices on his line to sell tickets to Chicago and Cincinnati at $7.50, and to St. Louis at $13.25. He said they would not be undersold by scalpers or by other lines, and they could keep the fight up as long as anybody.

A Washington dispatch says: The matter of the vacancy in the Supreme Bench, caused by the death of Justice Clifford, is much discussed. Judge Devens and Chief Justice Grey, of Massachusetts, are candidates, and every New England State will have one or more candidates, as it is assumed the judge will be appointed from there. The talk of appointing Conkling is regarded as absurd, and his friends say he would not have it. Some prominent republicans hold that a democrat should be appointed, and think Garfield will appoint one.

Consul Du Bois, of Aix La Chapelle, writes that if there be not a copious rainfall at an early date farmers will only realize one-half and in some places one-third of their wheat crops. The latest information from Holland shows that hundreds of acres of wheat have become worthless from the effect of unfavorable weather and have been plowed up and sown with oats and barley. Although farms in this city have a most unpromising outlook consumers are concerned, but American wheat is abundant and 15 per cent. cheaper than the home product, so that at least there is no danger of famine.

AYER'S CHERRY PECTORAL,
For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma and Consumption.

The few compositions which have won the confidence of mankind and become household words, among not only one but many nations, must have extraordinary virtues. Perhaps no one ever secured so wide a reputation, or sustained it so long, as AYER'S CHERRY PECTORAL. It has been known to the public about forty years, by a long continued series of marvelous cures, that have won for it a confidence in its virtues never equaled by any other medicine. It will mitigate the most colorful cases of Coughs, Colds, Consumption, that can be made by medical skill. Indeed, the CHERRY PECTORAL has really robbed these dangerous diseases of their terrors to all that use it, and given a feeling of immunity from their painful effects, that is well founded, if the remedy be taken in season. Every family should have it in their closet for the ready and prompt relief of its members. Suffering, suffering, and even life is saved by this timely defence. The prudent should not neglect it, and the wise will not. Keep it by you for the protection it affords by its early use in sudden attacks.
