The tonic treatment by Dr. Williams Pink Pills, however, pre-vents the final breakdown of the nerves and the more serious diseases which follow, because the pills act directly upon the impure blood, mak-ing it rich, red and pure. At Offices of Commission Regarded as Important as it Will Open up the Whole Question.

Washington, May 24 -- A definite of fort was begun today before the interstate commerce commission to secure the public a reduction of fare charged by the Pullman company for its sleeping car accommodations. This is the first time in the history of the commission that a proceeding has been brought against the Pullman company. and it promises to be an action of more than ordinary interest and importance.

Three complaints were filed against the Pullman company, and various northwestern railroad lines, which are made co-defendants, by George S. Lof-tus, a husiness man of St. Paul. Mr. Loftus avers that in the course of his business he is obliged to travel from St. Paul to various other points and to use most of the time and pains in the back and spine. "I was treated by two doctors, being under the care of one of them for six months, I got no relief and thea de-cided to try Dr. Williams' Pink Pills, I soon began to feel better and the im-provement was general. My appetite became hearty and my sleep better. The headaches all left and also the pains in my back. A few more boxes entirely cured me and I was able to go back to work. I felt splendid and as though I had never been sick." Dr. Williams' Pink Pills are invalu-able in such diseases as rheumatism, after-effects of the grip and fevers, neuraligia, St. Vitus' dance and even partial paralysis and locomotor ataxia. Paul to various other points and to use the accommodations of the Pullman company. The charges for the accom-modation, he declares, are unjust, un-reasonable and excessive, and he asks the commission to reduce them by one-

hait. In his first complaint he avers that the charge made by these companies for a sleeping car berth from St. Paul to Superior, Wis, is \$1.50, whether the berth be an upper or a lower. He says that the lower berths are far more de-sirable than the upper berths, and that the latter ought to be considerably less in price, but that no distinction between them is mide. The exaction of the same charge for both, complainant alleges, results in discrimination against and disadvantage to passengers who are compelled to take upper berths. He re-quests the commission to fix as a max-imum charge for a lower berth between St. Paul and Superior, \$1, and for an

t. Faul and Superior, \$1, and for an pper berth, 50 cents. The second complaint relates to travel etween Chicago and St. Paul and Se-ttle, Wash. Between these cities, it is attle, Wash. Between these cities, it is alleged, the Pullman fare is \$12 for eith-er a lower or an upper berth. Mr. Loftus asks that the rate be made \$8 for a lower berth and \$4 for an upper. At the offices of the commission, the complaints, which are brought under the most recent act of Congress on the subject of rates, are regarded as of im-portance, in that they will open up the whole question of sleeping car rates, not only on the lines of road mentioned specifically in the com-plaints, but throughout the country.

UR city may be no worse than other cities-let us hope and pray it is not-but being less in size, perhaps we see more. If so much smaller, why cannot the highways and byways, the resorts and rendezvous be controlled, and cleansed, and cleared of the immoral elementespecially the very youthful part of it? Not to overcome it, is in a sense, to sanction it. Now, all the world loves a lover, at least so we are told, but not necessarily on the public highway. Last Monday evening, while it was still broad daylight,—only 7 o'clock— walking townward on First South street, were youth and maid, still in still broad daylight,—only 7 o'clock— walking townward on First South street, were youth and maid, still in their early teens, scandalizing the pub-lic by their loverlike conduct. This, however, is only one case in the many, having no regard for the public's feel-ings and opinions. It seems to go on everywhere and at all times. The young people of Salt Lake City are cer-tainly building up names for them-selves. BLOOD POISON CURE YOURSELF AT HOME

Most persons who are afflicted with Contagious Blood Poison hesitate to go to a physician for several reasons. In the first place the expense is heavy, and they know that the inevitable treatment will be mercury and potash, strong minerals that act with disastrous effects on the delicate parts of the system, and which do not, after all, really cure the disease. What they want is a safe, reliable treatment that can be taken at home and a perfect cure made of this loathsome disorder without unnecessary exposure or expense. Such a remedy is S. S. S.—it is the only medicine that goes down to the very bottom of the trouble and drives out the last trace of the poison so that there are never any signs of its return. It does not contain a particle of mineral in any form, and after removing the disease from the circulation builds up every part of the system by its fine vegetable tonic properties.

S. S. S. attacks the trouble at its head and not only permanently cures the disease for the one afflicted, but so purifies the blood that future offspring is insured against infection. S. S. S. may be taken in the privacy of your home and a perfect cure made of this hateful and loathsome trouble. For the assistance of those who are curing themselves with S. S. S.

we have prepared a special book on Contagious Blood Poison which contains instructions of great value to all blood poison sufferers. We will be glad to send a copy of this book free, and if additional instructions or advice is wanted, our physicians will furnish it without charge.
