Last Sunday afternoon Mr. McHenry and Mr. Lyon, of the Lyon Drug Co., were out automobile riding, and upon nearing the drug store, McHenry saw a friend whom he wished to speak to. He asked Mr. Lyon, who had the automobile, to stop and let him out. Mr. Lyon's experience is somewhat limited in handling automobiles, he turned the spark advance to the rear, causing more speed. McHenry, being desirous to see his friend, jumped, regardless of the increase in speed, thinking he would be able to govern himself accordingly, but to his surprise, it threw him into the air, breaking it just above the head, also fracturing some of the bones in the hand. Not knowing how seriously he was injured, he went on with his business until the next day, when the pain became so severe he could endure it no longer. Upon calling on the doctor, he learned the above results. Although the matter, since that time, has been given proper attention, McHenry has not had much rest.

J. Staples filed a complaint charging John Phillips with assault, for which

arrived they found a large hole in the wall, and on the floor were found sledge hammers, monkey wrenches, a brace and bit, drills, chisels, etc., some of them charged with dynamite. Some work done. On Monday night a large number of tools were stolen from the Huntsman blacksmith shop. The barbers and bank officials were notified, and they made an examination of the premises. It was found that the would be burglars were making the hole in the right direction to enter the bank vault, but it appears they abandoned their work when they struck a lot of stringers and railroad iron which were placed in the center of the wall. Besides the sledge a dark lantern was found just outside the building. When Mr. Huntsman missed his tools he immediately notified the city and county officials to be on the lookout for them, as he thought a burglary had been committed, however, the location of the stolen goods soon settled this fact.

PINE SCHOOL EXHIBIT.

The school exhibit given in the Central schoolhouse Monday was one that the teachers and principals may well be proud of. What made the exhibit of more interest was that it showed the regular work of the students. The manual arts work was especially good, and speaks well for the boys and girls and the interest they have shown. The drawings, the paintings, the sewing, the carving, the clay models, the carpentry, the wood work and all other school work was excellent, and all as who were present expressed themselves as being well pleased with the progress and development that has been made the past winter in the schools.

BETTER PRICES FOR STOCK.

West Spring Makes Outlook Very Promising for the Husbandman.

Special Correspondence. Escalante, Garfield Co., May 9.—We have been blessed with the wettest spring that has visited this section of Utah since 1896. The farmers are now beginning to plant their crops, and the men are busy shearing and have their wool

contracted for 15 cents per pound and will deliver it just as soon as the road over the mountain will permit them to take it to the railroad. Some of the cattle men have been making stock and are now gathering to deliver. They are getting very much better prices than for some years past. There are are a number of large ranches trying to contract for sheep, and they are offering better prices than has prevailed for some years.

For some time there have been many farmers here able to put in wheat and oats without still irrigating the land. The ground is still damp enough to put in corn and from the aspect of the weather it seems well to be kept in good condition for some time to come. The prospect for a good fruit crop was never better at this season of the year.

THAYNE, WYOMING.

Death of John Baird—Conditions in Star Valley.

Special Correspondence. Thayne, Union Co., Wyo., May 6.—Elder John Baird of this place died April 21. He was born May 2, 1841, in West Whitehall, Chester county, Pa. He was baptized by Robert Baird (his father) May 27, 1853, and in 1860 became a member of the Fifty-third quorum of Seventy. He resided in Utah, then Idaho, and later in Wyoming. He lived a quiet, inoffensive life and was a good neighbor and citizen. His children, J. Baird, Jr., and Mrs. M. A. Munro of Soda Springs, and Mrs. Amy L. Brown of Thayne, survive.

The following are the names of the principal villages in Star Valley: Afton, Spring Valley, Mayfield, Grover, Auburn, Tyeon, Cle, Freedom and Laramie. The Salt river runs through the valley, emptying into the south fork of the great Snake river. There are said to be many good places for raising sheep very cheap. Building material is handy and the people are improving their homes and many new farms are being broken up. This valley is a great stock country and the creameries are doing a good business. There are no poor people in this valley, as all can make a living who are able to sit in a saddle. Hay is worth this spring 14 per cent, and there is plenty raised to supply the demand.

The Best of its kind—

BECAUSE it is used as the standard by the United States Supreme Court and by nearly all of the Federal and State Courts.

BECAUSE it is the standard in the United States Government Printing Office at Washington, and in the executive departments generally.

BECAUSE the schoolbooks of the country are based upon it,—25,000,000 issued annually—so that the children are educated in accordance with its principles.

BECAUSE in every instance where State purchases have been made for the supply of public schools, Webster has been selected.

BECAUSE it is heartily recommended by nearly all the Presidents of Universities, Colleges, and Seminaries, and by every State Superintendent of Schools now in office.

BECAUSE it is warmly indorsed and commended by men and women of recognized authority in literature, education, and science, all over the world.

BECAUSE of its adoption by the English Government as the standard in the Postal Telegraph Department,—the only department having an absolute standard.

BECAUSE its sale in Canada and other English Colonies is largely in excess of the sale of all other dictionaries of similar scope.

BECAUSE it is used as the standard by a vast majority of the newspapers. Thousands of statements to this effect are on file with the publishers.

BECAUSE of its very wide use in Great Britain, on the Continent of Europe, in Turkey, India, Australasia, South Africa, China, Japan, South America, etc., etc., etc.
