BLACKLEG AMONG CATTLE.
Blackleg is said to be epidemic on the Utah reservation, and Indian cattle are reported to be dying by scores, in spite of the active steps being taken by C. G. Hall, Indian agent, and Dr. Ira Massey of vaccine the flocks. This step has met with much opposition from the Indians and a squad of government cavalry troops was necessary to accompany Mr. Hall and Dr. Massey in their work. It is thought that the disease at this season of the year is due to the fact that the cattle have remained around the water holes in the low lands because of the good feed, instead of seeking the heavily mountain pasturage. William Walsh, one of the large cattle owners is said to have lost 100 cattle from the disease.
