MINING, BUSINESS AND STOCKS

BUSINESS BRISK

The Sales This Forenoon Aggregated 26,081 Shares, Which Sold for \$18,133.35.

TINTIC STOCKS STRONGER.

Star Consolidated, Tetro and May Day Show Improvement-Con. Mercur Weakens.

The mining stock market was brisk this forenoon and the week opened with the sale of 26.081 shares, which were transferred for the sum of \$18,133.35. Con. Mercur was offered down. The stock opened weak and it continued in that condition, sliding from \$1.09 to \$1.07, the latter price being the closing bid. Daly-Judge stiffened somewhat; but the rise in the price of silver failed to make any impression on Daly-West, which clung to last week's prices. A 6,000 share lot of Ingot was offered and taken at 2% cents. May Day stiffened to 121% cents; then dropped back a quarter of a cent. Star Consolidated went up a cent during the regular call and closed strong. Century was offered at 54 cents, but no one wanted it at the figure. New York Bonanza showed no improvement over last week; neither did Yankee Con., which was offered in the pit at 45 cents. closing quotations and sales were

STRIKE IN THE W. & W.

Six Inch Vein of High Grade Ore Disclosed in Lower Tunnel.

Manager W. F. Gray, accompanied by Manager W. F. Gray, accompanied by E. W. Kelly, visited the Wheeler and Wilson mine in Big Cottonwood district yesterday. Mr. Gray said today that a six-inch fissure vein of high grade sliver-lead ore was struck in the lower tunnel one day last week.

It was decided to follow the yein and

It was decided to follow the vein and a contract was awarded for 100 feet of drifting. Mr. Gray brought a sack filled with samples of the ore with him and they are now in the hands of the as-sayer. He believes the product will

close to 100 ounces in the white A small shipment of ore extracted from the upper workings is being sam-pled at the Pioneer plant at Sandy to-

Messrs. Gray and Kelly are highly elated with the condition of things at the mine, which they believe is certain to develop into a good one.

THE DEXTER SLIMES.

An Extraction of \$3.55 Per Ton Made With the Moore Process.

Col. Stanley B. Milner, one of the di-Col. Stanley B. Milner, one of the directors of the Dexter mine at Tuscarora, Nev., who visited that property last week, has returned from camp well satisfied with the demonstrations made there with the Moore process for the treatment of slimes. Said the colonel:

"We have probably 30,000 or 40,000 tons of ore in the slum ponds that will run about \$4.60 to the ton. Our of 2 tests. about \$4.50 to the ion. Out of 12 tests made last week the ore averaged the latter amount and the average extraction was \$3,55 to the ton. In some of the discharges the loss did not exceed 60 cents in gold and silver to the ton, while in others it ran as high as \$1.40; but all put together the average was

"I am satisfied that the Moore process will do the work satisfactorily and with further adjustment and regulation I believe we can extract all the values in the ore but possibly 50 or 60 cents in every ton. At any rate we ought to clean up from \$3.50 to \$4 to the ton \$800 men.

out of the stuff we previously ran off into the slum ponds."

Col. Milner had not visited the property for two years.

FROM THE MAY DAY.

Manager Snow Visits Tintic Mine Ex-hibited Some Good Looking Ore. histed some Good Looking Orc.
Conditions at the May Day are said to be brightening. Manager Alviras E. Snow visited that Tintic property yesterday and brought to the city with him a few samples of ore taken out of the drift from the winze sunk from the 300-foot level where, he states, the face showed a width of 6 feet when he left camp for home.

In character, the ore is a lead carbonate, and if the whole vein is as good as the sample exhibited by Manager Snow on Broker's row this forencon, the stockholders in that proposition can take on new hope.

The stock was stronger in the pit this morning and in their eagerness for

this morning and in their eagerness for it brokers participated in some lively bidding; several sales were noted above 12 cents a share.

AGAINST APEX LAW.

C. L. Dignowity Believes Industry Would Be Benefitted by its Repeal.

At the session of the American Min-ing congress, C. L. Dignowity, formerly of this city, but now of Boston, took a stand in opposition to the Apex law and introduced a resolution asking for and introduced a resolution asking for its repeal by Congress. Since the ad-journment of the Deadwood meeting Mr. Dignowity has received many let-ters of congratulation from mining men who believe the mining industry would be much better off without the aw as it stands on the statute books

today.

In his address before the meeting Mr. Degnowity said:

"To acquire patents from our government, each claim costs about \$700 or from \$700 to \$100 per acre. After all these expenses, one is not then sure of his title to the mineral therein, as the 'Apex' or extra lateral rights may rob 'Apex' or extra lateral rights may rob

'Apex' or extra lateral rights may rob him of the ore.

"This vexed Apex question is the curse of our western mining industry and 'should have died in its borning.' As it was permitted to live, we should, without delay, wipe it from our mining code, for it has driven and will continue to drive millions of dollars from our western folds into Old Mexico, and western fields, into Old Mexico, and other foreign countries where that dreaded nightmare does not exist.

"It is authoritatively stated and re-corded, that the population of America is not as large as the number of dollars tied up in law suits in the west, owing to the Apex law. This Apex farce, in conjunction with the entangle-ment of location claim lines, makes 'countless thousands weep.'"

RICH STAR CON. ORE.

Three Car Loads in Today's Market Will Bring Company \$10,000.

Star Consolidated has three car of ore at one of the local samplers for which settlement will probably be made before tomorrow.

Manager Milan Packard, according to

the mine assays in his possession, expects to receive a check for approximately \$10,000 for the entire lot or a little metter than \$3,000 to the car. Two additional cars left the mine lost night and will be switched to the smapler this afternoon.

Inasmuch as the operating expenses of the Star Consolidated are said to be no more than \$2,000 per month, at the present rate of production it ought not to take long to wipe out the indebtedness incurred under previous

The Miner of Tintic in speaking of the Star Consolidated this week says: "In the mine stoping operations con-"In the mine stoping operations continue on a 20-foot face that samples from three to five ounces in gold, through which run "fat" streaks which show the presence of the precious metal in almost the native state. "Exclusive of the big ore body of high grade ore, with which the wide fissure is filled below the collar of the shaft, there are in the old upper workings, which are opened by tunnels above the shaft, thousands of tons of low grade ores, carrying a high percentage of silica, a commodity that it being eagerly sought by the big smelter plants that make a specialty of the copper-sulphides of a specialty of the copper-sulphides of the Bingham mines. Half a million dollars is a conservative estimate of the value of this ore, and it is so situated that it can be very cheaply mined. With possibly two or three exceptions there is not a property in Tintic district to-day that is in a better condition for the earning of hand dividends than the

STRIKE IN BLUE JAY.

Manager Teasdate Says Indian Peak Dis trict Mine Never Looked Better.

George E. Teasdale, the Blue Jay mine's manager, was in Stateline the first of the week and reports the mine looking better than it ever has. In the 210-level, where they have been drifting for the ledge, a cross vein was encountered that is nighly mineralized and is the junction of two big veins. It is without doubt the most important strike that has ever been made in that property.

A small velo has been encountered

in another drift, but it was deemed advisable to leave it for the time being and crosscut for the junction of the ing and crossed for the junction of the two velns, thereby insuring a richer find with a larger body of ore.

A greater part of the work this summer has been the upraising in the ore chute, but now the work will be confined to the 210-level afone in drifts and winger.

and winzes.
Mr. Teasdale is very jubilant over this new strike and expects work to go on a larger scale this winter. He says he intends to make a mine before they build a concentrator, as he cites many instances where mistakes have been made by erecting a plant to treat the ore that was never found, Mr. Teasdale left for the mine last Tuesday, accompanied by Joe Bryant with a load of provisions.-Stateline Oracle.

FIRE STILL BURNING.

A Cloud of Smoke Rose from Eureka Hill Shaft This Morning.

Harry Joseph returned from Tintle ooking after his interests at the La Reine and Carisa mines. He believes Reine and Carisa mines. He believes the situation at the four big mines affected by the fire is indeed serious and there is no telling how long they will be forced to remain closed. When he left camp this morning a cloud of left camp this morning a cloud of smoke and deadly gases was issuing from the Eureka-Hill shaft.

Mr. Joseph is of the opinion that the mining companies affected should unseal the surface openings and give up the idea of trying to smother the fire; he believes that if they would do this the fire would soon burn itself out, while if they are kept closed it may smoulder for months to come. He states that all the mine managers except the Centennial-Eureka take a sim-

flar view of the situation. The fire is a serious affair for the Tintic district and Mr. Joseph says there will be a great deal of suffering in the camp this winter unless the miners now unemployed can get to

Middletown Iron Works.

Harrisburg, Pa., Oct. 19.—The Middle-town iron and tube works today laid off 250 men on account of the lack of orders. The company employs about

COLUMBUS CON. ORE SHIPMENTS.

Alta Mine Will Report With at Least Five Car Loads in Local Market This Week.

WILL BRING CLOSE TO \$5,000.

Two Lots Sold Today-Good Progress Being Made With Little Cottonwood Power Plant.

The Columbus Consolidated mine of Alta reported in today's market with two cars of ore, which, Manager Jacobson says, will net the company better than \$1,000 to the car. Four more car loads will reach the sampler at Sandy before the end of the week of about the same grade as the one in today. The company will receive close to \$5,000, net, for the five cars.

Contractor J. J. Burke, who is building the new power plant in Little Cot-tonwood canyon for the Columbus Con. visited the scene of operations yester-day and found work progressing very satisfactory. The building is about half completed and at least half the poles which are to bear the wires be-

poles which are to bear the wires be-tween the power house and the mine have been set up.

There is a probability of another plant being installed in the canyon dur-ing the next year. The Continental-Alta mines will need power to operate its mines on the extensive scale already planned and sometime ago took steps to that end by filing a notice to appro-priate certain waters of Litle Cotton-wood creek to be used for power pur-

Final Payment Made.

The Indiana syndicate which has held an option on the Black Diamond mine an option on the Black Diamond mine at Stockton, owned by Joseph Dederich and associates, has been taken up; final payment having been made last Saturday. The payment was made by W. C. Alexander, a member of the syndicate, who reached the city from Lafayette, Ind., on Friday afternoon. The Black Diamond is located near the Honering mine. the Honerine mine.

CONCENTRATES.

Ernest Bamberger is inspecting min-ing properties in Alta today.

Treas, A. A. Ball of the Annie Luarie mine is in the city for a brief stay with his family. Ira Jones, the official caller of the mining exchange, is taking a vacation of two weeks.

Manager A. H. Mayne, of the Minola nine of Park City, is in Omaha on a

brief business trip. The annual stockholders' meeting of the Park City Superior Mining company is scheduled for Nov. 3.

John Dern, president of the Consoli-ated Mercur mine, returned today from a trip to Nevada. Asst. Treas. Merriman, of the Majestic Copper company, expects to leave for Milford tonight.

Acting Manager A. E. Hyde, Jr., of the Annie Laurie mine at Kimberly, is expected to arrive from that property

Manager Doolittle of the Utah & Eastern mine, near St. George was in the city over Sunday.

The treasurer of the Rocco-Homestake mine, operating in Nevada, has reported that he has more than \$19,000 of company funds in his possession.

G. H. Robinson, general manager of the Tintic company, came in from Montana last night. Director F. A. Schirmer of the Boston

Con., who has been visiting that big Bingham bonanza, has returned to his tome in the east. The Oregon Short Line railroad has

granted the Wood River, Ida., produc-ers a rate of \$6 per ton on zinc ores transported from that region to Denver The shipments of ore from Park City

through the Mackintosh sampler last week aggregated 5,004,220 pounds. The Daly-West sent out 3,595,000 and the Silver King 1,469,220 pounds. A shipment of ore from the New York & Nevada Copper company's mines has been sent to Colorado to un-

dergo a thorough testing, as to the nethod of treatment. Harry Joseph has 60 men working on Harry Joseph has 60 men working on the La Reine road and at the new shaft, and the road will be completed within a few days. The employment of such a large force came at an oppor-tune time, and Col, Harry is hailed as a public benefactor.—Tintic Miner.

Sunt, Turner of the Yankee, who also directs the development work at the Manhattan, has begun sinking the shaft of the latter property from the 200 level, and expects to cut the fissure that passes through the property with-W. H. Clark, director in the Trade

Dollar Extension mine at Silver City, Ida., accompanied by W. V. Rice and James Farrell, stockholders in that proposition, will leave for the northern camp on an inspection trip this week.

H. J. Doolittle, representing the Metal Reduction company, of Los Angeles, has arrived in the city. He is here for the purpose of looking after zinc ores, His concern is operating a plant at Los

W. G. Benham, well known in Salt W. G. Benham, well known in Salt Lake, is visiting his ord haunts from Crofton, B. C., where he is engaged with James Breen and H. C. Bellinger in the smelting business. Mr. Benham reports mining matters in a very pros-perous condition in the extreme north-west. He will return home in a few west. He will return home in a few

Three young graduates of the Houghton School of Mines, one of the best in-stitutions of the kind in the United States, have secured positions with the Majestic company. They will do the clerical work and sampling at the O. K., Old Hickory and Harrington-Hickory. They are A. V. Moyer, D. Avery and N. H. Thomas.—Milford Times.

James A. Pollock, manager of the Tetro mine, returned from that property this morning. He says the mine looks as good as it possibly could and in both drifts the value of the ore is holding out. Two carloads are in today's mar-ket and two more are being loaded.

Work has been resumed on the Lenora in Elephant canyon, owned by Mr. Burns and others, and a carload of high grade ore now on the dump will be shipped at once. There is a good body of this ore in the mine and it will

be cross-cut to determine its extent and shipments will probably be con-tinued. Frank Killam has charge of the work.—Milford Times.

A fine strike of shipping ore was re-ported at the Monte Cristo during the ported at the Monte Cristo during the week. It was made at a point on the surface near the old workings, from which so much high grade ore has been shipped. The vein is from two to three feet wide and the ore will average \$50 to \$50 in silver and lead. The ore is now being sacked for shipment and will yield the company a nice revenue.—Milford Times. Mliford Times.

R. L. Noif, accompanied by D. G. McNeil came down from Salt Lake last Sunday and remained until Tuesday, looking over the mining resources of this district. They took back a load of Inis district. They food back a had of samples from various properties, including J. B. Smithson's Crown Point, and if the assays come up to their expectations Mr. McNell will probably invest.—Stateline Oracle.

BULL OPERATORS DISCOURAGED.

Market Was Flooded With Liquidating Sales From All Quarters.

PRICES YIELDED EVERYWHERE.

Nothing Showed Strength and the Bears Had Everything Their Own Way.

New York Oct. 19 .- The London market oday was depressed by renewed appre hension over the far eastern outlook and the financial situation. Opening prices in the stock market there fell back sharply in response and there were large blocks of many leading stocks thrown upon the market. Declines of 1 to 1% were recorded by Pennsylvania, New York Central, Baltimore & Ohio, Southern Pacific, Island, Canadian Pacific, Union Pacific, Atchison, Amalgamated, United States Steel preferred, American Car and Tennueszee Coal.

Confirmation of the rumored embarrassment of the Maryland Trust company of Baltimore led to a flood of liquidating sales from all quarters, under which prices yielded further. A dozen or more stocks sold 2 points below Saturday's close, including Amalgamated Copper, American Car preferred, Smelting preferred, Republic Steel preferri, Locomotiv preferred, Tennesse Coal, Sugar, Pennsylvania, Canadian Pacific, Union Pacific, Southrn Railway preferred and Missouri Pacific, Selling of Baltimore & Ohio and United States Steel was particularly heavy and they fell 2 points. The market showed no strength at any other point and the readiness with which stocks gave way under the attack discouraged the buil operators. Pressure slackened for a time but the rally was so spiritless that bear selling was renewed against it. The selling was less in the second hour, but only slight rallies in prices resulted. American Car with a recovery of a point led the upward reaction. Rock Island fell 2, Delaware & Hudson 24, St. Louis-Southwestern preferred 2½ and Southern Rallway preferred. United States Steel second for decimal stocks.

A few stocks rallied in the neighborhood Baltimore led to a flood of liquidating

in stocks.

A few stocks rallied in the neighborhood of a point, notably Sugar and United States Steel preferred. Otherwise prices were not essentially changed from the poon level and business was very dull. were not essentially changed from the noon level and business was very dull. General Electric lost 3. Setting was resumed with vigor again when the announcement of another trust company suspension was made—that of the Union Trust company of Baltimore. Leading stocks sold lower than in the morning break and there was particular pressure against the southern stocks. Union Pacific and Baltimore & Ohio sold at 69% and Tra respectively, and Atchison, 8t. Paul, Paul New York Central.

fig and Baltimore & Ohio sold at 69½ and 12% respectively, and Atchison, St. Paul, Southern Pacific, New York Central. Reading, Illinois Central, Kansas City & Texas preferred and Brookiyn Transit were added to the list of stocks which showed losses of 2 points or more. Steel preferred dropped 2% and Amalgamated 2%. At 2 clock the market was still on the down grade. Westinghouse Electric fell s points.

The railure of the Maryland Trust company of Baltimore caused a weak stock market today. Liquidation was general, but the Jecline in Baltimore and Southern Railway preferred was attributed directly to selling induced by the failure, Thessitocks, United States Steel preferred and Amalgamated Copper were notably weak, but losses of 1½ to over 2 points were quite general during the first hour. The industrials were conspicuous in the decine also. Selling by f-reign houses owing to the renewed uncasmess over the far eastern situation and the financial conditions in London aggravated the weak-ness.

MARKETS UNCHANGED. Temorrow's Meeting of Flour Men, How-

ever, May Affect Farm Products. There are no changes in the local retail provision markets from last Thursday; but when the grain and flour men meet tomorrow night there may be some changes made in the farm product quotations. In the fish market, baracuda are becoming scarce, and will disappear this week from the stalls, as the season for catching them is over. In a month sea turtles will be on deck from the Pacific coast. These estimable products of the briny deep are a great luxury, especially in the soup line, and tail provision markets from last Thursproducts of the briny deep are a great luxury, especially in the soup line, and some 600 pounders reach the Salt Lake markets. In weight, however, the sea turtle ranges up to half a ton and over, and lives to a great age; but the monster turtles do not reach this far inland. Immense great turtles are caught in the Gulf of Mexico, but it costs less to ship in the Pacific ocean product to o ship in the Pacific ocean product to the intermountain markets.

Will Maintain Saloon Rates.

Hamburg, Oct. 19.-The managers of the Hamburg-American and North Ger-man Lloyd Steamship companies, at a meeting held here today, decided to adhere for the present to the agree-ment regarding saloon rates.
