### THE WEEK ON THE EXCHANGE

Majority of the Stocks Show Some Improvement.

JOE BOWERS IS ADVANCING.

Eagle and Blue Bell Stronger -Northern Light and Yankee Con are Weaker.

#### TODAY'S METALS: SILVER 601/8

LEAD, \$4.57 1/2 CASTING COPPER 15

The volume of business transacted this week on the exchange, while not large, indicates a fair business, all things considered. There have been no very sensational features on the board during the week, which closes with a better tone to the stock mar-

Ajax shows a little shrinkage during the week, as does Geyser-Marion, but Chloride Point and Eagle and Blue Bell have made slight advances. Mammoth is much weaker, caused, perhaps, by apprehensions that the recent cave-in may interfere with operations to some extent. Mercur shows more strength, while Joe B vers has made surprising gains. Northern Light appears to be going to pieces. After slight fluctuations it closes the week weaker than it entered it. Grand Central has sagged somewhat, but shows itself a little stronger today, owing to hopes of a dividend this month. Bunker Hill has not advanced any, and both Golden Eagle and Bowers Extension show a slight shrinkage. May Day has sold at 90, but closes weaker, as does Yankee Consolidated.

Business was not very brisk today, though with the exception of Northern Light prices were well maintained. Eagle and Blue Bell sold up to \$1.25, while Daisy participated at 8c and Mercur at \$5.26. Yankee Con. and Northern Light

were both weaker, while Sunbeam and Lower Mammoth are practically sta-

The week's business resulted in the

sale of 151,110 shares for \$ Quotations were posted

POSTMASTER AT LOGAN.

Robert Murdock's Commission Therefor is Signed.

[SPECIAL TO THE "NEWS."] Washington, D. C., Feb. 3.-The postal bulletin issued this afternoon by the postoffice department announces that Robert Murdock has been commissioned postmaster at Logan, Utah.

Nut Loaf and Nut Bar at Kolitz Store Monday 2 to 6.

#### TENDENCY UPWARD TODAY

This Was Followed by an Accentuated Downward Movement.

Steadler Toward Close-General Market Unsettled-Live Stock and Produce Slow.

New York, Feb. 3 .- Wall Street: The

market opened about on a parity with the foreign figures and quickly assumed a distinct tendency upward. A temporary interruption to the upward movement was caused by a reaction in sugar of 14 and heavy realizations in Baltimore & Ohlo, which lowered it a point. This circumstance caused a sagging to values elsewhere, but the market soon developed an improved tone under the leadership of St. Paul, which was heavily absorbed on the encourag-ing earnings for the fourth week in January. General electric was con-spicuous on the rebound, rising four points. Sugar was fairly active a trifle above the worst. The various iron and steel issues were marked up sharply in the second hour. Improvements were also chronicled in the general market with St. Paul a feature. After the publication of the bank statement, which indicated a larger increase in cash than anticipated, profit taking began and the downward movement was accentuated by heavy selling of sugar which sold at 1115. Not all of the advances in the general list were wiped out, a substantial fraction being tained by many stocks. In the final dealings there was a strong upward movement in some stocks, notably American linseed preferred. The general market, however, left off unsettled with irregular net changes.

### WILL INCREASE CAPITAL STOCK.

Meeting of St. Joe Mining Company on Monday.

THE RUSH TO CAPE NOME.

Hardships to be Encountered-Pleased with the Mercur-Tintle Shipments,

A meeting of the St. Joe Mining company has been called for Monday, at which time it is stated, the capital stock of the company will be increased from 200,000 shares to 1,000,000 shares. Of this amount 400,000 shares will be sold as treasury stock to eastern parties, who are at the back of the company, principal among which are individuals in the North American Trust company. The St. Joe company is said to be in first-class condition to pursue the extensive plan of development aiready blocked out which consists mainly in driving a deep tunnel to the northwest side lines of the property adjoining the United States group. A vertical depth of 1,400 feet will then be attained, and in its passage it is said the tunnel will intercept teven known veins. Shipping ore in moderate quantities and concentrating ore in vast bodies are now available at a number of places in the upper tunnel. For every dollar expended in development it is said there is more than that amount in sight. But it is proposed to do nothing until the deep tunnel has been run in. This will give an immense stoping area and supply abundance of water for the large concentrating plant, which it is pro-posed to build at the mouth of the tun-Besides this, it is thought, tunnel will effectually solve the water difficulties encountered in other properties. The company has about \$20,000 on hand, it is stated, with which to continue the gigantic enter-prise and it is also said that the 400,000 hares of treasury stock, resulting from the increased capitalization on Monday have already been placed in the East at \$1 a share. Incidentally it is anticipated that the drainage by the big tunnel will result in a source of profit when used on the barren lands in the vicinity

It was hoped at one time that electric power would be obtained to run the air compressor, to be shortly installed at the mouth of the tunnel. Satarrangements could be made however, and the company is now ordering a big gasoline engine, as being, all things considered, the best for the purpose. Some assays of ore from the Fire Kine claim show as high as 22 per cent lead, 16 ounces silver and \$1.24 in gold.

IS PLEASED WITH MERCUR.

Director Charles J. Devereaux Will Leave for Boston Tomorrow. Charles J. Devercaux, of the Mercur directorate, will leave for his Boston home tomorrow after a pleasant stay of something over a week in Salt Lake and vicinity. Mr. Devereaux represents the eastern end of the Mercur in-For the past two or three terests. days he has been visiting the mine and mill at Manning and expresses pleasure at all he saw. He, in company with other stockholders, was much pleased with the mine's annual report and considers that the mine will easily earn its dividends during the ensuing year. A great deal of preparation for the in-creased drain on the mine has been made by the management and with the starting up of the new mill addition next week it is felt the mine will easily be made to disgorge the 600 tons of ore per day that will be needed to run it to its full capacity. The mill bottoms have arrived and on Monday it is proposed to close down the mill for a few days in order to connect up the new machinery and at the end of the week it is thought the eight new tanks will be filled with ore and leaching will begin. The Mercur railroad has pre-pared for the increased output by ordering six new steel ore cars. Part of the number will arrive shortly, and although the new engine will not ready for use until some time in April or May, no difficulty is anticipated in handling the increased ore output from the mine

of Mercur is not so well known in Bos-ton, though the communications of the correspondent of the Engineering and Mining Journal are noticed and com-mented on. It is considered that such reports do not tend to help the mining especially as the writer single out a few individuals on whom to vent

#### THE RUSH TO NOME.

One Who Has Been There Speaks of Hardships That Will be Met.

In view of the fact that number of Utah people are contemplating a trip Cape Nome this spring the following may be of some interest. The writer is a correspondent of the Engineering and Mining Journal, who says:

I reached there last spring. There were then only three houses and some 50 tents squatted on the beach in the snow. One cannot imagine a more des-olate, dreary outlook than that which presented itself. Here was a vast expanse of country, mountaineus, but utterly devoid of timber or vegetation. covered with ice and snow; certainly anything but an inviting prospect to

Comparatively few will succeed in this country, for not many are physically capable of enduring the hardships attending this work. Practically it is always winter at Nome. It is wet and foggy at all times, and to go tramping over the country in the slush of melting snow, with never a dry spot to rest on, is anything but pleasant or healthy. Even in the lower country prospecting is no mean undertaking. At Nome the steamers land you direct from Scattle, but after reaching the beach in a small boat which in itself is a hazardous undertaking, there being no wharfage facilities-the newcomer must look out for himself.

Before starting out a prospector ought to learn all he can. A week passed in the beginning, getting other people's views, will be well spent. Above all, even the old miner should not be pretentious enough to think that he knows it all. No matter how long he has mined, or where, he will find the conditions at Nome entirely different. Or-dinary common sense will further, his interests better than a life time spent in a stamp mill or cyanide plant.

About the middle of June the beach and foothills will be free of snow; then

it is time to start for the interior,

There is nothing left to locate upon nearer than 29 miles from the coast. Every creek and gulch is staked from to bottom and all benches and sidehills were eagerly sought for last sum-mer. The beach is free for everyone as the government reserves it and will not grant a location. It will, howver

recognize squatter rights and protect miners while they work. The gold is about evenly distributed in this beach sand for a distance of 100 mlles-possibly further-and will pay on an average of \$20 a day to a man with a rocker. If a miner is intent upon going to Alaska, and has \$1,000, might bring an engine, centrifugal pump and vanner, and he will be satisfied. He should not forget to have oll burners in the boller and bring the fuel with him. An oll engine ought to be better still. He must take no chances as to buying or duplicating what he wants. If he does he may have a uscless piece of machinery on his

#### CYANIDE SHIPMENTS.

Lucky Boy, Geyser Marion, Daisy and Star are the Contributors.

The week's receipts at the Consolidated Kansas City Smelting & Retinery company's rooms consist of 1.250 pounds of gold cyanides. The largest consign-ment of 700 pounds came from the levser-Marion. The Lucky Boy of Custer, Ida., in which Salt Lake capital is interested, also reported with a 250 pound batch. The week closes with 250 pound lot from the Daisy of West Dip, and 50 pounds of the valuable dust from the Star of Pine canyon, which reached the refinery today.

GOLD DREDGING COMPANY. Mandamus Proceedings Against Company Operating in Montana.

Chicago, Feb. 3 .- Mandamus proceedage habe been brought here directors and efficers of the Gold Dredging company, an Illinois corpora-tion in Montana, by Walter C. Judson, Chicago stockholder. The proceedings are brought to en-

able the plaintiff to examine the books of the company. Along other things the petitioner desires to learn the de-tails of the purchase of the Eugenia mine in Montana by the corporation.

DALY WEST ELECTION. Prominent Man States that the Bam-

bergers Will Control It. Some speculation is being indulged in by mining men as to what the result of the Daly-West election on the 19th inst. will be. In spite of the fact that Manager J. J. Daly has served the company so well there is talk of R. C. Cham bers being made president, and some say manager also. David Keith has also been named by other individuals. It is, however, extremely unlikely that Mr. Keith will accept any positio the kind, as he expects to be away from Salt Lake the greater part of the year. The knowing ones say that J. E. Bam-berger and Simon Bamberger, with their friends, will wield the balance of power on the day of election, and possibly secure the election of a man here-ofore unnamed.

#### Tintic Ore Shipments.

Special Correspondence, Eureka, Feb. 2.—The ore shipments

from Tintic district for the week end-
ing today are as follows:

Sick Headache, Glddiness, Fulness and Swelling after meals, Dirziness and Drowsiness, Cold Chills, Flushings of Heat, Loss of Appetite, Shortness of Breath, Contiveness, Blotches on the Skin, Distarbed Sleep, Frightful Dreams, and all Nervous and Trembing Densations, etc. These allreats all arise from a disordered or abused condition of the stomach and liver.

Beecham's Filis will quickly restore Females to complete health. They promptly remove any obstruction or irregularity of the system. For a Weak Stomach, Impaired Digestion, Sick

they not like magic—a few doses will work won-ders upon the Vital Organs; Strengthening the Muscular System, restoring the long-lest Com-plexion, bringing back the keen edge of Appetite. plexion, bringing back the keen edge of Appetite.

and arousing with the Rezabud of Health the whole physical energy of the human frame. For throwing off fovers they are specially reasonmed. These are "lacts" admitted by housands, in all classes of society, and one of the best guarantees to the Nervous and Debilitated is that Beecham's Pills have the Largest Sale of any Patent Medicine in the world. This has been achieved Without the publication of testimonials.

Without the publication of testimonials Beccham's Pills have for many years been the popular family medicine wherever the English language is spoken, and they now stand

10 cents and 25 cents, at all drug stores mmmm returned today from that property, and reports some ore being extracted. A shipment is expected to reach the

market before long. The first carload of machinery for the ew Fortune mill at the Hingham group s expected to arrive next week from

W. B. McDougall, the well known mining engineer, expresses much confidence in the copper prospects of the southern part of the State. .

George Havercamp, John Bestelmeyer et al, have made application for patent on the Little Silver King, and Side Extension of Little Silver King in Tintic

Glen R. Bothwell has returned from a visit to the Congor of Bingham, where he says sinking has been resumed in the incline shaft, which is to be put down a further 200 feet.

Thomas Weir returned from Tintic last evening and says some very nice ore is being taken from several levels of the Ajax. The last smhipment ran over 20 per cent copper.

W. J. Lawrence and W. T. Din-woodey went out to the Star Con. last evening with W. G. Filer. The party will probably look over the Boss Tweed before returning. There is said to be no significance to the visit. Samples of gold bearing rock have

been secured in the mountains east of Mill Creek, Will Griffiths is having them assayed. The samples may prove up well, but he is not building up any hopes on the results. Ed. McCarrick was visiting the Red Wing, of Bingham, yesterday and re-ports everything looking well. The ore is increasing in value right along.

A car of ore is at the sampler today and another one is expected on Mon-The stockholders of the Dalton & Lark Mining Company are scheduled to meet Monday and ratify the recent transfer of twenty-two claims of the company's property to P. T. Farns-worth. It is estimated 2,000,000 shares

will be represented at the meeting. Bingham Bulletin: A. C. Burridge and Chief Engineer U. H. Broughton of Boston, and F. P. Addicks of New York,

connected with the Utah Consolidated, together with a party of several others, were here from the East yesterday and inspected the mines. The property has passed that stage of development and production when newspaper comment is desired and the interviewer has poor picking. There is no doubt the gentlemen were well pleased with the outlook at the mine. The smelter in its enlarged form will be needed as soon as it can be completed.

#### BUSINESS NOTES.

While the week has been a quiet one. in local commercial stocks, there have been a number of deals in Descret Savings and Utah Sugar. The first named has advanced to \$147 per share, and is very hard to obtain at that rate. Utah Sugar has fluctuated considerably, selling at \$14.50, \$14.55 and \$14.70, several blocks changing hands this morning at the latter figure. Ogden Sugar receded to 1160, mainly because of the doubt in regard to the date of the dividend. That a substantial disbursoment will be made to the stockholders there is no doubt, but the date is uncertain. The latest quotations are as follows:

### SUPREME COURT FEBRUARY TERM

Forty-one Cases Are Down on the Company K Utah Volunteer Engi-Regular Docket for Hearing.

Abstract in the Majors Murder Case Not Yet Filed-Vaccination Suit May be Heard Next Tuesday.

The supreme court docket for the

February term, which begins on Monday, the 12th inst, was completed by Clerk Palmer today and distributed. The calendar contains a list of fortyone cases, averaging three a day up until Friday, Murch 2. No court will be held on Saturdays and as Washington's birthday occurs on Thursday, court will adjourn Wednesday afternoon until

Friday morning. There are but four criminal cases on the docket, the most important of which is the case of George Bates, involving

the State Jury law, It will be observed that the case of young Abe Majors, under sentence of death for the killing of Capt. Brown at Ogden some time ago, is not included among the number, his attorneys hav-ing thus far falled to file an abstract of the proceedings in the district court, with the clerk of the supreme court. Whether or not the judges will consent to hear it during the term no one can

It is expected the Cox mandamus suit will be heard on Tuesday, though it is by no means certain that the judges will care to hear it before the term begins, in view of the recent action of the board of health and beard of education with respect to allowing all healthy children to attend the schools. The list of cases, names of attorneys on either side, and the dates on which they will be heard are as follows:

## REUNION OF UTAH SOLDIERS

neers to Meet Here Feb. 19.

COURT OPENS ON THE 12TH. AN EVENT OF IMPORTANCE

Post Commandership to be Perpetuat ed and Services Commemorated -Special Order Issued.

Extensive preparations are being made for a re-union of Company K Second regiment engineers. The conpany was mustered in from Salt Lake and were assigned to duty on the Hawaifan Islands. In the few menths they were stationed at Honolulu they estab. lished Camp McKinley, erected at large comfortable barracks, put in a complete system of sewerage and rate supply, and macadamized the road in

and about the camp. For two months every member served his time in the hospitals, where they nursed over six hundred patients with typhoid malaria fever. They played tattoo over the graves of over forty of Uncle Sam's soldiers, and followed Princess Kaiulani to her grave, A medal was awarded to one of its members for bravery in saving the life of a sallor. Two of the battalion gallantly gave up their lives in the vain effort to rescue two natives who, while out driv. ing, crossed a live wire which got entangled about the horse, to the great

danger of the occupants of the cart. Out of the ninety that left Salt Lake. eighty served over two months in the sick bed and a few are still suffering from the effects. The battalian less fifteen men while away—not by the bullets of the enemy, but by their vain endeavors to fight the fever which at-tacked over fifteen hundred soldiers while stationed on the island. The following order has been issued to

1898. Members of Company K, Second regiment United States Volunteer Es-You are ordered to report for gineers. duty at the G. A. R. hall, west Second South street, February 19th, 1909, at 8:30 p. m., for a good time. Your pest will be number --. Duty, in commenoration will be --.
Fine, if present, \$1.50, which please orward as soon as possible to Frank

Moyle to pay for banquet. Care Utab Commercial and Savings Bank.

Remember the Maine, February Bib.

the company:

Representatives from all volunted companies of Utah will be present.

By order of committee,

F. C. MOYLE, Secretary. At this meeting steps will be taken to unite the volunteer boys of Utah so as to keep alive that comradeship which is so hard to find outside the close companionship they met with in the army

### of Uncle Sam.
